**Could your staff
and business
survive a fire?**

WORKPLACE FIRE SAFETY COURSES

States
of Jersey 

“Course material was just right & very relevant to the work I do. Don't change anything!”

Katy Griffiths - Barclays Wealth

FIRE SAFETY TRAINING

Do you or your staff need fire safety training?

Are you comfortable that your employees would know what to do if a fire occurred in your business?

More importantly, are you confident that your staff members know how to prevent fires from occurring in the first place?

The hazards from fire can pose a significant threat to business. Every year many people are injured by fires that occur in the workplace. The financial costs of a fire can be equally devastating. Annually, the cost to businesses through fire runs to many millions of pounds, and companies are all too often unable to recover from its catastrophic effects.

Jersey Fire & Rescue provides quality fire safety training specifically designed to assist both employers and employees to meet their obligations within current legislation, such as Health and Safety at Work (Jersey) Law 1989 and the Fire Precautions (Jersey) Law 1977.

All delegates will receive a course completion certificate accredited by Jersey Fire & Rescue which is valid for 3 years.

THE COURSES

Jersey Fire & Rescue have developed a suite of fire safety training courses, which aim to provide a greater awareness of the threat posed by fire to people, property and business continuity.

By combining the recognition of individual responsibilities to promptly report fire related hazards and the actions to take should a fire occur, the risks to employees and the workplace will be reduced.

The courses that we currently offer are:

- **Fire Awareness**
- **Fire Marshal**
- **Fire Extinguishers**

All of our courses are delivered by serving or retired firefighters whose professional understanding of fire development, risk assessment and risk management provides an unrivalled edge to your training experience.

The use of professional firefighters also enables real life incidents to be utilised as examples for discussions.

Our courses are supported by the Jersey Safety Council.

FIRE AWARENESS COURSE

Who should attend?

All members of staff.

This is especially useful as part of an induction programme.

Course aim

To provide delegates with greater awareness and understanding of the dangers of fire, and to assist them in identifying and reducing the potential for a fire in the workplace.

Areas Covered

- Main causes of fires
- Understanding fire and smoke
- Introduction to relevant legislation
- Introduction to fire safety measures
- Hazard spotting and preventing fires
- Arson
- Introduction to fire extinguishers (no practical use)
- Actions on discovering a fire
- Evacuation procedures
- Home fire safety

Course duration

2 hours

information

FIRE MARSHAL TRAINING

Who should attend?

All members of staff undertaking the role of a fire marshal / warden or those with an identified role in the event of a fire.

Course aim

To provide delegates with the necessary skills and knowledge to enable them to act as a competent and confident Fire Marshal and assist in the management of fire risk reduction in the workplace.

Areas Covered

- Importance of fire safety at work
- Relevant Legislation
- Understanding of fire safety measures
- Human behaviour in fire situations
- Corporate responsibilities
- Expectations of a fire marshal
- Fire drills
- Evacuation procedures
- Roll calls
- Fire & Rescue Service liaison

Course duration

2 hours

Please note: Delegates must have completed our 'Fire Awareness Course' (within the last 3 years).

FIRE EXTINGUISHER TRAINING

Who should attend?

Any member of staff who may potentially feel the need to use a fire extinguisher. If you have extinguishers, staff may feel obliged to use them.

Course aim

To provide delegates with the necessary skills and knowledge to enable them to confidently use fire extinguishers and fire blankets and to reduce the potential damage caused by fires in the workplace.

Areas Covered

- Identifying different fire extinguishers
- Selecting the right extinguisher
- How to use extinguishers
- Water extinguishers
- Foam extinguishers
- Carbon dioxide extinguishers
- Dry powder extinguishers
- Wet chemical extinguishers
- Fire blankets
- Practical use of extinguishers on real fire

Course duration

2 hours

information

Please note: Delegates must have completed our 'Fire Awareness Course' (within the last 3 years).

FIRE SIMULATOR

We recognise the importance of ensuring that delegates experience using fire extinguishers in realistic situations.

Our fire extinguisher training enables delegates to tackle a range of simulated fires including a toaster, waste paper bin, frying range, electrical motor and a plasma screen.

Delegates will also learn the correct techniques for using fire blankets safely and experience using a fire blanket on a simulated cooking pan fire.

COURSE LOCATION

Standard

Courses are held at our Western Fire Station. Utilising our operational On Call fire station really adds to the authenticity of the fire safety training. It also enables us to make use of some of our unique training facilities, such as our specially designed training suite.

Whilst parking is available on site, space is limited.

Bespoke and Outreach

Bespoke and Outreach courses, tailored to your work place, can be provided (*minimum number of 10 delegates*).

Bespoke courses can be held at our Western Fire Station using material gathered from your business location, and tailored to your requirements.

However, if you would prefer to keep your staff on site, these courses can be delivered at your business location, provided that you have the facility to offer an open air area (no smaller than 3 parking spaces with vehicular access), and a training room with presentation equipment to carry out the teaching of our material whilst enhancing the theory elements. This brings the real fire element to your workplace.
