

Schedule of sites of archaeological importance

Name & location of archaeological site	Cadoret Hoard Field 341 off La Rue de Crabbe St Mary			No. 1
Date of assessment	March 2007	Date of designation	February 2008	
Designation	AAP field My341			
Archaeological interest	Bronze Age hoard found in 1995 (178 pieces) The Cadoret bronze hoard is the largest collection of Bronze Age artefacts ever found in the island. It consists of 178 pieces of broken weapons, tools, ornaments and casting debris. The fact that many of the objects in the hoard had been deliberately broken into small manageable pieces suggests that it was a typical founder's hoard - a bronze smith had probably collected the pieces for re-use but it is unknown why he failed to return to its hiding place.

Name & location of archaeological site	St Martin's Arsenal Flint Chipping Area Field 772 off La Rue du Clos Fallu St Martin			No. 19
Date of assessment	March 2007	Date of designation	February 2008	
Designation	AS field Mn772			
Archaeological interest	<p>La Hougue Bie Museum holds in its collection an important lithic assemblage associated with this site. They are part of the Watson collection of artefacts collected some time around the 1920s and consist of flint cores and worked flints, mainly scrapers. They date to the Neolithic or Bronze Age period.</p> <p>These flints are a clear indication that the area was in use around 6,000 years ago and was possibly a habitation site. The flint tools are an indication that there is important in-situ remains still buried below the surface.</p>
