[REDACTED]	Delivery Lead	DL
[REDACTED]	Clinical Advisor	JS
[REDACTED]	Outgoing Head of Communication and Engagement	OHC
[REDACTED]	Incoming Head of Communication and Engagement	IHC
Constable Mike Jackson	Constable of St Brelade	MJ
Residents	Approx 30 people	

Presentation slides available under Neighbourhood Forum section of [gov.je/NHFP](http://gov.je/NHFP).

1	Enid Quenault Health and Wellbeing Centre (EQHWC) floors in use	Actions
	A query was raised regarding the floors in use at the facility: the ground floor is for patients and the upper floors for staff.	

2.1	EQHWC Parking Capacity	Actions
	Following a query regarding whether parking capacity had been exceeded, the team noted that to its knowledge, parking demand had not exceeded capacity. It was further noted by the team that the busiest day thus far had seen 177 appointments.	
2.2	EQHWC Contractor Parking	Actions
	A query was raised as to whether there were parking spaces available for contractors. The Team noted that there were allocated estates team spaces.	

3	Traffic at Les Quennevais	Actions
	A discussion took place regarding residents' experiences of traffic in the neighbourhood and how these could be tackled by various traffic calming methods. It was noted that these would need to be raised with the Parish since they were Parish of St Brelade roads, and any intervention would need to be agreed by the Roads Committee.	MJ

<b>4</b>	<b>Café Facilities at EQHWC</b>	<b>Actions</b>
	An attendee noted that they had visited the Café on the site a number of times and that they were happy to see the site/facilities used by locals and staff. The team noted that the Café is available for all external visitors and that it produced good quality and value food.	

<b>5</b>	<b>Lights and Cleaning Schedules at EQHWC</b>	<b>Actions</b>
	An attendee noted that there had previously been issues whereby the facility's external and internal lights had been left on at night which in turn was causing light pollution for local residents. Further to this the attendee had noted the situation had improved in recent weeks and thanked the team. The team expanded on this stating that external lights were now being switched off but unfortunately, the internal lights were sometimes on for cleaning that continues to 11pm. The team noted that the cleaning schedule was going to be amended to ensure those areas that most disturbed residents were cleaned first. Following further querying regarding this the team noted that it was hoped that this issue was now resolved: previously these lights were left on as this was the last part of the building to be cleaned by which point it was dark and hence the lights were being turned on and left on until all cleaning was complete. As such the team noted that by cleaning this part of the facility first it is hoped that it will still be light and hence the risk of lights being left on is minimised.	

<b>6</b>	<b>Feedback</b>	<b>Actions</b>
	Residents and the Incoming Head of Communication and Engagement discussed options for feedback and communication going forward. A survey of residents was suggested, and the team agreed to progress.	<b>IHC</b>
