

Submission by Matthew McNulty

After an incident in the General Hospital where I underwent a hip replacement operation I had some issues with the hospital that can only be resolved through the Jersey legal system.

I made an appointment to see a lawyer through The Citizens Advice Bureau. For half an hour this consultation was free.

I only got negative vibes from this lawyer as regards how hard it was to win a case against the General Hospital and its staff and it would cost a fortune.

It deterred me from that course of action so I contacted another lawyer who were advertising in the Jersey Evening Post for one half hour session for I made an appointment with a staff member and I explained what had happened to me at the hospital.

I got a negative response from the lady who interviewed me. She told me it would probably cost £2000.00 for surgeons reports and medical cases were notorious to win. I was not filled with confidence.

That is why I have taken the time to write this e-mail as justice is out of reach for the ordinary man in the street.

Yours Faithfully
