

Draw The Water Cycle

Draw, link and label your own Water Cycle : Evaporation, Condensation, Precipitation and Collection

Step 1: For **Evaporation**, draw an ocean with arrows rising up towards the sun to indicate water turning into a gas.

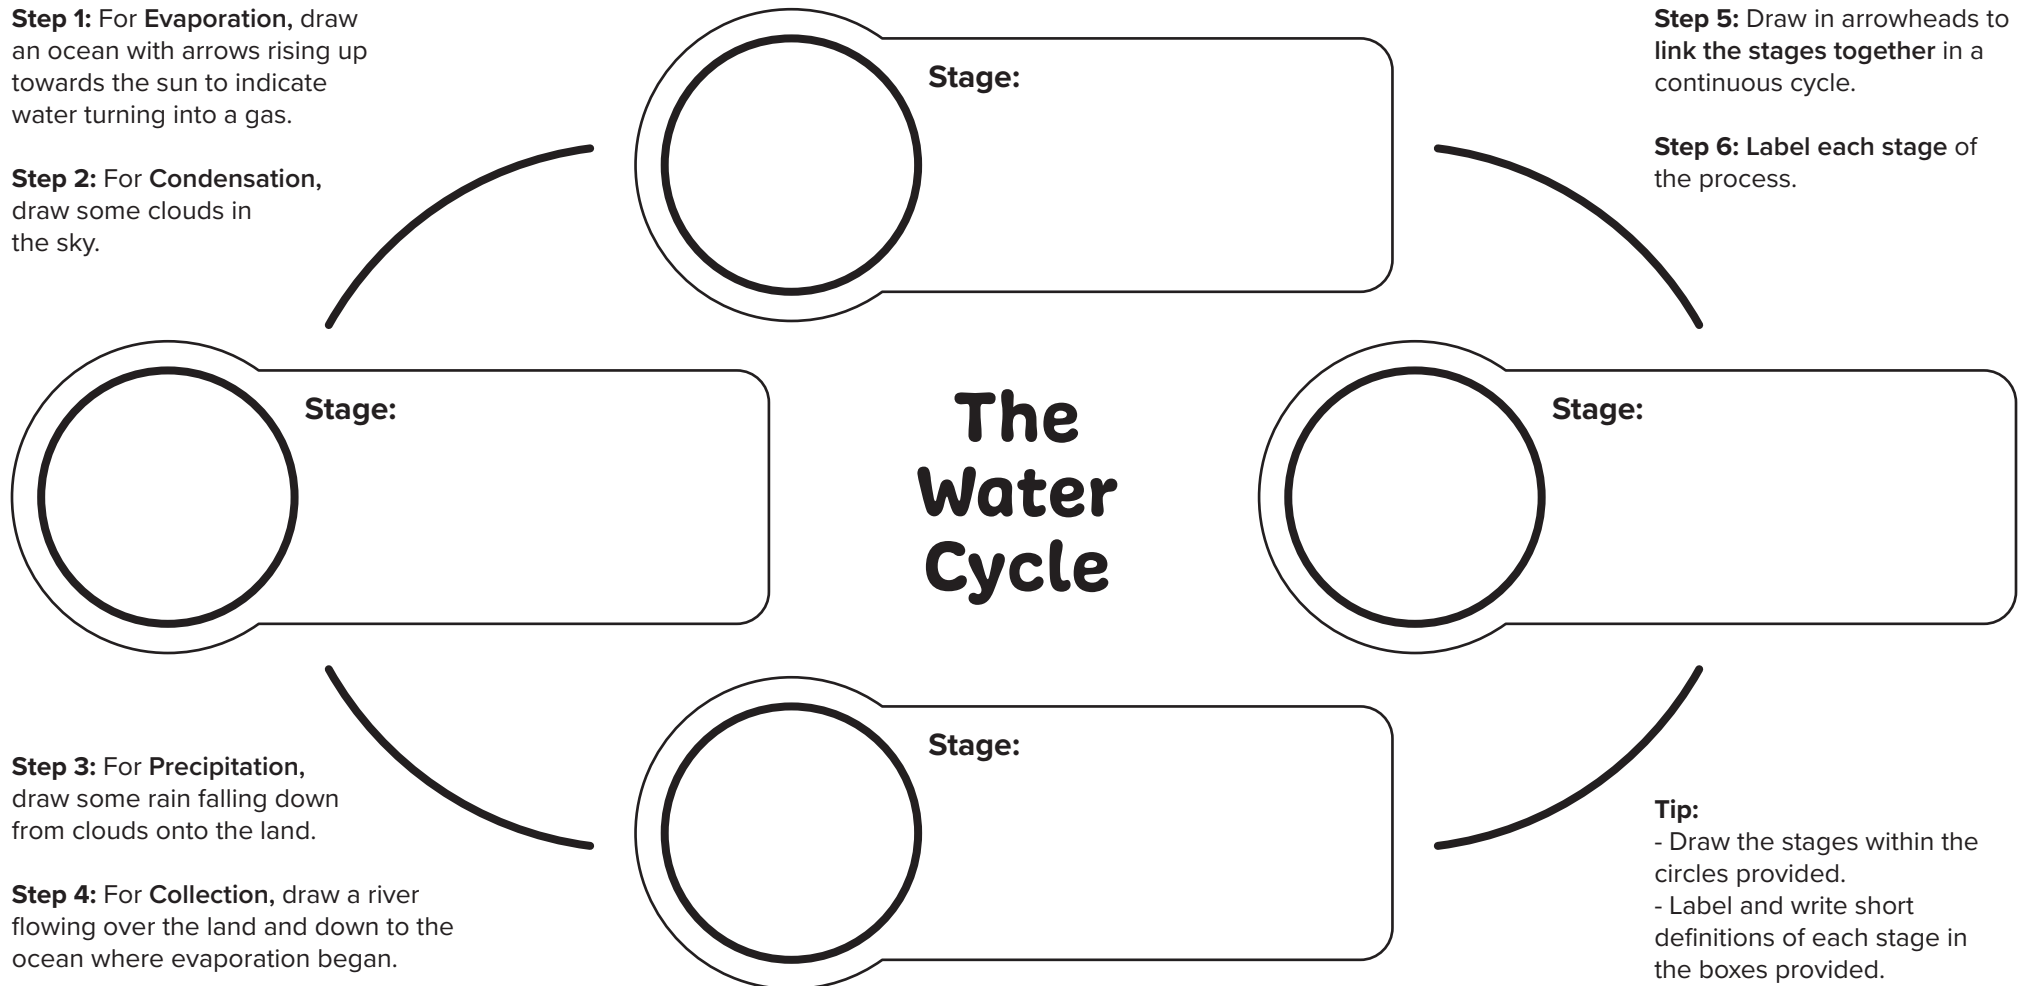

Step 2: For **Condensation**, draw some clouds in the sky.

Step 3: For **Precipitation**, draw some rain falling down from clouds onto the land.

Step 4: For **Collection**, draw a river flowing over the land and down to the ocean where evaporation began.

Step 5: Draw in arrowheads to **link the stages together** in a continuous cycle.

Step 6: Label each stage of the process.

Tip:
- Draw the stages within the circles provided.
- Label and write short definitions of each stage in the boxes provided.
