

# **PRESCRIBED LIST**

**FEBRUARY 2024**

**Products available as  
Pharmaceutical Benefit under the  
Health Insurance (Jersey) Law 1967  
(including Dental Practitioners' Formulary)**

## 1. How to use the Prescribed List

- Items are listed by generic name using [dm+d](#) descriptions unless the product is a complex preparation and listed (and reimbursed) by brand name
- The second and third columns inform the selection and reimbursement of products as follows:
  - **Open order:** items listed as 'open order', may be prescribed by generic or brand name and any suitable proprietary or non-proprietary product that meets the prescription may be dispensed.
  - **Open order with brand name specified:** items listed as 'open order' and with a brand name listed in the 3<sup>rd</sup> column may be prescribed by generic or brand name BUT only the specified brand will be reimbursed.
  - **Generic only:** items listed as 'Generic' must be prescribed by generic name and will be reimbursed at the price stated in Part VIII of the current Drug Tariff.

## 2. Period of supply and repeat prescriptions

See HEALTH INSURANCE (PHARMACEUTICAL BENEFIT) (GENERAL PROVISIONS) (No. 2) (AMENDMENT No. 15) (JERSEY) ORDER 2023

- 2.1 An approved prescribing practitioner, other *than a dentist*, must not give a prescription for the supply of pharmaceutical benefit to a person for a period exceeding 90 days.
- 2.2 An approved prescribing practitioner who is a dentist must not give a prescription for the supply of pharmaceutical benefit to a person for a period exceeding 30 days.
- 2.3 An approved prescribing practitioner must not give more than one prescription for the same pharmaceutical benefit at any one time.
- 2.4 However, an approved prescribing practitioner may give up to 4 prescriptions in respect of the same pharmaceutical benefit at any one time if the prescriptions are for consecutive periods of supply.
- 2.5 An approved prescribing practitioner must not during a period of treatment give a further prescription to a person for the same pharmaceutical benefit unless the practitioner is satisfied that it is necessary or desirable to do so for the purpose of the treatment and –
  - (a) the pharmaceutical benefit is intended for the continuation of the treatment after the expiry of the present period of treatment and the prescription is dated no earlier than 21 days before the end of that period;
  - (b) the prescription is for an increase in dosage; or
  - (c) the prescription is to replace pharmaceutical benefit previously supplied on prescription and destroyed or lost.
- 2.6 An approved supplier must not supply pharmaceutical benefit ordered on a prescription –
  - (a) before the effective date of the prescription; or
  - (b) which does not comply with the requirements of this Article.

## 3. Pricing of Prescriptions

- The prescriptions are priced according to the Drug Tariff for England and Wales, available at <https://www.nhsbsa.nhs.uk/pharmacies-gp-practices-and-appliance-contractors/drug-tariff>.

4. **Prescription Charges:** Please note that prescription charges are abolished.

## 5. Instalment dispensing fees

- When a doctor has requested dispensing at stipulated intervals, instalment-dispensing fees may be claimed if the medicine is listed in Part I, II or III of the second schedule to the Misuse of Drugs (Jersey) Law 1978.

## 6. Submitting of prescriptions for pricing

- Prescriptions should be submitted each month to Customer and Local Services at La Motte Street. Normally this is by the third working day (Mon-Fri), but if there is a Bank Holiday in the month (January, April, May, August, and December), then it is the second working day. All prescriptions must be submitted by 2p.m. on the final day to ensure accurate preparation of the payment schedules.
- The prescriptions are then sent to NHS Business Services Authority in Newcastle for pricing.

## 7. Payment of Prescriptions

- On the submission of a month's prescriptions, an estimated payment is made based on the number of items claimed multiplied by the pharmacy's average cost per item from the previous priced month.
- This figure is then adjusted by the amount under/overpaid in the estimate of the previous month, the actual figure being calculated from NHSBSA's pricing of the prescriptions.

## 8. Remuneration

- There are two elements to the remuneration for dispensing: dispensing fees and discount. A fee is paid for the dispensing of each prescription and sundry dispensing fees e.g. for a controlled drug, for expensive items.

## 9. Data Processing Notice

- Information about prescriptions written by primary care practitioners is processed by the NHS Business Services Authority (NHSBSA) in line with the Data Protection Act 2018.
- As data Controllers, the Government of Jersey ask NHSBSA to process data so that payment for dispensing pharmacies can be calculated and the Government of Jersey can understand and manage prescribing in the community.
- Information that identifies individual patients is not processed or retained electronically.
- Information identifying the prescriber and dispenser, as well as the medicine, its strength, form, quantity, and cost for reimbursement, is stored securely in the NHS ePACT data system for five years. This data is used to produce anonymised, island wide analysis that can be used to comment on prescribing trends or the cost of medicines and respond to specific queries regarding a particular type of medicine.
- Prescribing data is also accessed and analysed to contribute to the appraisals and revalidation of GPs and other prescribers, as required by the Medical Practitioners (Jersey) Law 1960 and in partnership with the Primary Care Governance Team who have responsibility for the oversight of primary care activity in Jersey.
- For more information on how we use your data please go to our privacy statements on gov.je or request a written copy of the Government of Jersey Privacy Statement by phoning 01534 444444

## 10. Changes to the Prescribed List

10.1 There are no changes for February 2024.

## 11. Prescribing of liothyronine following specialist initiation only

- Liothyronine should only be prescribed in exceptional circumstances, following recommendation by a specialist, due to its weak evidence-base and very high cost. Such circumstances include clearly distinguishable specific levothyroxine medication intolerance, including extremely rare cases of levothyroxine induced liver injury, or where there is evidence that a patient cannot effectively metabolise levothyroxine to liothyronine.

## 12. Prescribing of liraglutide – starting and stopping criteria for weight management

- Liraglutide **must be prescribed by brand name** (Victoza for diabetes/Saxenda for weight loss) to ensure that the patient receives the product appropriate to the indication for use.
- Liraglutide (Saxenda) will be reimbursed as an adjunct for managing overweight and obesity in adults alongside a reduced-calorie diet and increased physical activity **ONLY IF:**
  - they have a body mass index (BMI) of at least 35 kg/m<sup>2</sup> (or at least 32.5 kg/m<sup>2</sup> for members of minority ethnic groups known to be at equivalent risk of the consequences of obesity at a lower BMI than the white population) **and**

- they have non-diabetic hyperglycaemia (defined as a haemoglobin A1c level of 42 mmol/mol to 47 mmol/mol [6.0% to 6.4%] or a fasting plasma glucose level of 5.5 mmol/litre to 6.9 mmol/litre) **and**
- they have a high risk of cardiovascular disease based on risk factors such as hypertension and dyslipidaemia **and**
- use is supported by a multidisciplinary specialist weight management service in primary or secondary care

**In addition:**

- adult patients should be started at a dose of 0.6 mg once daily and the dose increased to 3.0 mg once daily in increments of 0.6 mg with at least one-week intervals, as recommended by the manufacturer.
- Treatment should be **stopped** if escalation to the next dose step is not tolerated for two consecutive weeks.
- New adults starting on treatment with Saxenda must be **discontinued** after 12 weeks on the 3.0 mg/day dose if they have not lost at least 5% of their initial body weight
- Adults already receiving Saxenda (for more than 12 weeks) must be **discontinued** if they have not lost at least 5% of their initial body weight or if they have failed to reach the recommended dose of 3mg/day

**13. Prescribing of semaglutide – starting and stopping criteria for weight management**

- **Semaglutide must be prescribed by brand name** (Ozempic for diabetes/Wegovy for weight loss) to ensure that the patient receives the product appropriate to the indication for use.
- A [NICE Technology Appraisal](#) has been published. However, there is currently no mechanism for Health Insurance prescriptions to be reimbursed at the confidential price agreed as part of the NICE appraisal, so States (HIF) prescriptions **should not be issued in primary care** until further notice. Private services will have their own arrangements to make Wegovy available at full cost to patients.
- Once available, semaglutide (Wegovy) will be reimbursed as an option for weight management, including weight loss and weight maintenance, alongside a reduced calorie diet and increased physical activity in adults, **ONLY IF:**

- it is used for a **maximum of 2 years**, and within a weight management service providing multidisciplinary management of overweight or obesity AND
- they have at least 1 weight-related comorbidity and:
  - a body mass index (BMI) of at least 35.0 kg/m<sup>2</sup> ,
  - or a BMI of 30.0 kg/m<sup>2</sup> to 34.9 kg/m<sup>2</sup> and meet the criteria for referral to specialist weight management services in NICE’s clinical guideline on obesity: identification, assessment and management.

[Use lower BMI thresholds (usually reduced by 2.5 kg/m<sup>2</sup> ) for people from south Asian, Chinese, and Black African or Caribbean family backgrounds]

- Semaglutide must only be prescribed, in addition to lifestyle change, within a multi-disciplinary specialist weight management service
- **Stop semaglutide** if less than 5% of the initial weight has been lost after 6 months on treatment.
