

Estimated annual costs for extraction procedures performed on two to five year olds, from 2019 to 2024*

Year	Estimated annual cost (£)
2019	28,022
2020	17,189
2021	35,089
2022	27,397
2023	27,169
2024	20,497

**The cost of extractions depends on several variables, including the location the procedure is performed in, how many teeth are extracted, and how clinically complex the extraction is. Estimated costs for each year have been calculated using the number of children undergoing each type of procedure and the average cost for each of the different types of procedure in each operating location.*
