

Having a baby and the coronavirus vaccine

| | |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The coronavirus vaccine has been tested to check it is safe for most people to have</p> |
|  | <p>Scientists believe it is safe for pregnant and breastfeeding women</p> <p>But it has not been tested on these women to check that it is safe</p> |
|  | <p>Some women are at a higher risk of being seriously unwell if they get coronavirus</p> <p>This is because of a health condition that puts them in the high risk group</p> |
