

Using the Jersey's Children First Guidance

The Jersey's Children First Practice Guidance for all those who work with Children and Young People document contains detailed information to support our practice. This includes templates and tools agreed for use across the children and young people's workforce.

The guidance is available on the Government of Jersey website - [gov.je](https://www.gov.je) or via a link from the Jersey Online Directory – jod.je.

The guidance contains everything you need in order to apply the *Jersey's Children First* approach in your day to day work, both in your own agency and when involved in multi-agency processes. All sections of the guidance are important – it is very difficult to put *Jersey's Children First* into practice without having read and understood the values, principles, qualities and aims of the approach. However, there will be times when you will just want to consult a certain sub-section of the guidance to find out about a specific tool, form or technique.
