

## Weekly school attendance since 6 September 2021

The Department for Children, Young People, Education and Skills will publish school attendance data on this page daily (Monday to Friday, term time only). The data shows the percentage of pupils who are known to have been present across States primary and secondary schools for the morning sessions and exclude nursery classes.

There are a range of reasons why children are not present in school. At the moment this may be related to COVID-19, or other authorised or unauthorised absences. Furthermore, the data is subject to change (for example where a child arrives at school late, their attendance will be updated on arrival).

The data presented here is a snapshot. We are working with schools on some known data quality issues that arise each day, and as such, the most recent day's attendance figures are likely to be lower than actual attendance, any amendment to the daily published data will be corrected on this page.
