
My Volunteering Role

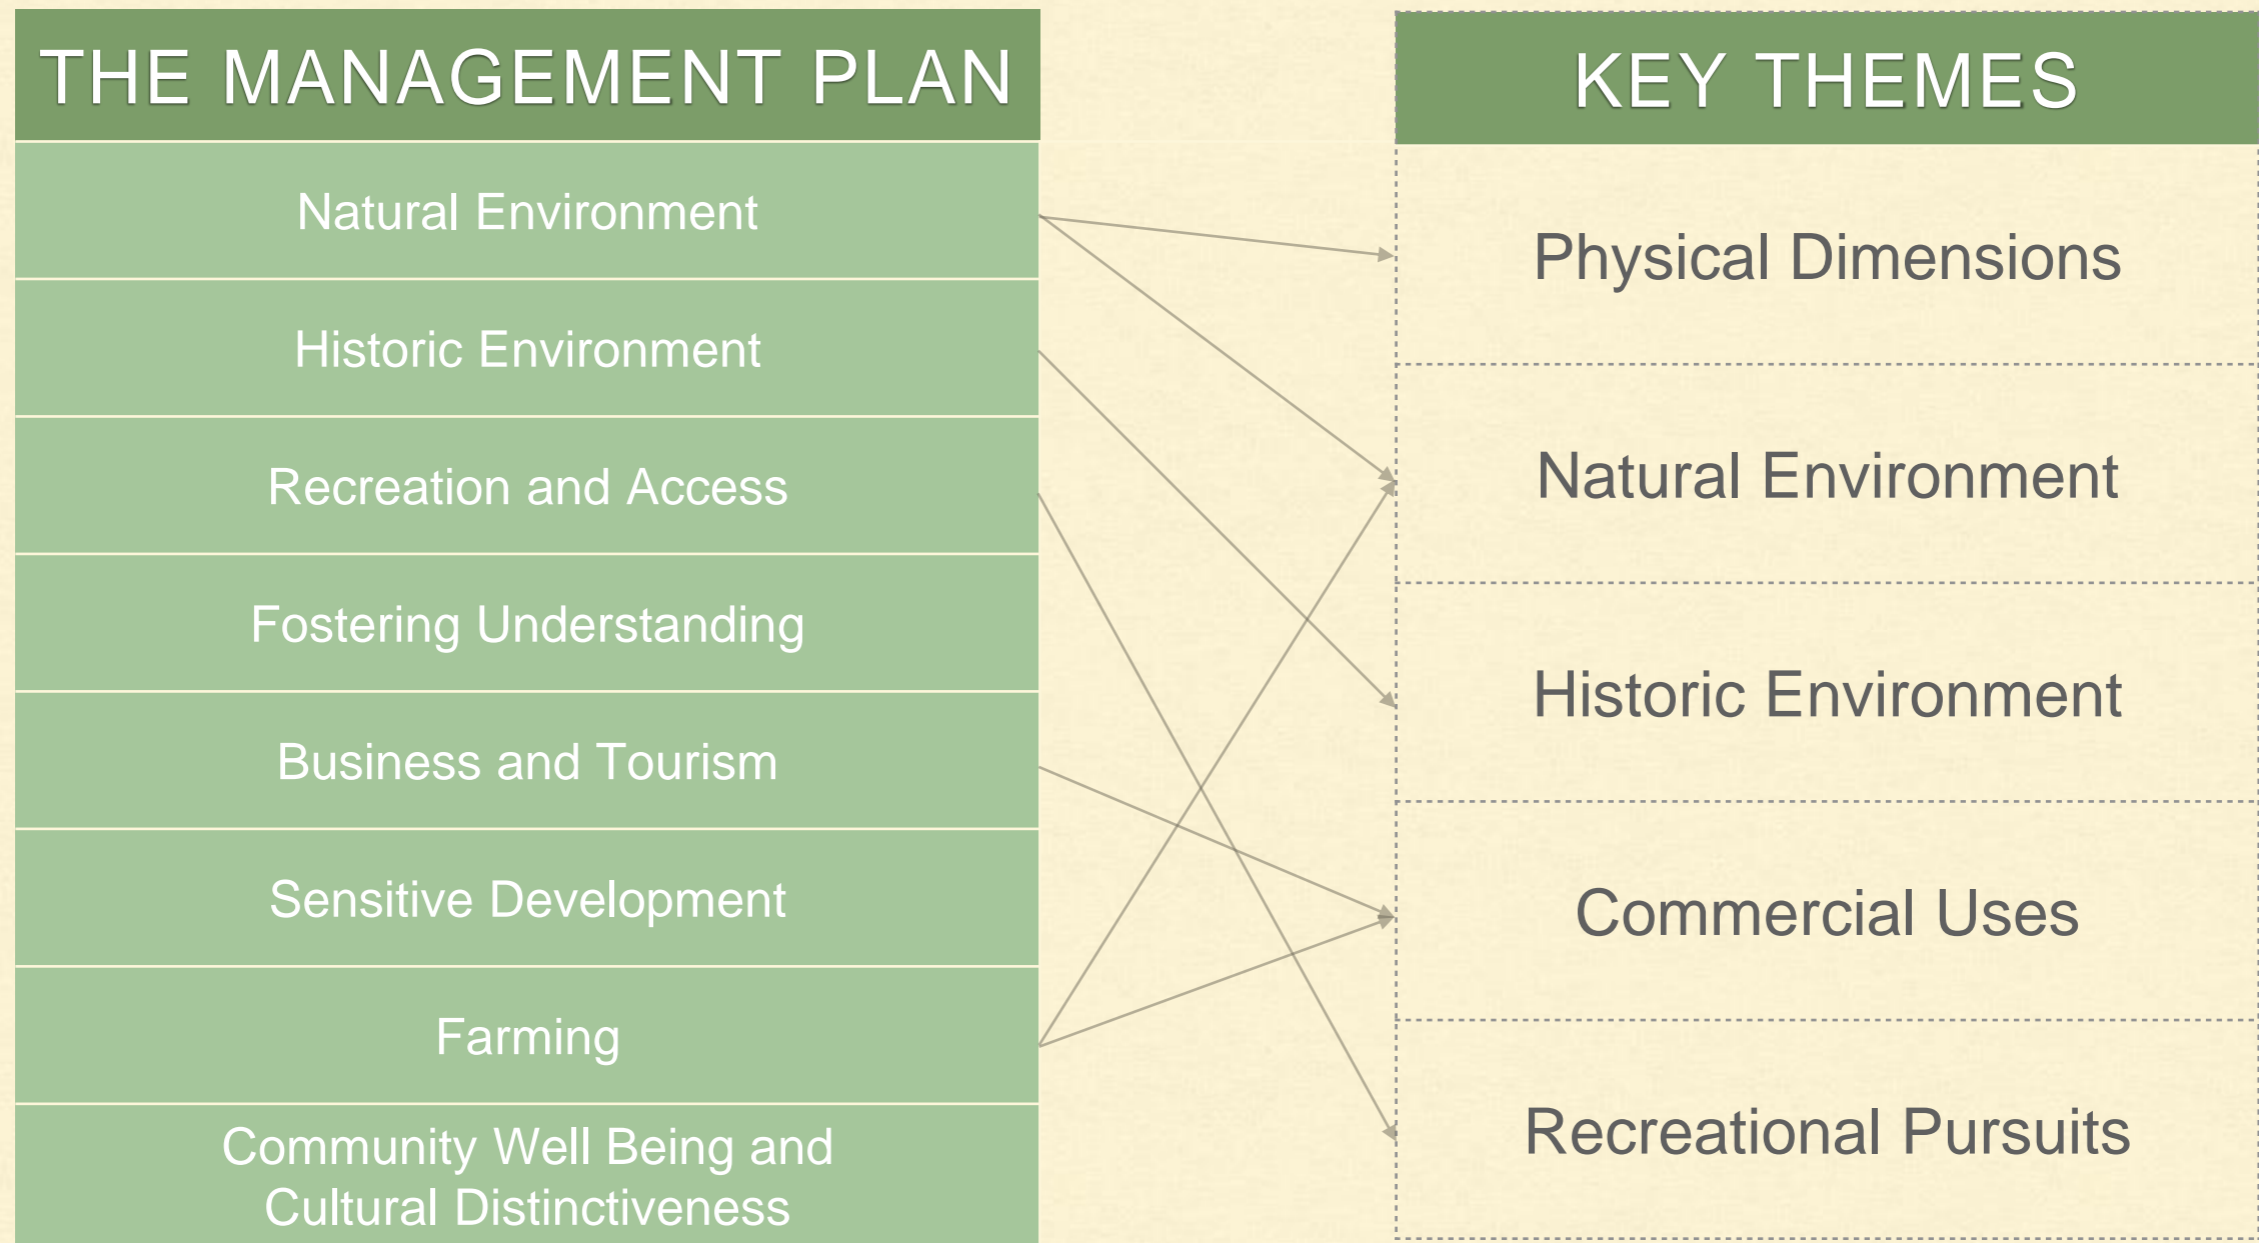

Remit

To collate existing information about the key aspects of the CNP from multiple sources. The aim is then to take this baseline information forward and use it to raise the profile of the CNP and its value for Jersey.

Map of the Coastal National Park (CNP) from the Island Plan 2011

THEMES

Here are the categories from the Draft Management Plan for the Coastal National Park.

These were condensed down into these key themes.

We would like to know specific information about each theme.

PROGRESS SO FAR

Met with the following stakeholders:

- Jersey Tourism
- Durrell
- Department of the Environment

Gathered information from them and used that to fill out some of the cells in the document opposite.

Information Gathering

Theme	Fact/knowledge	Source of Information	Information Gathered
Physical Dimensions	Total Area	States of Jersey [0], Dept Environment	The CNP encompasses 19.25km ² of Jersey's main island.
	Fractional area of Jersey in the CNP	States of Jersey SU [1]	The land area of Jersey is 119.6km ² . Using this, in conjunction with the total area of the CNP, the CNP occupies 16.1% of the land area of Jersey.
	Percentage of Coast in the CNP	The Idea Works, Dept Environment, National Trust, Jersey Tourism	Jersey's coast is 43 miles long[2]. Jersey's coast, much of it in the CNP, has one of the biggest tidal ranges in the world. 40ft/12m.
	How far the CNP extends inland as a straight line distance from the coast	Dept Environment, The Idea Works, States of Jersey	
	Minimum distance to English/French coasts	Dept Environment, The Idea Works, States of Jersey	
	Area of land under different ownership – private, public, National Trust?	Dept Environment, The Idea Works, National Trust, States of Jersey SU	
	Which parishes contain the CNP?	DIY	8 of the 12 parishes. They are: St Brelade, St Peter, St Ouen, St Mary, St John, Trinity, St Martin and Grouville.
Natural Environment	Habitat types captured within the CNP - list of - proportion of each type	National Trust, Durrell	Heathland, gorseland, sand dunes, reed-beds, forest, meadow, marsh, pond, reservoir, gardens, coastline, woods, beaches, bays, farmland, wetlands, offshore reefs and islands.
	Topology	Dept Environment, States of Jersey, SRTM, National Trust	Generally increasing height from south to north. Cliffs along the north coast. Deep sided valleys running north to south of the island. Flat farmland inland. Wide open beach to the east with undulating sand dunes. Rocky headlands in the south west. The CNP includes Jersey's highest point - Les Platons - with a height of 143m above sea-level[2].
	Geology	Dept Environment, States of Jersey, Jersey Tourism, SRTM, National Trust	South west is almost entirely granite. This hard igneous rock has been used for building material for everything from castles to farmhouses to walling along island lanes. The soil is usually acidic, except where sea sand has blown onto it and laid down with crushed shells to provided a more basic soil.

NEXT STAGE

- Work with the Department of the Environment on the GIS maps
 - Make contact with other stakeholders, learn what information they have and then acquire the key information
-
