

Jersey Marine Spatial Plan

Seascape character.....	SC1	Wreck sites.....	CH7
Marine landmarks.....	SC2	Intangible cultural heritage.....	CH8
Planned and Current No Take Zones.....	NB1	Inshore speed limits.....	RT1
Ramsar Sites.....	NB2	Multi-use recreation areas.....	RT2
Intertidal Sites of Special Interest.....	NB3	Access to the marine environment.....	RT3
Priority areas for designation as Areas of Special Protection.....	NB4	Parking on beaches and slipways.....	RT4
Planned Marine Protected Areas.....	NB5	Regulations regarding dogs on beaches.....	RT5
Seagrass Habitat Management Areas.....	NB6	Increasing public education and awareness.....	RT6
Marine Environment Visitor Centre.....	NB7	Management plans for offshore reefs.....	RT7
Planned Fishing Zones (see detail below).....	FA1	Coastal defences.....	IT1
Potting and netting equipment.....	FA2	Protection of submarine cables.....	IT2
Aquaculture.....	FA3	Seawater quality monitoring sites.....	IT3
Phytoplankton.....	FA4	Utility scale offshore wind generation.....	IT4
Sustainable fishing.....	FA5	Tidal power.....	IT5
Coastal structures.....	CH1	FEPA offshore deposition area.....	IT6
Military heritage sites.....	CH2	Harbours, moorings and associated infrastructure.....	IT7
Coastline adjacent to prehistoric coastal sites.....	CH3	Boat passages.....	IT8
Intertidal archaeology.....	CH4	Anchorage.....	IT9
Submerged landscapes survey.....	CH5	Maritime Hub.....	IT10
Culturally-significant navigation markers.....	CH6		

December 2024

The vision of the Jersey Marine Spatial Plan (JMSP) is for a thriving marine environment providing environmental, economic, cultural and social benefits. It was proposed in the 2022 Bridging Island Plan, and has four key purposes:

1. To organise human and marine resources and activities in Jersey's territorial waters.
2. To develop a network of Marine Protected Areas.
3. To inform the policies of the next iteration of the Island Plan.
4. To support co-ordinated development and decision-making on all aspects affecting the marine environment.

Currently 6.5% of Jersey waters are protected by MPAs. The Marine Spatial Plan will help Jersey to fulfil its international obligations, such as the 2022 Kunming-Montreal Global Biodiversity Framework, which requires 30% of the marine environment to be protected by 2030. It will also contribute to efforts to address the climate and biodiversity crises; help to promote sustainable fishing practices; reduce conflicts between different users of the marine environment, and increase resilience of services and infrastructure.

This map lists the Priorities that are described in the Marine Spatial Plan and shows many important locations and zones. The map key includes Priorities that are not mapped to provide a quick reference. For further evidence and detail please visit the JMSP web page where you can download the Priorities and Actions Plan and provide your comments on the draft.

Planned Fishing Zones - FA1

- Planned Fishing Zone A: Regulated Fishing Zone
- Planned Fishing Zone A: Seasonal Restriction
- Planned Fishing Zone B: Seabed Protection Zone
- Planned Fishing Zone B: Phased Protection Zone
- Planned Fishing Zone C: No Take Zone
