Registered Actively Seeking Work April 2015

Statistics Unit: www.gov.je/statistics

Summary

On 30 April 2015:

- on a <u>seasonally adjusted</u>¹ basis, the total number of people registered as actively seeking work (ASW) was²:
 - 30 lower than the previous month (March 2015);
 - essentially unchanged from the average (mean) for the preceding three months;
- the non-seasonally adjusted ASW total was 1,390; this total is 170 lower than the previous month (March 2015); 220 lower than twelve months earlier (April 2014); and was the lowest number recorded for more than three and a half years (September 2011);
- long-term ASW (registered for more than twelve months) accounted for around one in seven (14%)
 of total ASW, and was the lowest number recorded for four years (April 2011);
- 160 teenagers (aged 16-19 years) were registered as ASW, 30 fewer than the previous month (March 2015) and 50 fewer than twelve months earlier (April 2014);
- most age groups recorded small decreases of around 10 to 20 individuals in the number of people registered as ASW compared with the previous month (March 2015); in contrast, a small increase was seen for the 50-54 years age group.

Introduction

Data on people registered as actively seeking work in Jersey is compiled and administered by the Social Security Department. The Statistics Unit independently analyses this anonymised data and publishes a monthly report.

When interpreting the numbers presented, it should be noted that there is no legal requirement for unemployed residents of Jersey to register as actively seeking work (ASW) with the Social Security Department. The numbers shown constitute an informative set of indicators demonstrating the level of individuals actively seeking work in the Island at a given point in time.

The internationally comparable unemployment rate (as defined by the International Labour Organisation, ILO) includes people who are registered and also those who are not registered as unemployed and seeking work. The ILO unemployment rate for Jersey is measured by the Annual Social Survey and the Census; in recent years, the ILO unemployment rate for Jersey has been:

- 4.7% in March 2011, measured by the 2011 Jersey Census; this unemployment rate corresponded to 2,570 people being unemployed and looking for work in March 2011;
- 5.7% in June 2013, measured by the 2013 Jersey Annual Social Survey; this unemployment rate corresponded to 3,200 people being unemployed and looking for work in June 2013;
- 4.6% in June 2014, measured by the 2014 Jersey Annual Social Survey; this unemployment rate corresponded to 2,800 people being unemployed and looking for work in June 2014.

¹ Seasonal adjustment is a statistical technique which enables examination of the underlying behaviour in a series of data by removing variations associated with the time of year, e.g. Christmas, Easter, academic year.

² ASW numbers presented in this report are rounded independently to the nearest 10.

Registered Actively Seeking Work

On 30 April 2015, 1,390 people were registered with the Social Security Department as actively seeking work (ASW). Just over three-quarters (76%) of individuals registered as ASW on this date (corresponding to 1,060 people) were receiving Income Support³.

Figure 1 shows the total number of people registered as ASW at the end of each month since April 2010 (monthly data are shown in the <u>Appendix</u>). The total number registered in April 2015 was 170 lower than in the previous month (March 2015); 220 lower than twelve months earlier (April 2014); and was the lowest number recorded for more than three and a half years (since September 2011).

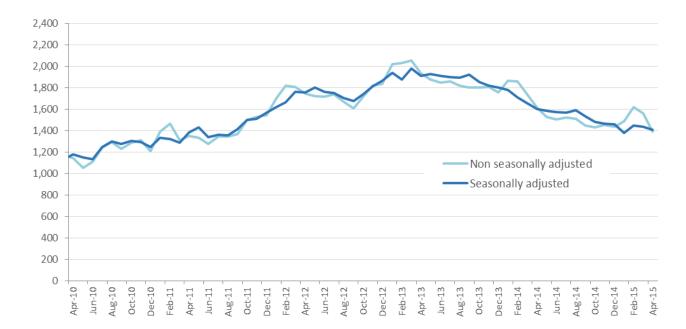

Figure 1 – Total number of individuals registered as ASW, Apr 2010 – Apr 2015

The seasonally adjusted series of the total registered as ASW, in which seasonal and calendar effects are removed, is also shown on Figure 1. From this perspective, the total number of people registered as ASW in Jersey in April 2015 was:

- 30 lower from the previous month, March 2015;
- similar (10 lower) to the average (mean) for the preceding three-month period, January 2015 to March 2015;
- 190 lower than a year earlier, April 2014.

It should be noted that an increase was seen in both the seasonally adjusted and non-seasonally adjusted ASW totals in February 2015 compared with January 2015 due predominantly to a change in the Income Support criterion relating to Long-Term Incapacity Allowance (LTIA)⁴.

³ The total number of adults receiving Income Support and not working will be greater than this figure, which represents the number of people receiving Income Support who were registered as ASW on 30 April 2015.

⁴ On 23 February 2015 the threshold for the cumulative LTIA percentage rate was increased from 35% to 40%; members of an Income Support claim below the threshold are required to seek employment. Raising the LTIA threshold resulted in an additional 90 individuals being registered as ASW at the end of February 2015 compared with the previous month.

Registered ASW by age

On 30 April 2015, a fifth (20%) of people registered as ASW were under 25 years of age (280 individuals); around one in nine (12%) of the total were teenagers, aged 16-19 years (160 individuals).

Figure 2 shows the numbers registered as ASW by age of individuals in each of the last six months, from November 2014 to April 2015.

In the latest month, most age groups recorded decreases of around 20 individuals in the number of people registered as ASW compared with the previous month (March 2015). In contrast, a small increase of 10 persons was seen for the 50-54 years age group.

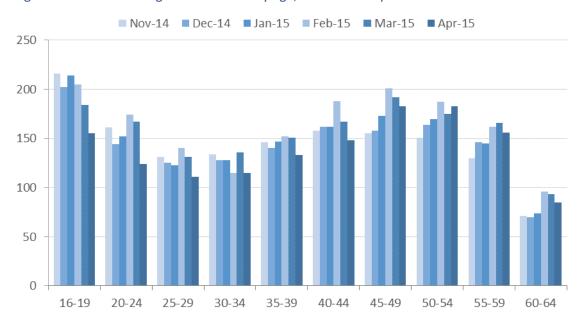

Figure 2 – Individuals registered as ASW by age, Nov 2014 – Apr 2015

Figure 3 shows the age distribution for people below 25 years of age who were registered as ASW in the latest six months, from November 2014 to April 2015.

Of those people registered as ASW at the end of April 2015, 90 were on the Advance to Work scheme.

160 teenagers (aged 16-19 years) were registered as ASW at the end of April 2015, around 30 fewer than the previous month (March 2015) and 50 fewer than twelve months earlier (April 2014).

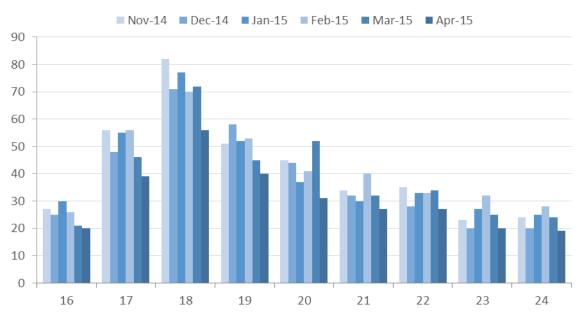

Figure 3 – Individuals under the age of 25 registered as ASW, Nov 2014 – Apr 2015

ASW duration

Over two fifths (43%) of all people registered as ASW on 30 April 2015 had been registered for three months or fewer – see Figure 4.

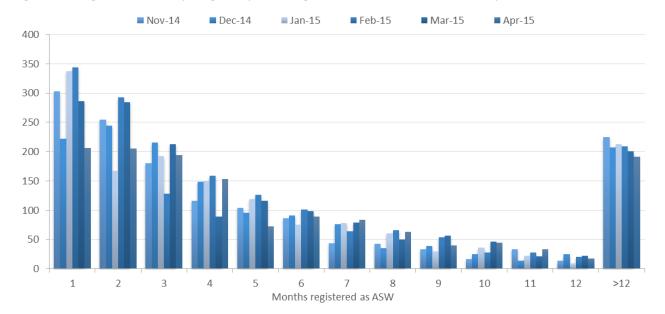

Figure 4 – Registered ASW by length of period registered (months), Nov 2014 – Apr 2015

The number of new registrations in April 2015 (210 people) was 80 fewer than that recorded in the previous month (March 2015).

Long-term ASW

On 30 April 2015, there were 190 people who had been registered as ASW for more than twelve months, accounting for around one in seven (14%) of the total ASW.

The latest number of long-term ASW was around 10 fewer than in each of the previous two months, and was the lowest number recorded for four years, since April 2011 - see Figure 5.

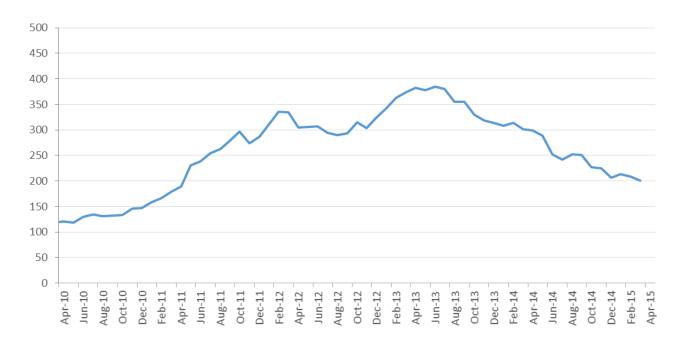

Figure 6 shows the age distribution of the long-term ASW in April 2014 and April 2015. All age groups have seen falls in the number of long-term ASW during the past twelve months, except for the 35-39 years old age group which has remained relatively unchanged.

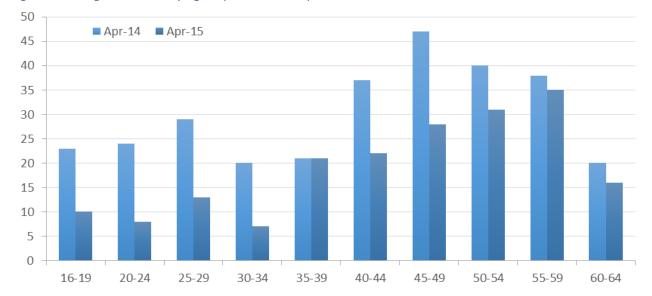

Figure 6 – Long-term ASW by age, Apr 2014 and Apr 2015

Registered ASW by Nationality

On 30 April 2015, almost four-fifths (79%) of people registered as ASW were of British/Jersey nationality⁵; there was a decrease of 120 such individuals compared with the previous month.

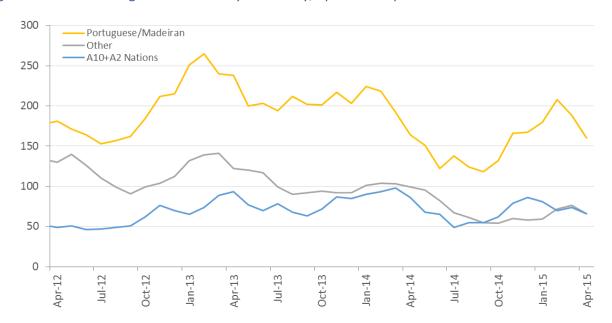

Figure 7 – Individuals registered as ASW by nationality, Apr 2012 – Apr 2015

On 30 April 2015 there were:

- 160 individuals of Portuguese/Madeiran nationality registered as ASW, 30 fewer than the previous month (March 2015) and a similar number to that in the corresponding month of 2014;
- 70 individuals from the EU Accession (A10+A2)⁶ nations were registered as ASW, 10 fewer than the previous month (March 2015) and 20 fewer than in the corresponding month of 2014.

⁵ Nationality recorded by the Social Security Department for the purpose of registering as ASW is self-reported.

⁶ The twelve countries which joined ("gained accession to") the European Union in May 2004 (Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia) and January 2007 (Bulgaria and Romania).

Industry

Individuals working in some industries of the economy, notably in the Finance sector, often seek employment through private agencies and do not register with the Social Security Department. Such industries will, therefore, tend to be under-represented in the ASW numbers.

The last industry of employment was recorded for around nine out of ten people registered as ASW on 30 April 2015:

- a fifth (22%) were previously employed in 'Retail and Wholesale, Motor repairs and sales';
- a sixth (17%) were previously employed in 'Miscellaneous professional & domestic services';
- 15% were previously employed in 'Banking, Miscellaneous Insurance, Finance and Business;
- 13% were previously employed in 'Hotels, restaurants, pubs and clubs'.

Notes

The number of people registered as ASW includes people who are on the Advance to Work, Advance Plus and Work Right schemes. The ASW total will also include individuals who are working fewer than the 35 hours per week required under the terms of Income Support (see <u>Annex</u>); such individuals will simultaneously be working and registered as actively seeking work.

When placing the figures contained in this report in a longer term historical context it should be recognised that there have been significant changes in the criteria relating to registered ASW in Jersey in recent years. In particular, the introduction of Income Support in 2008 led to greater numbers of individuals who were actively seeking work being included in the registered figures.

People who are registered as actively seeking work receive the support of one of the government employment schemes which come under the administration of Back to Work:

- Advance to Work for jobseekers aged 16 19 years;
- Advance Plus for jobseekers aged 20 65 years with an industry-specific interest;
- Work Right for jobseekers with barriers to employment or who have been registered as ASW for 52 weeks or longer;
- Work Zone for registered jobseekers who are closer to employment;
- Ready for Work for newly registered jobseekers or jobseekers without a dedicated advisor.

In addition to the development and expansion of these schemes, Back to Work is responsible for:

- the Employment Grant, Hospitality Incentive and Youth Incentive;
- a dedicated Employer Engagement team;
- industry and employer specific initiatives.

The aim of Back to Work is to increase access to job opportunities for locally qualified people who are registered as actively seeking work by supporting jobseekers and building a partnership with employers to provide sustainable job opportunities.

Statistics Unit 11 May 2015

ASW registered underemployment

Individuals who are working fewer hours than they would like or who would like to change their current working situation are classified as <u>underemployed</u>. The International Labour Organisation (ILO) provides two definitions of underemployment⁷:

- time related underemployed, which is due to insufficient hours of work;
- *inadequate employment situations*, which are due to other limitations in the labour market which limit the capacities and well-being of workers.

In Jersey, individuals who are in receipt of Income Support are required to work at least 35 hours per week, unless exempt from full-time work; those who do not meet this requirement must register as Actively Seeking Work. Hence, the ASW total figure includes individuals who are working less than the 35 hours per week required under the terms of Income Support. The number of ASW registered underemployed also includes individuals who are on the Foundations programme and engaged in paid work of 30 hours per week; in April 2015 there were 40 such individuals. Both sets of employed individuals will simultaneously be working and actively seeking work, and are classified as underemployed under the ILO definition of *time related underemployment*.

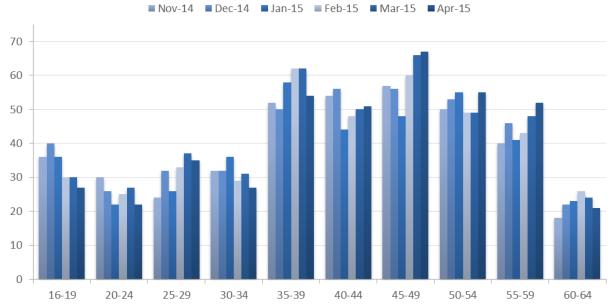

In April 2015, almost three in ten (29%) of all people registered as ASW were underemployed, meaning that they were working less than 35 hours per week and were actively seeking more work. The numbers of such individuals in each of the last twelve months are shown in Table A1.

Table A1 – Number of ASW registered underemployed, Apr 2014 – Apr 2015

	Apr- 14	May - 14	Jun- 14	Jul- 14	Aug- 14	Sep- 14	Oct- 14	Nov- 14	Dec- 14	Jan- 15	Feb- 15	Mar- 15	Apr- 15
Individuals	370	380	350	360	360	360	370	390	410	390	410	420	410
Percentage of total ASW	23%	25%	23%	24%	24%	25%	26%	27%	28%	26%	25%	27%	29%

Figure A1 shows the age distribution of people registered as ASW underemployed; nearly half (47%) were aged 45 years or over.

Figure A1 - Age distribution of ASW registered underemployed, Nov 2014 - Apr 2015

Of those people who were registered as ASW underemployed in April 2015: almost two thirds (64%) were female; three in ten (29%) had been actively seeking work for more than a year; and almost nine out of ten (87%) were claiming Income Support.
