

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 5 Free-Text Responses

UserID	Q5. How important is it to you that we take actions to reduce Jersey's greenhouse gas emissions in response to the climate emergency?	Please tell us about any priorities or concerns you might have for how Jersey responds to the climate emergency as a whole. Please avoid sharing any personal details.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
286585526	Very important	no clue but i have a feeling its bad	1
286586015	Quite important	it could cause sea levels are rising	1
286586031	Very important	because as the tempture rises daffidils are coming out in december	1
286604652	Unsure	We should encourage more eco friendly travel like walking or cycling instead of driving	1
286610265	Quite important	the fact that France have control over most energy on the island and they can shut it off	1
286661059	Unsure	idk	1
286706838	Quite important	I'd just like to make sure it's priced well for accessibility to all families/people	1
289157698	Quite important	It's pretty decent, because legitimately replacing electric cars for fuel cars is somewhat not a good thing, as electric cars don't last long and they can't drive very far unlike fuel cars. I understand the concerns of fuel cars raising greenhouse gases, but I think hybrid cars are going to be the next future version of cars in Jersey.	1
289157752	Quite important	Jersey should take the climate emergency seriously by cutting pollution and preparing for problems like rising sea levels and more extreme weather. This means using more clean energy, making buildings more energy efficient, and reducing the use of petrol and diesel cars in ways that are fair and affordable. Protecting nature, cutting waste, and supporting local food are also important. Clear plans and honest communication will help make sure climate action benefits everyone on the Island.	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 5 Free-Text Responses

UserID	Q5. How important is it to you that we take actions to reduce Jersey's greenhouse gas emissions in response to the climate emergency?	Please tell us about any priorities or concerns you might have for how Jersey responds to the climate emergency as a whole. Please avoid sharing any personal details.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
289157767	Very important	I think that it is important as an island to try and reduce the emissions that are being released into the atmosphere so electric cars will help to support this. However, the cost is expensive so may be difficult for people to buy.	1
289157845	Very important	I think it is very important to treat the climate emergency as quickly as possible.	1
289157846	Very important	I think it's important for Jersey to protect its climate and I think that it's a good start to start with using electric cars more. I think it's good to promote electric cars, however they might be quite expensive for new car users.	1
289157859	Not important	We think that it is important to reduce our emissions however, electric cars are very expensive and many people in Jersey won't have the money to transition to electric, especially get used to driving an automatic to and electric, most electric cars have a lot of power and fast acceleration which means it could be dangerous to drive.	2
289157900	Unsure	expenses new battery every 5 years mostly automatic	1
289158456	Unsure	there are barely any nice looking electric cars	1
289411315	Very important	Endangering animals lives We will end up struggling to breathe	1
289451250	Unsure	Get a wind farm for the future.	1
289452568	Very important	Nothing	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 5 Free-Text Responses

UserID	Q5. How important is it to you that we take actions to reduce Jersey's greenhouse gas emissions in response to the climate emergency?	Please tell us about any priorities or concerns you might have for how Jersey responds to the climate emergency as a whole. Please avoid sharing any personal details.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
289495674	Quite important	Use solar panels to get sun energy to use in the day time (if it is a clear day) we could also use those little wind mills you know the one that u can build with paper and a twig or a straw and put it in the gound and it spins in stead of building big ones we could build our own by using stuff it will also help by saving materials so we can use them on diferent builds. Thank you if u read this have a goid day and a smilly face:) 😊	1
289500686	Not important	its going to happen anyway. Also jersey is tiny and reducing our greenhouse gases would barley do anything.	1
289523830	Quite important	that all transport such as bikes and cars will all be electric. i feel like that would be really bad cause then all motorsport will go down.	1
289523859	Very important	it may make other countries think and do the same	1
289536265	Very important	To reduce gases and global warming	1
289545169	Quite important	don't rely on france for power instead make our own using wind or solar	1
289607702	Not important	I believe that Jersey's Carbon emissions are relatively low contributing to the global warming problem. I understand that motor vehicles do contribute significantly to climate change but I believe that we should phase out other forms of pollution instead of just cars. E.G. La collete Incinerator.	1
289629815	Unsure	I dont know	0
289687386	Quite important	To obviously stop using fossil fuels and to make sure everyone else is on board with it	1
289815299	Unsure	schools need to be better at recycling and making it a priority especially the containers we get our food in and the plastic water bottles.	1
289828368	Quite important	Banning petroleum Cara's will not solve it I don't think	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 5 Free-Text Responses

UserID	Q5. How important is it to you that we take actions to reduce Jersey's greenhouse gas emissions in response to the climate emergency?	Please tell us about any priorities or concerns you might have for how Jersey responds to the climate emergency as a whole. Please avoid sharing any personal details.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
289838693	Very important	I think Jersey should prioritize getting low carbon emissions and offering more eco friendly ways to do lots of things. I think with the amount of money Jersey has, it will be difficult to stop doing certain things for the environment	1
290042504	Quite important	Priorities: Storms - lack of food not coming in through boats Taxes and costs Sea levels rising Food prices	0
290042504	Quite important	Priorities: Storms - lack of food not coming in through boats Taxes and costs Sea levels rising Food prices	9
290042504	Not important	Priorities: Storms - lack of food not coming in through boats Taxes and costs Sea levels rising Food prices	13
290045325	Quite important	Electric cars could be cheaper / more accessible.	20
290047274	Quite important	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	0
290047274	Quite important	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	9

290047274	Very important	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	3
290047274	Unsure	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	2
290047274	Not important at all	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	3
290047274	Not important	Will taxes be used? Will people be paying to stop climate change? Don't think the gov is that worried - spend £10mill on art - could have been used on this instead.	4
290047619	Very important	How are we going to generate the additional electricity?	0
290047619	Very important	How are we going to generate the additional electricity?	16
290047619	Quite important	How are we going to generate the additional electricity?	4
290047619	Unsure	How are we going to generate the additional electricity?	3
290047619	Not important	How are we going to generate the additional electricity?	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 6 Free-Text Responses

UserID	<p>Q6. It is proposed that SOME petrol and diesel cars should still be able to be imported to Jersey from 2030. (These cars usually have very low mileage or there are only a very small number of them.) These are:</p> <ul style="list-style-type: none"> • Cars already owned by people who are moving to Jersey • Cars over 50 years old • Cars adapted for a driver or passenger with a disability • Cars adapted for special purposes e.g. paramedic cars <p>Do you have any comments or suggestions about which types of petrol and diesel cars that should still be able to be imported to Jersey after 2030? Please avoid sharing personal details in your response.</p>	If this is a group response, approximately how many people contributed to it? (Please enter a number)
286586015	i think we should stop petrol car and go to electric cars so we can slow down climate change	1
286586210	Cars are not the problem.	1
286586031	i dpnt understand	1
286604198	Nope I think they should be allowed but not a lot because we need to get electric cars	1
286604652	I feel that this is a very unrealistic goal and that it would be unpopular amongst the public	1
286610265	i agree with all of these ideas and designer cars should also be allowed	1
286661059	not sure	1
289157845	no	1
289157799	people like teens that are getting a first car with a gear stick	1
289157767	I think that old cars can still come into the island for days like liberation day etc.	1
289157846	I think old or second hand petrol cars should still be used dont get rid of them, but new petrol cars should not be allowed in.	1
289157752	not really	1
289157859	all cars.	2
289157698	Definitely still some fuel cars, because if I got my first car and you could only purchase a fuel car as electric cars are very expensive and not that affordable. Having an electric car is very strenuous to maintain, particularly of charging the car, buying new batteries. Big trucks should also be allowed to be imported, as it allows still ingredients and goods can still be imported through Jersey on Condor Ferry.	1
289158456	i dont want an electric car as they look like a spaceship	1
289157900	all of them but mainly classics that could be a for collecting	1
289451250	No	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 6 Free-Text Responses

UserID	<p>Q6. It is proposed that SOME petrol and diesel cars should still be able to be imported to Jersey from 2030. (These cars usually have very low mileage or there are only a very small number of them.) These are:</p> <ul style="list-style-type: none"> • Cars already owned by people who are moving to Jersey • Cars over 50 years old • Cars adapted for a driver or passenger with a disability • Cars adapted for special purposes e.g. paramedic cars <p>Do you have any comments or suggestions about which types of petrol and diesel cars that should still be able to be imported to Jersey after 2030? Please avoid sharing personal details in your response.</p>	<p>If this is a group response, approximately how many people contributed to it? (Please enter a number)</p>
289452568	I think they should still be imported as electrical ones have no sound so are a danger to some road users.	1
289453355	every car	1
289495674	I think we could use solar panels cars	1
289500686	I think that electric cars is a very bad idea because all the the dead batteries that go in the cars go to waste and those liquids in the batteries go in the soil which make the plants die.	1
289504610	It's good for the environment	1
289504919	low emmisioned cars	1
289523859	emergency service vehicles	1
289523830	i dont think jersey should stop importing petrol and diesel cars.	1
289545169	Don't completely ban or stop importing hybrid cars because they are very efficient economic and very liked by the car community and they infact create less emissions compared to electrics because of the manufacturing process.	1
289629815	I dont know	0
289646452	They should be aloud all none tsken away	1
289670203	Ones that are quite new or in good condition	1
289687386	I think that hybrid cars should still be allowed to be imported to the island after 2030 as they also have electric	1
289688570	super cars and hyper cars shall still be imported as who doesnt love a little fun	1
289819400	Electric cars are worse then petrol cause what's in the batteries and electric cars are boring	1
289828368	All just limit number per famaly perhaps from how many parking spaces are in there home	1
289831976	Emergency services	1
289848225	maybe let petrol and diesel cars be able to be bought for a bit longer	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 6 Free-Text Responses

UserID	<p>Q6. It is proposed that SOME petrol and diesel cars should still be able to be imported to Jersey from 2030. (These cars usually have very low mileage or there are only a very small number of them.) These are:</p> <ul style="list-style-type: none"> • Cars already owned by people who are moving to Jersey • Cars over 50 years old • Cars adapted for a driver or passenger with a disability • Cars adapted for special purposes e.g. paramedic cars <p>Do you have any comments or suggestions about which types of petrol and diesel cars that should still be able to be imported to Jersey after 2030? Please avoid sharing personal details in your response.</p>	<p>If this is a group response, approximately how many people contributed to it? (Please enter a number)</p>
289849285	i dont think we should be stopping the importa of petrol and diesel cars when we arent an enormous polluter.	1
290041887	Students generally agree with the exemptions.	23
290042504	<p>Will petrol prices rise? Can this cause problems.</p> <p>What will garages sell?</p> <p>Racing cars / rally cars - are these exempt?</p>	22
290044027	<p>Hybrid cars still allowed - battery cars still ok!</p> <p>Not much emissions from these!</p>	21
290044794	Sound of the existing cars is preferred. Certain models if rare (e.g. the very expensive models)	17
290045325	Should be allowed due to costs issues.	20
290047274	<p>Construction - lorries</p> <p>Sports cars</p>	21
290047619	Cars specific for the disabled, old cars, war vehicles - parades, emergency services.	24

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 7 Free-Text Responses

UserID	Q7. How do you think you and your family/families will be affected by the phase-out of petrol and diesel vehicles from 2030?	If you wish to, please explain the reasons for your response above. Please avoid sharing personal details in your response.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
286586015	Both positively and negatively	so we can save animals and the air	1
286586031	Very positively	we are so use to use it i will be a big diffrence if we dont use it	1
286586120	Very negatively	they always drive	1
286604652	Both positively and negatively	Electric vehicles are very expensive and do not last as long as petrol or diesel cars and ferries do not allow electric vehicles onboard	1
286661059	Both positively and negatively	idk	1
289157698	Not at all	My mum has a £70,000 electric car that's an electric Jaguar and it will not affect us as we already have a electric car, and we have our own charger for our electric car and she charges it every night.	1
289157752	Positively	i already have 2 hybrid cars	1
289157799	Both positively and negatively	some people may not like it but some will	1
289157859	Very negatively	too expensive	2
289157924	Negatively	electric cars cost to much and don't last long enough	1
289158456	Negatively	i want a petrol car	1
289411315	Both positively and negatively	Electric vehicles are more expensive than diesel and petrol cars and some people don't have the money to buy an electric vehicle	1
289451250	Both positively and negatively	We own a petrol car, but it will be postive to fuse out greenhouse gases.	1
289452568	Both positively and negatively	Some people do not have the money to switch cars, and if they need a repair to there petrol cars it will be hard to get the parts and probably expensive.	1
289453355	Negatively	because most families in jersey use petrol or diesel cars	1
289486702	Both positively and negatively	because if we use eltrical cars it could be better for the Enviroment but its hard to hear so it could cause car crash's and it will cost money just to get another car	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 7 Free-Text Responses

UserID	Q7. How do you think you and your family/families will be affected by the phase-out of petrol and diesel vehicles from 2030?	If you wish to, please explain the reasons for your response above. Please avoid sharing personal details in your response.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
289495674	Positively	My mum and dad use a petrol and desel cars	1
289500686	Very negatively	Because petrol cars can last longer then electric cars and every hour you have to charge your electric car.	1
289504919	Very negatively	my family currently own 2 diesel cars and one unleaded car	1
289523830	Negatively	electric are bad,expensive,harder to run.	1
289523859	Both positively and negatively	dads job includes petroleum and diesel cars	1
289525947	Not at all	Because I don't really care about it	1
289545169	Negatively	mum drives a petrol powered toyota auris and can't afford an electric car my dad drives a hybrid toyota prius	1
289589526	Both positively and negatively	it will cost more	1
289607702	Very negatively	I believe that me, my family, and my work colleagues will all be negatively impacted by this petrol and diesel ban. My parents & co workers often use diesel vehicles for commercial purposes, (lorry's for scaffolding, tractors for pulling boats, hoist for lifting boats, diesel emergency maintenance van.)	1
289646452	Negatively	Do not take them away	1
289687386	Negatively	It will be expensive to buy a new car and even more expensive as it is electric	1
289688570	Both positively and negatively	dad owns an electric car already but i will have to buy used when i pass my driving test	1
289815299	Negatively	We have a petrol vehicle and we will not be able to transition to electric or hyrid without support from the government.	1
289819400	Negatively	No one I know likes electric cars	1
289847221	Both positively and negatively	Well, you would have to start worrying about charging your car and finding electric car plugs to charge when you're not driving.	1

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 7 Free-Text Responses

UserID	Q7. How do you think you and your family/families will be affected by the phase-out of petrol and diesel vehicles from 2030?	If you wish to, please explain the reasons for your response above. Please avoid sharing personal details in your response.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
290041887	Very positively	Students spoke about wanting better air quality, especially in St Helier. Some of them are currently woken by traffic noise outside their homes at night. Some thought that silent electric cars would be a good thing.	23
290042504	Both positively and negatively	Positive - keeping cars - population decrease Negative - money / cost help by the Government big families need more cars Super negative - buried electric batteries are bad pos + neg - less fumes is good, cost of cars bad Negative - cost, old car collectors / shows will be a problem.	0
290042504	Very positively	Positive - keeping cars - population decrease	4
290042504	Both positively and negatively	pos + neg - less fumes is good, cost of cars bad	10
290042504	Negatively	Negative - cost, old car collectors / shows will be a problem. Negative - money / cost help by the Government big families need more cars	4
290042504	Very negatively	Super negative - buried electric batteries are bad	4
290044027	Both positively and negatively	Positive - would become a better place, environment positive, electric could be cheaper Negative - charge is different	21
290044794	Both positively and negatively	Depends if current car can be traded for electrical.	7
290044794	Very positively	Depends if current car can be traded for electrical.	1
290044794	Positively	Depends if current car can be traded for electrical.	4
290044794	Not at all	Depends if current car can be traded for electrical.	3
290044794	Very negatively	Depends if current car can be traded for electrical.	2
290045325	Both positively and negatively	Students are worries about cost implications, but do see it generally as a good idea.	20

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 7 Free-Text Responses

UserID	Q7. How do you think you and your family/families will be affected by the phase-out of petrol and diesel vehicles from 2030?	If you wish to, please explain the reasons for your response above. Please avoid sharing personal details in your response.	If this is a group response, approximately how many people contributed to it? (Please enter a number)
290047274	Negatively	Driving instructor - not the same to teach. Don't have gears. All automatic?	8
290047274	Very negatively	Driving instructor - not the same to teach. Don't have gears. All automatic?	3
290047274	Both positively and negatively	Driving instructor - not the same to teach. Don't have gears. All automatic?	6
290047274	Not at all	Driving instructor - not the same to teach. Don't have gears. All automatic?	2

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 8 Free-Text Responses

UserID	If this is a group response, approximately how many people contributed to it? (Please enter a number)	Q8. What would you like to say to decision makers in Government about the plans to phase-out petrol and diesel vehicles from 2030? Please include comments, questions, requests, concerns or benefits you want to mention. Please avoid sharing personal details in your response.
286661059	1	hello
289157752	1	not really sure
289607702	1	I believe that this ban is quite ineffective due to the amount of people that still use fossil fuel vehicles, and will need to import them for generations to come! Questions: Will this fossil fuel vehicle ban be in affect for commercial vehicles? Will this affect local businesses? (E.G. Farms, fishermen, towage companies, rescue services, fire department, coastguard, and many more!) Comments: I believe that this ban will ruin culture of the most beloved car scene: Jersey International Motoring Festival & the Jersey International. Rally
289828368	1	It's not going to stop climate change
289848225	1	see what people think about it and if so maybe adjust it a bit
290044027	21	Are you going to keep importing petrol and diesel into the island after 2030 and 2025? What is the point? Is it that harmful? Can Jersey make a difference? Boats and planes? Will they be charges? Could solar panels be added to cars to help charge them? Is there a scrapping scheme to get rid of the cars? Where will they go? Diesel cars stopped [illegible]
290044794	17	Keep the petrol pump. More charging points esp residential area. Will tourists be able to bring their petrol cars in. Build residential car parks under the buildings with charging points. Make electric cars louder.

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 8 Free-Text Responses

UserID	If this is a group response, approximately how many people contributed to it? (Please enter a number)	Q8. What would you like to say to decision makers in Government about the plans to phase-out petrol and diesel vehicles from 2030? Please include comments, questions, requests, concerns or benefits you want to mention. Please avoid sharing personal details in your response.
290047274	21	Comment from before. Generally don't think it's priority or think it'll affect negatively. Not enough chargers.

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 9 Free-Text Responses

UserID	If this is a group response, approximately how many people contributed to it? (Please enter a number)	Q9. What is your vision for the future of transport in Jersey? This might include the different ways people will travel around the Island, what types of vehicles they might use, the forms of active travel they take part in, or how much people will travel and how much it should cost. Please avoid sharing personal details in your response.
286604198	1	Maybe the same
286604652	1	More eco friendly transport eg walking or cycling and there should be more routes like the railway path to encourage people to walk/cycle to work instead of driving
286610265	1	i feel like the busses at the moment are the best way forward as they take a lot of cars off the road and can be adapted to make them electric
286661059	1	car
289157845	1	my vision is that there will be little to no petrol cars on the road, providing healthier air and more.
289157799	1	electric car
289157905	1	In the future, I think Jersey may be almost fully running on electric vehicles.
289157767	1	I think it would be good if everyone would travel in electric cars as it would help the environment. I also think that if more buses and other types of transport were to be electric. Also, we can encourage electric bikes, walking, cycling or other ways to reduce the emissions being emitted into the air.
289157846	1	I think that there will be an increased amount of electric cars
289157752	1	make them all electric to make it better for the environment
289157859	2	I believe we should keep it the same as it is.
289157698	1	People will still be driving around in Jersey, however I believe the future of Jersey's transport is that fuel cars should still be continued on being manufactured and used, they're still very useful. A basic electric car should cost £15,000 and not make it very expensive. I think 10,000 people in Jersey will have electric cars, you can't remove all the petrol cars.
289158456	1	don't know
289451250	1	More bus travel. So less people using cars.
289452568	1	Make the island hybrid to give islanders the option
289453355	1	all electric
289486702	1	bicycle or bike
289495674	1	I don't know

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 9 Free-Text Responses

289500686	1	I think jersey should allow every possible car parts and all that stuff.
289504919	1	fuel needs to be cheaper, public transport should be states owned, we should bring back our own states-funded airline like what we did 40 years ago for Jersey European Airways to ensure more reliability and tourism on the island, and the bus service should be more frequent on some routes, e.g the number 8 route.
289523859	1	Bikes, car, bus
289523830	1	make buses electric but not cars and bikes. we could also have electric taxis.
289525947	1	I not very sure
289536265	1	Safe and better invoiment
289545169	1	make the buses not sound like a rock concert on steroids when they accelerate and allow only hybrid or electric cars for main use and petrol cars as exceptions like a first car or a collectors vehicle and keep the cars in like showrooms the petrol one's.
289552965	1	Petrol cars
289594423	1	More good cars and less bad cars
289607702	1	I believe that the bus system in place at the moment is very inefficient, it is always late and the schedules are very messy. If jersey had an affordable rapid transit system I believe most islanders would refrain from driving!
289646452	1	Just put more e buses but take away no petrol cars
289687386	1	To be all electric. However, people should also be using things like bicycles or even walking. I think that electric transport should be cheaper than it is now to about the same price as petrol and diesel transport is now.
289819400	1	Keep petrol and diesel cars
289828368	1	Still petroleum but more public transport
289847221	1	Perhaps because we're a small island more people cycling and walking to work(I understand when it's like raining or bad weather)
289848225	1	eventually we'll only have electric cars but we should slowly start getting there
290041887	23	Much more emphasis should be placed on 'active transport'. The fact remains that there are too many cars on the island (electric or otherwise). Roads are congested. Students feel unsafe walking, scooting or cycling to school. More crossing + cycle paths needed.

2030 Phase-Out of Petrol and Diesel Vehicles – Consultation Report - Appendix 16: Secondary School Survey – Question 9 Free-Text Responses

290042504	22	Buses - electric / uses passes Bike - parking Scooters legal Subways to use / underground Bike trails to be safe Cable cars / bike
290044027	21	Buses should all be electric Prior to cars to show that States are showing by example Is a 100 charging points enough? How long do batteries last - can they be make longer? Where do they get disposed?
290044794	17	1/2 of class feel that petrol / diesel cars should stay. What will happen to motorbikes? More buses / public transport/ Electric fires in vehicles - hard to put out. Electric car batteries are very expensive to replace and run low.
290045325	20	More buses need to be available. Public bike hire for people to use more accessibly.
290047274	21	No comments
290047619	24	Cheaper buses or free More frequent buses Better cycling routes Make electric cars louder.
