

# Annex – Budget 2026-2029

# Introduction

The Budget Financial Annex contains supporting information for the Budget 2026-2029.

The Annex is divided into the following parts:

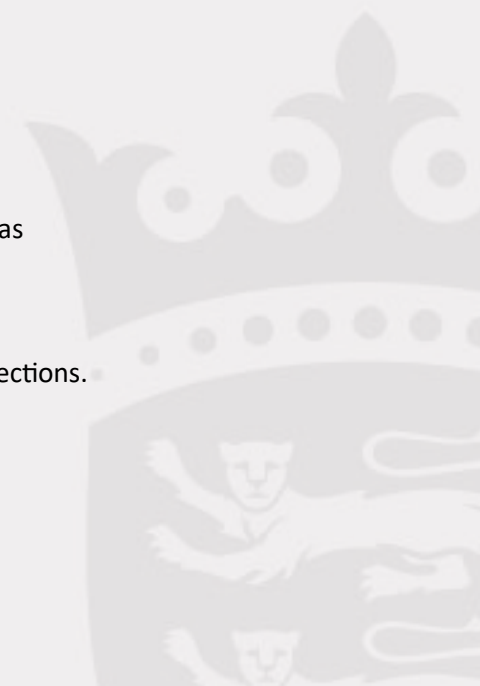

- Part 1 - Supplementary financial tables
- Part 2 – Heads of expenditure financial information

## **Budget 2026-2029 (P.70/2025) as amended**

On 11 December 2025 the States Assembly approved the Budget 2026-2029 as Amended.

This document sets out:

- The final Budget as amended by all amendments agreed by the States Assembly, together with any necessary consequential and minor factual corrections.

<b>Total</b>		<b>4,759</b>	<b>4,759</b>	<b>3,559</b>	<b>3,659</b>

## Summary of Revenue Growth Allocations

### I-ELL-B26-001 Nursery 2 – 3 Year Olds

Further investment has been provided in addition to that allocated in Budget 2025 to deliver a phased introduction of nursery and childcare provision to children aged 2-3 years with additional needs. This additional investment will be used to expand the provision of the Nursery Education Fund (NEF) to include up to 15 hours of Government funded childcare each week, during term time only for 2–3 years olds (pre-NEF year).

Early childhood investment is one of the most effective ways to secure Jersey's future. These early years are vital for learning, development, and wellbeing, influencing lifelong outcomes. Since COVID-19, family circumstances have become more complex, with greater demand for special needs support, rising costs, limited nursery spaces, and workforce pressures. Surveys show many parents struggle to access affordable childcare, affecting family wellbeing and career opportunities. The goal is to provide a universal offer for all 2–3-year-olds from 2026, building on 2025 pilots that successfully extended nursery and childcare to children with additional needs while maintaining quality.

This initiative builds on the existing entitlement of 30 hours per week for 3–4-year-olds and supports Jersey's economic strategy by helping families and attracting and retaining a skilled workforce.

### I-ELL-B26-002 Teachers' Terms and Conditions

This investment supports a key priority for Jersey's education system which is giving teachers the time and support they need to deliver high-quality learning. From 2026, planning, preparation, and assessment (PPA) time will be increased by slightly reducing weekly teaching hours, introduced gradually and requiring the equivalent of up to 23 additional teachers. This forms part of a wider programme to enhance teachers' terms and conditions.

The benefits are significant. More PPA time will enable teachers to tailor lessons to the needs of all learners, including those with special educational needs, raising the overall quality of education. It will also support teacher wellbeing and retention, reduce recruitment pressures, and allow for more flexible working. Most importantly, this investment will help ensure that children and young people continue to benefit from a strong, consistent, and high-performing education system.

<b>Total</b>		<b>7,549</b>	<b>7,887</b>	<b>8,557</b>	<b>8,276</b>

## Summary of Revenue Growth Allocations

### I-C&F-B26-001 Children's Services Improvement Programme

Jersey's Children's Services are at a critical turning point. Despite previous efforts and investment following the 2017 Care Inquiry, the system continues to face serious challenges in delivering safe, effective, and timely support to vulnerable children. The pressures have intensified due to rising demand and increasing complexity. More capacity is needed to effectively support children living at home with their families, particularly for adolescents with complex needs. The children's residential service is under pressure with significant vacancies and a shortage of suitable permanent homes for children. At the same time, there is a shortage of foster families able to care for children. Without urgent action, the system risks failing the very children it is meant to protect. This investment proposal sets out a comprehensive plan to improve Children's Services into a sustainable, high-quality system.

The investment will be used to restructure the Residential Estate and create additional homes for children in the States care. Funding will also be used to recruit and retain skilled staff, including through a new Social Work Academy and revised retention payments. It will expand the Multi-Disciplinary Service, enabling professionals from different fields to work together to support families earlier and more effectively. Additional resources will be directed toward improving case management systems and strengthening foster care. Business administration and training support will also be enhanced to improve efficiency and service quality.

This investment will lead to safer outcomes for children, with more families supported before problems escalate. It will reduce reliance on agency staff, saving money and improving continuity of care. It will create a more stable, skilled workforce and a more responsive, joined-up system. Most importantly, it will ensure that Jersey's most vulnerable children receive the care and support they deserve, when they need it, and in a way that meets their needs. This is not just an investment in services; it is an investment in the future of Jersey's children and families.

## Summary of Revenue Growth Allocations

### I-ESH-B26-001 Supporting islanders and strengthening communities

This project allocates £7 million over the next 4 years to deliver practical support to Islanders while strengthening the community for the future. It focuses on four key areas:

- Supporting parents – Providing cash grants to lower-income families to help cover uniform and equipment costs at the start of the school year, ensuring children return to school confident and well prepared.
- Developing workplace pensions – Investigating and designing a scheme so all workers have the right to contribute to and benefit from an occupational pension, supported by draft legislation.
- Improving inclusion – Funding projects to enhance access to employment, health, education, leisure, and cultural activities for Islanders with long-term health conditions or disabilities, in partnership with community organisations.
- Expanding pensioner healthcare support – Extending the Pension Plus and Health Access Schemes to help more pensioners with GP, dental, optical, and chiropody costs.

Projects will be delivered by government and community partners, with oversight from the Disability Inclusion Group.

<sup>8</sup> The Finance Directorate budget is inclusive of £15.6m structural deficit and healthcare inflation funding for 2026. This budget also includes the recurrent impact of maintaining healthcare standards inflationary funding. The negative income budget of £2.1m relates to an element of the structural deficit funding, as a portion of the 2025 deficit relates to income under-delivery.

## Summary of Revenue Growth Allocations

### I-HCJ-B26-001 Health Deficit

An additional £15.6 million is allocated to Health and Care Jersey (HCJ), on top of the £31 million already included in the Government Plan 2025–2028. This reflects rising demand for services - beyond the anticipated Covid-19 catch-up period - and above inflation increases in the costs of service delivery.

The number of Islanders seeking urgent and specialist care continues to rise, driven by an ageing population and more people living with long-term conditions such as diabetes, cancer and dementia. Advances in diagnostics and treatment are improving outcomes but also adding to demand and cost.

Key cost pressures include rising referrals to UK services, increased use of the Emergency Department, and higher spending on mental health and adult social care placements. External factors such as increasing drug prices, NHS tariff changes, and utility costs also continue to impact health budgets.

To ensure funding keeps pace with these developments, the Government is updating the inflation uplift provided to HCJ. From 2026, this will increase from 2% to 3% above inflation, recognising the global trend of health costs rising faster than general inflation. This change will help address a structural funding gap and support continued service improvement in line with Islanders' needs and expectations

### I-HCJ-B26-002 Preventative Health

An annual £4 million investment has been allocated to Health and Care Jersey (HCJ) for preventative health, addressing the expected rise in chronic illnesses from Jersey's ageing population. By 2043, dementia cases could rise by 52%, heart failure by 42%, and cancer by 21%, affecting almost 2,000 more Islanders. Many of these conditions are preventable as research shows that 40% of cancers, 45% of dementia cases, and up to 80% of type II diabetes, heart disease, and strokes can be avoided through early action and healthier lifestyles.

The Prevention First programme will help Islanders live longer, healthier lives while reducing future pressure on health services. This includes identifying risks earlier through universal health checks and digital tools to detect conditions such as diabetes and heart disease sooner; preventing disease via lifestyle programmes that support weight management, physical activity, nutrition, and mental wellbeing; and diagnosing earlier by expanding bowel cancer screening to ages 50–74 and introducing lung cancer screening.

Investing in prevention offers practical, research-led solutions to reduce illness, improve survival rates, enhance quality of life, and create a sustainable healthcare system for generations to come.

### I-HCJ-B26-003 Digital Health

An annual £8 million investment will fund Jersey's digital health initiative, supporting safe, connected, and modern healthcare for a growing, ageing population. This will ensure the right information is available wherever care is delivered, while giving Islanders secure online access to their records, test results, and appointments, offering greater control over their health.

Phase 1 of this initiative focuses on three priorities:

1. Solid Foundations – Connecting Jersey to key services such as electronic referrals and prescriptions and introducing modern systems so all providers work from the same accurate information.
2. Get Care Connected – Creating a single, secure health record shared across GPs, hospitals, community services, mental health teams, and third-party health and care providers, enabling an island-wide Single Care Record.
3. Get Smart – Using innovative tools to predict and prevent health issues, identify people needing support earlier, and coordinate care effectively supporting the preventative health agenda.

This investment will enhance technology, link systems, migrate data, and train staff to use new tools confidently. Islanders will benefit from safer, more coordinated care, smoother health journeys, more treatment options at home, and secure, easy access to personal health information.

### I-RES-B26-001 Assisted Dying (Held in Reserves)

In 2021, the States Assembly agreed in principle to permit assisted dying (P95/2021). Following extensive public and professional consultation, the Assembly in 2024 requested legislation to enable assisted dying and establish a dedicated service (P18/2024).

This investment will allow the Jersey Assisted Dying Service to be created. Once legislation is adopted, ensuring a safe, compassionate, and well-governed option for Islanders with a terminal illness who wish to have choice at the end of life. Funding will support two phases first the implementation (2026–2027) to recruit and train clinical staff and care navigators, develop professional guidance, protocols, and public information, establish oversight bodies, and create a dedicated space for assisted deaths, and second, service delivery (from summer 2027) to provide eligibility assessments, assisted deaths, and psychological and bereavement support; ensure annual inspections; and maintain robust governance.

The service will complement the separate £3 million ongoing investment in end-of-life and palliative care introduced in 2023, further enhancing choice and dignity for Islanders.

### I-RES-B26-002 HNF – Facilities Management & Clinical Costs (Held in Reserves)

Funding is held in the Central Reserve in 2029 for the additional running costs with the move to the new hospital, including facilities management and clinical costs.

The current Facilities Management cost at Jersey General Hospital will increase from current levels but this is mainly due to the larger size of the new Acute Hospital to accommodate growing demand and the space requirements of modern healthcare design. This investment in new

facilities will, by contrast, stop the need for a considerable investment in the existing General Hospital for backlog maintenance.

Modelling for clinical costs estimates that these will increase from current levels over a period of time because of the increased capacity within the Acute facility and the increasing demands for services arising from demographic factors. Further work will be undertaken to refine these costings in the Full Business Case including a workforce plan to inform the transition to the provision of services at the Acute facility.

<b>Total</b>		<b>852</b>	<b>1,859</b>	<b>1,839</b>	<b>1,841</b>

### Revenue Expenditure Growth

#### I-JHA-B26-001 Vaping Tax

Vaping is on the rise in Jersey, particularly among young people, raising public health concerns. Unlike tobacco and alcohol, vaping liquids currently carry no excise duty. Introducing a new tax will help deter uptake among non-smokers and youth, align regulation with other substances, and generate nearly £1 million annually to support public services.

To deliver this effectively, investment is needed in the Jersey Customs and Immigration Service. Funding will upgrade the CAESAR excise duty system to include vaping products, recruit specialist staff to work with businesses, educate importers, and oversee compliance. It will also support public guidance, signage, and onboarding for vape retailers and potential local producers.

This investment will ensure smooth implementation, fair regulation, and high compliance, with minimal disruption to trade. Islanders will benefit from improved public health, increased revenue for services, and a modern, adaptable excise system ready to respond to future trends.

#### I-JHA-B26-002 Fire and Rescue Services Workforce

Jersey's Fire and Rescue Service operates in a particularly challenging environment, with diverse risks and responsibilities across the Island. While small in scale, the Service continues to adapt to growing demands driven by climate change, building safety risks, and emerging threats such as lithium-ion battery fires.

This investment will strengthen capacity and resilience by increasing frontline firefighter numbers, recruiting key non-uniformed specialists in safety, risk and assurance, upgrading essential operational equipment and IT systems, and sustaining the Emergency Planning Unit at its recently enhanced capacity.

Building on investment in the Government Plan 2023-26, it represents a further step towards achieving a better balance between capacity and risk, better aligning the Service with evolving national standards and the changing risk landscape. Depending on the initial impact of this investment and how risks and demands evolve, further increases to capacity may be necessary in future years to ensure the Service continues to meet emerging challenges effectively.

These improvements will enable faster, safer responses to complex and concurrent emergencies, better protection for firefighters and the public, and improved compliance with professional safety standards. It is a forward-looking investment in public safety and service readiness.

## I-JHA-B26-003 Emergency Services Control Centre (Ambulance and Fire & Rescue)

The Government of Jersey is investing in a hybrid model for the Emergency Services Control Centre to strengthen professional specialisation in emergency call handling.

Emergency services face growing demands and increasing complexity, with reviews showing the need to modernise the current shared control room. Key priorities include strengthening clinical oversight for ambulance calls, improving operational command for fire incidents, expanding staff training, and increasing participation in major incident exercises.

The hybrid model will recruit specialist leaders for fire and ambulance control, train staff in service-specific procedures, and improve governance and oversight to align operations more closely with each service's needs. It will also maintain continuity while options for the longer-term model continue to be assessed.

The Government recognises the importance of strengthening the specialism and capability of the control room, and it will not hesitate to adopt two separate facilities if that ultimately proves necessary. However, a combined approach does offer benefits, including greater efficiency, better coordination across services, enhanced resilience, and cost-effectiveness. In adopting a model that builds overall capability, it is important to respond in a considered way to try retain as many of these benefits as possible, while ensuring that effectiveness is maximised and public safety remains the highest priority.

The impact of these initial additional resources will be carefully reviewed, and the overall model revisited in the future to ensure it continues to provide the right balance of specialisation, resilience, and value for money.

<b>Total</b>		<b>6,940</b>	<b>5,940</b>	<b>7,940</b>	<b>9,940</b>

## Summary of Revenue Growth Allocations

### I-RES-B26-004 Investment in Competitiveness (Held in Reserves)

Jersey's financial services sector has been the engine of our economic growth, proving its resilience against international challengers and weathering major global events. The sector continues to bring jobs and investment to Jersey and provides the building blocks upon which our quality of Island life is built. In 2023 the finance, legal and accounting sectors were collectively worth £3 billion, representing 46% of Jersey's economy. The industry directly provides 14,000 jobs and 40% of tax revenue, with further significant contributions generated indirectly through supply chains, employee spending and business investment in the local economy. This income sustains our community, funds our infrastructure and enables the public services on which Islanders depend. The success of our finance sector is inextricably linked to the success of Jersey as a whole.

Recent global geopolitical shifts are reshaping investment flows, and many competitor jurisdictions are investing heavily in their regulatory and market infrastructure to secure growth. If Jersey fails to act, we risk losing capital, jobs and revenue to better-prepared centres, weakening our economy and eroding the resources available for public services. Investment in our financial services sector and its regulatory environment is therefore essential to protect Jersey's position as a leading International Financial Centre and to safeguard the Island's long-term prosperity.

Investment in competitiveness will focus on modernising Jersey's financial infrastructure to make it easier, faster, and safer for customers to do business. The total investment estimated to be required between 2026 and 2029 is £31m – of which £7m will be required to be invested in 2026. The main elements of this essential investment to improve the business environment and regulatory capabilities, are:

- A next-generation Know Your Client portal which will allow firms to complete due diligence more efficiently while keeping client data secure - £750,000 in 2026
- The extension of the exciting new Revenue Jersey Pillar Two onboarding experience (agent access portal) to all businesses and FS professionals - £4m in 2026
- A modern new company registry will offer quicker, more reliable services, deter financial crime, and enhance Jersey's international standing - £850,000 in 2026
- A new myJFSC portal will provide self-serve tools so firms and individuals can manage their regulatory affairs with minimal delays - £875,000 in 2026
- Data Sharing Programme (JFSC) - £350,000 in 2026
- Independent panel to support the Financial Services Competitiveness Programme - £20,000 in 2026
- Targeted funding in 2026 and future years to implement recommendations from the ongoing independent review as part of the Financial Services Competitiveness Programme. This may include broadening Jersey's range of products and services, promote innovation, and supporting the realisation of identified opportunities in the sector - £155,000 in 2026

This investment in 2026 and in future years will ensure Jersey remains relevant, supports existing and attracts new business whilst sustaining its competitive edge in an increasingly complex and fast-moving global market.

Funding is held in the Central Reserve and is earmarked against Cabinet Office until allocations are confirmed in year.

## Summary of Revenue Growth Allocations

### I-T&E-B26-001 Pillar 2 Infrastructure

Jersey is implementing the OECD's Pillar Two reforms, reinforcing its commitment to international tax cooperation and introducing a global minimum tax for large multinational enterprises. This positions the Island as a trusted, competitive financial centre, meeting global standards while fostering a stable business environment.

To support these reforms, the Government will invest in a modern IT system, delivered in phases. This will include a secure portal for multinational groups and tax agents to register, file returns, and make payments, alongside tools for Revenue Jersey to manage new tax types, monitor compliance, and exchange data internationally. Essential elements, such as the registration form, have been delivered early, while larger investments will align with greater clarity on the number of impacted entities and global trends.

The project is expected to enhance competitiveness through improved digital services, strengthen Jersey's reputation for transparency and regulation, and build internal capability thereby reducing reliance on external vendors and retaining intellectual property.

## Summary of Revenue Growth Allocations

### I-BAC-B26-001 Judicial Remuneration Review

In 2025, the States Employment Board conducted a review of Judicial salaries to ensure that specialist roles are remunerated at an appropriate level, commensurate with their specialist legal expertise. As a result of the review a new Judicial Pay Scale has been created to ensure it is consistent with international standards. This allocation will enable the department to meet this demand without impacting on the delivery of services.

### I-BAC-B26-002 Jersey Family Justice Council

The Jersey Family Council (JFJC) work to provide the best possible outcomes for children who encounter the Jersey Courts. This funding will ensure a structured independent secretariat and or resource to assist with the coordination, development or promotion of the work of the JFJC. It will fund the employment of a 0.5 FTE administrator as well as the budget for training and communications for the website and staff.

### I-BAC-B26-003 Civic and National Events

Resourcing 'Civic head' events allows the island to observe important local and national anniversaries highlighting the importance of thanksgiving, memorial and commemoration. In turn this investment supports and recognises the service of individuals who have served or continue to serve in the Armed Forces, or islanders who have been subject to occupation, deportation, internment or evacuation in Jersey.

This funding would be to ensure the continued delivery of the National and Civic events as described below:

- ANZAC Day
- Liberation Day
- Slave Workers Memorial
- D-Day
- Armed Forces Day
- VJ Day

- Remembrance Sunday
- Other smaller historical events e.g. Battle of Jersey

#### I-CAG-B26-001 Contractual Inflation

Over 95% of the expenditure relating to the Jersey Audit Office is undertaken under long-term contracts with annual uplifts linked to the annual movement in relevant Jersey or UK inflation indices. Consequently, this funding would allow the Office to meet its contractual obligations.

#### I-JUG-B26-001 Rent Tribunal

Currently there is draft legislation which is to be debated by the States Assembly in Q3 of 2025 which provides for a new statutory body – a Rent Tribunal – to perform an appeals function in the case of rent increase disputes. If this legislation is passed, a budget will be needed on an ongoing basis to establish and operate the Rent Tribunal including to remunerate Tribunal members and meet operational and staff costs.

#### I-JUG-B26-002 Election 2026

The next election is to take place on 7th June 2026. The Judicial Greffe has a statutory responsibility relating to pre-poll and postal votes during the election. The additional funding is only required in the event of an election. No funding for election activities is included within annual departmental budgets.

#### I-PRO-B26-001 Probation Service Inspection

This allocation would enable The Probation Service to fund an inspection from His Majesty's Inspectorate of Probation (HMIP). This would cover all aspects of its criminal justice work with adults. This inspection was scheduled to take place in 2022 with funding granted. However, it was cancelled due to a new case management system being implemented at the same time and it was deemed to be inappropriate for them to occur simultaneously - the funding was returned to Treasury. The prison service hosted an inspection by HMIP in 2024, and it is felt imperative that the Probation service also undertakes a similar quality assurance process. This would help identify existing effective practices and make recommendations for future improvements.

## Summary of Revenue Growth Allocations

### I-STA-B26-001 States Members Loss-of-Office Payments

Payments will be required for eligible States Members who do not return to the States Assembly after the 2026 elections. Budget is not held to cover these loss-of-office payments that only arise every four years.

The payments will be in line with the 2023 determination of the States Members' Remuneration Reviewer, which – in accordance with the States of Jersey Law 2005 – must be implemented. The total amount required to be paid cannot be determined until the next change to Members' remuneration has taken effect on 1st October 2025 and until the results of the election on 7th June 2026 are known.
