

Road Safety Scheme

States
of Jersey

over 40% of you asked us to look at speed of traffic

The 30 limit currently starts before the built up area. We therefore propose to create a gateway highlight as drivers enter the built up area to remind them of the 30mph limit .

We will do this after the speed limits change, but before the bend.

"I would just like the speed to be slowed on the road, people cannot pull out safely as the cars are going too fast."

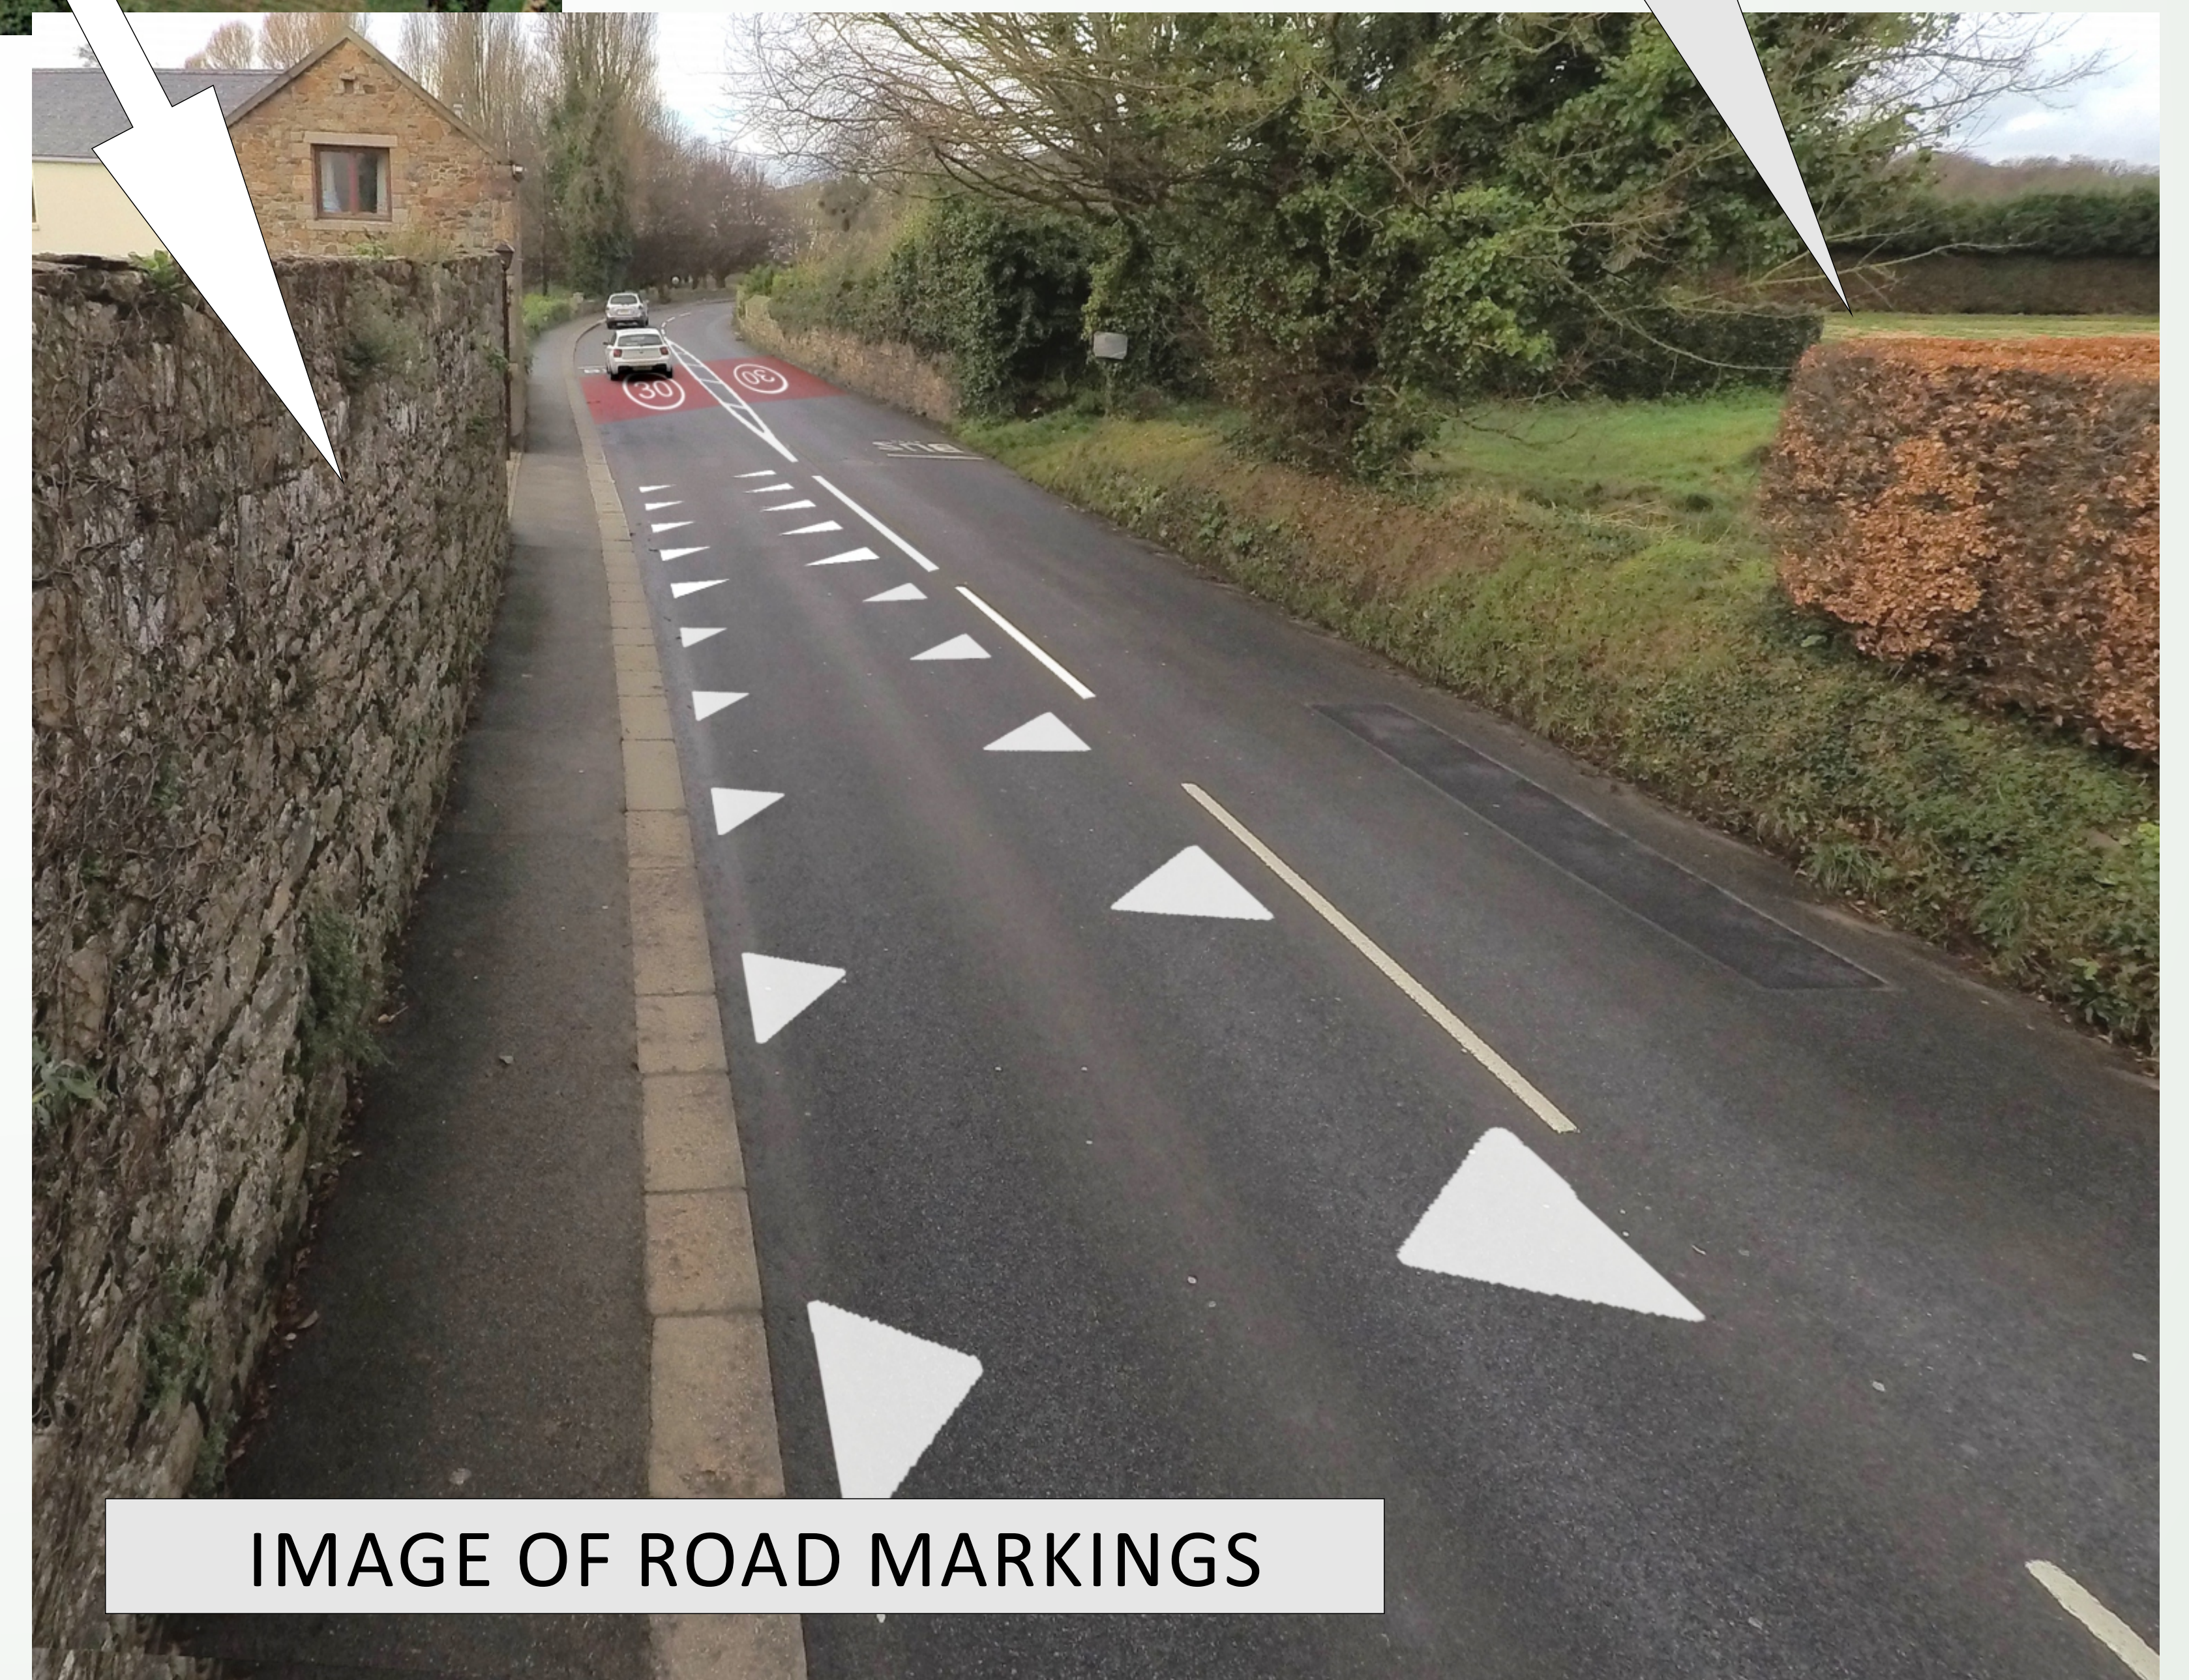

IMAGE OF ROAD MARKINGS

we also think that other changes proposed will help reduce speed.

We will monitor speeds after the scheme has been done to see if these measures have been effective
