

Home Specifications

All OMAR PARK HOMES & LODGES are designed to surpass the standards specified in BS3632:2015.

“Building Your Dreams”

Omar's mission is to build the very best park and leisure homes that money can buy; exceeding customer's expectations. We have been manufacturing our products for over 50 years and the test of time has seen some of the first homes we made in the early 1960's still on park today. At Omar our homes are built using responsibly sourced structural materials and to a specification which surpasses BS3632:2015 the British Standard for the manufacture of **Residential Park Homes**.

Our collection of **Park Home** and **Lodge** models cater for all tastes and budgets but we can also modify any of our standard homes to suit your requirements. Whether you want your own interior design or have a particular need such as a craft room or even a fully equipped assisted living home, we can accommodate you. As well as modifying our standard range of homes we can design and build completely bespoke homes to suit your every need. Omar's success is attributable to one main resource - its people! We have built a cohesive team of skilled craftsmen and specialists in design, product development, engineering, quality control, procurement, material handling and management personnel second-to-none. With the help and drive of all Omar staff we are able to “**Build Your Dreams**” into a comfortable home that is built to last – a home you will be proud of.

The specification and build of our homes has been developed over 50 years and meets or exceeds the relevant standards. Our aim is to deliver the very best quality home available, a home that is superior to BS3632:2015 and represents excellent value for money. It should also last as long as the 60 year requirement for traditional brick/block built homes and will carry a similar 10 year insurance backed structural guarantee.

Below are the specifications of the main constituent parts of our homes:

Sub Frame

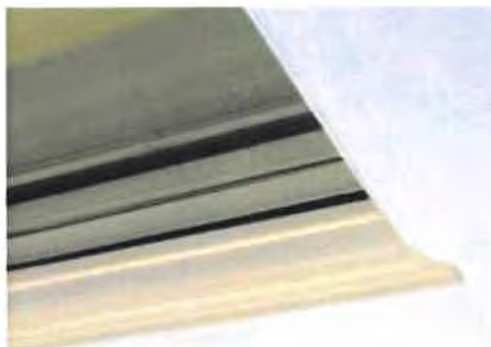

Insulation
