

I mention the fact that there is no view from the Dolman in the Landscape & Visual Assessment at Page 16 para 3.9.25 (There is an extensive shelter belt blocking the view)

I don't include photographs of places from where there isn't a view in my reports, but they are available should the Inspector request them (see attached).

A fair copy of the locations of all the photo viewpoints is shown on a map in the appendix to my report, and I recall that you produced a similar plan to accompany your photomontages.
