Dear Sir,

Re: Application No: P/2011/1673 – The building of 28 Houses at Plemont

As members of both the National Trust for Jersey and the Royal Society for the Protection of Birds, we are writing to oppose this application for the following reasons:

- 1) The lanes leading to the area are far too small, and widening them will have a detrimental affect on the whole area;
- 2) As keen birdwatchers, We feel that the effect on the wildlife will be catastrophic. It is the one place in Jersey where puffins can be seen;
- 3) There are far more suitable areas where such a development could take place if it is really necessary; and finally
- 4) The general population growth should be restricted in an island, the size of Jersey, and therefore more housing would not be required

Please consider *very* carefully how this development will impact on the rural nature of this area.

Yours sincerely,

[Redacted Signature]

Miss Ann J Chamier and
