Subject: Plemont Holiday Village. Application P/2011/1673

SENT: LAPP L
23 JAN 2012

After the disappointing failure of our States to agree a plan to protect Plemont Headland from future development, it is encouraging that the National Trust for Jersey, are consolidating their campaign to save this highly sensitive landscape encompassing some of the islands most important environmental features which require the highest level of protection. As a supporter of National Trusts fight to save Plemont from development, I agree that the derelict Holiday Camp Buildings should be removed, and the area returned to its natural state, so as nature, wildlife and future generations of islanders and visitors can both admire and enjoy it in perpetuity.

I would therefore request that application No P/2011/1673 is not approved to build houses on the ecologically fragile Plemont Headland.

David and Janet Grimshaw.
