

Jersey Retail Prices Index

December 2021

Statistics Jersey: www.gov.je/statistics

Summary - Jersey RPI December 2021

- during the twelve months to December 2021 the All Items Retail Prices Index (RPI) for Jersey increased by 3.8% to stand at 188.3 (June 2000 = 100)
- the increase in the RPI over the twelve months to September 2021 was 2.9%; hence the **annual rate** of inflation increased by 0.9 percentage points (pp) since last quarter
- this **increase in the annual rate of inflation** was due to upward contributions from several groups, notably the **Food** and **Motoring** groups saw prices increase by more, on average, over the twelve months to December 2021 than over the twelve months to September 2021
- prices in the **Fares & other travel** group increased by less, on average, over the twelve months to December 2021 than the same period of time to September 2021, giving a slight downward contribution to the change in the annual rate of increase
- underlying inflation, as measured by the annual change in RPI(Y), increased by 3.6% over the twelve months to December 2021¹
- the rate of underlying inflation, RPI(Y), increased by 0.9 pp since September 2021 (up from 2.7%)
- over the twelve months to December 2021:
 - RPI(X) increased by 3.5%²
 - RPI Pensioners increased by 4.0%
 - RPI Low Income increased by 3.3%
- the annual rates of increase for RPI, RPI(X), RPI(Y), RPI Pensioners and RPI Low Income, in December 2021, were all higher than the December 2020 rates by at least 1.4 pp
- the rate of inflation in Jersey over the twelve months to December 2021, as measured by the RPI, was 1.0 pp lower than the broadly comparable headline rate of inflation for the UK

¹ RPI(Y): the RPI excluding mortgage interest payments and indirect taxes (e.g. GST and impôts). During periods involving the introduction of, or changes in, indirect taxes, the annual change in RPI(Y) is the pertinent measure of underlying inflation.

² RPI(X): the RPI excluding mortgage interest payments.

Annual change

The increase in the All Items Retail Prices Index (RPI) over the twelve months to December 2021 was 3.8%. The annual percentage changes in the RPI since March 2000 are shown in Figure 1.

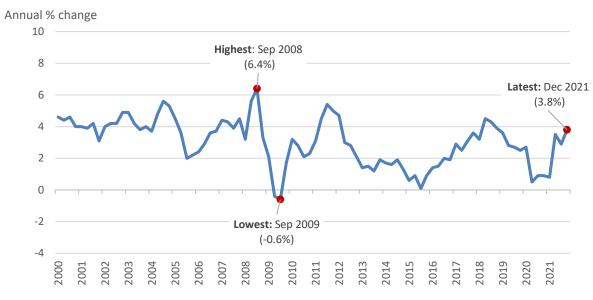

Figure 1 - Jersey RPI annual inflation rate (percent) Mar 2000 to Dec 2021

In December 2021, the annual change in the RPI was 0.9 pp higher than the previous quarter (September 2021).

The annual percentage changes for each group of the RPI are shown in Figure 2.

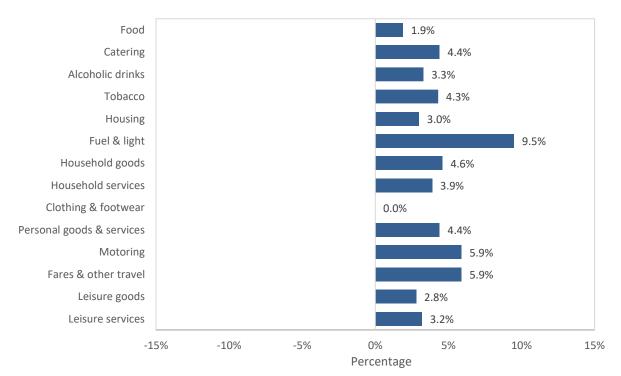

Figure 3 shows the contribution of each group of the RPI to the overall annual increase of 3.8%.

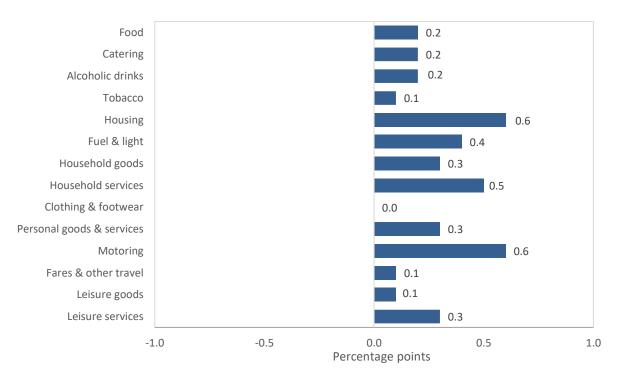

Figure 3 - Contribution of each group to the annual change in the RPI, Dec 2021

Most groups saw prices increase over the twelve months to December 2021, giving **upward** contributions to the RPI, notably:

- **Housing:** costs in this group increased by 3.0% overall over the twelve months to December 2021, contributing +0.6 pp to the annual change of the RPI
- Household services: costs rose by 3.9%, on average, over the twelve months to December 2021, contributing +0.5 pp to the annual change of the RPI. Price increases were seen across the group which includes domestic charges and school fees (increased for some schools in September 2021)
- **Motoring:** on average, prices in this group increased by 5.9% over the twelve months to December 2021, contributing +0.6 pp to the annual change of the RPI
- Fuel & light: over the twelve months to December 2021, costs increased by 9.5%, contributing +0.4 pp to the annual change of the RPI

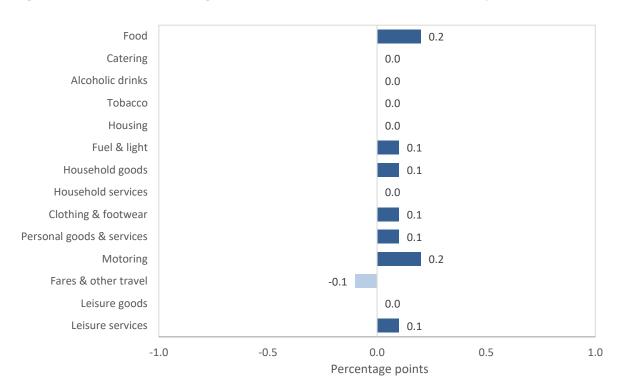

Impôt duties increased in January 2021, contributing +0.1 pp to the overall annual change in the RPI.

Group level indices are presented in <u>Appendix Table A1</u>, which also shows the most recent annual and quarterly percentage changes.

Individual contributions shown do not sum to the total change due to rounding

The annual rate of increase of the RPI in December 2021 was 0.9 pp higher than September 2021 (2.9%). <u>Figure 4</u> shows the contributions to the change in the annual rate of increase of the RPI.

Individual contributions shown do not sum to the total change due to rounding

Several groups gave small upward contributions to the change in the annual rate of increase of the RPI, including:

- Food: prices increased by 1.9% over the twelve months to December 2021, a greater increase than over the twelve months to September 2021 (up 0.5%), contributing +0.2 pp to the change in the rate of increase of the RPI
- **Motoring:** prices in this group increased by 5.9% on average over the twelve months to December 2021, whereas they had increased by a smaller amount (up 4.2%) over the twelve months to September 2021, contributing +0.2 pp to the change in the rate of increase

The Fares & other travel group gave a downward contribution. Prices in this group increased, in general, by less over the twelve months to December 2021 (up 5.9%), than they did over the same period of time to September 2021 (up 9.9%), contributing -0.1 pp to the change in rate of increase.

Quarterly change

On a quarterly basis, the RPI increased by 0.9% between September 2021 and December 2021. <u>Figure 5</u> shows the percentage changes over the latest quarter for each group of the RPI.

Figure 5 - Quarterly percentage changes for each group, Dec 2021

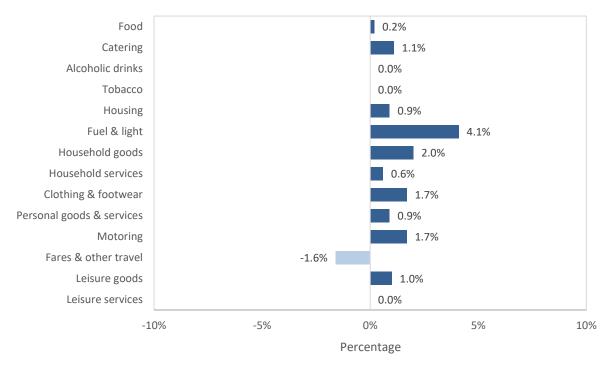

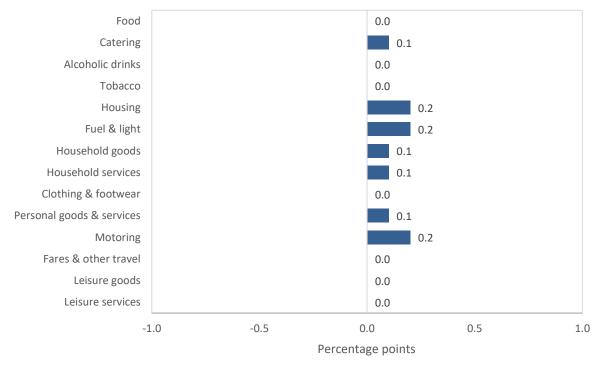

Figure 6 shows the contributions of these groups to the quarterly change in the RPI.

Individual contributions shown do not sum to the total change due to rounding

The majority of groups saw prices increase over the three months to December 2021. Overall prices in the **Fares & other travel** group decreased slightly.

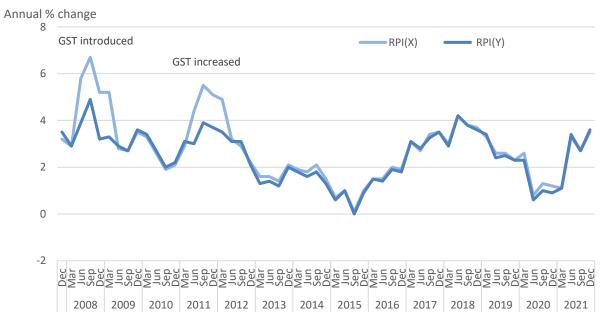

RPI(X) and **RPI(Y)** - underlying rate of inflation

RPI(X) is defined as the All Items RPI excluding the cost of mortgage interest payments. RPI(Y) provides a measure of underlying inflation by removing the effect not only of mortgage interest payments but also of indirect taxes such as GST and impôts. During periods involving the introduction of, or changes in, indirect taxes, the annual change in RPI(Y) provides a measure of underlying inflation.

Over the twelve months to December 2021, RPI(X) increased by 3.5% and RPI(Y) by 3.6%.

<u>Figure 7</u> shows the annual rates of change of both RPI(X) and RPI(Y) since 2007, when RPI(Y) was first published for Jersey (see <u>Appendix Tables A3</u> and <u>A4</u>).

In December 2021, the annual rate of increase of RPI(X) was 0.8 pp greater than in September 2021 (up from 2.7%).

For RPI(Y), the annual rate of increase in December 2021 was 0.9 pp more than that in September 2021 (up from 2.7%).

Other inflation measures

In December 2007, two further price indices were introduced for Jersey: **RPI Pensioners**, for pensioner households; and **RPI Low Income**, for households in the lowest quintile of household income.

Over the twelve months to December 2021, RPI Pensioners increased by 4.0% and RPI Low Income increased by 3.3%.

<u>Figure 8</u> shows the annual rates of change of both RPI Pensioners and RPI Low Income since December 2007, when annual changes in these indices were first published (see <u>Appendix Table A4</u>).

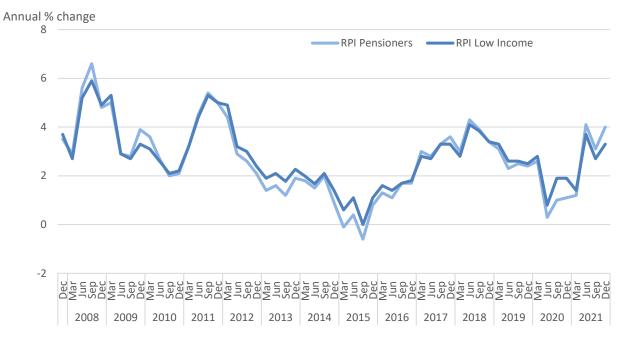

Figure 8 - Annual percentage changes in RPI Pensioners and RPI Low Income, Dec 2007 to Dec 2021

Comparison with the UK

The annual measures of the headline rates of inflation for Jersey and the UK are shown in <u>Table 1</u>. The headline annual rate of inflation for the UK is that of CPIH, which is broadly comparable with the Jersey RPI – see <u>Note 4</u> for more information.

Table 1: Annual percentage changes in Jersey and UK price indices, Sep 2021 and Dec 2021

| | Sep 2021 | Dec 2021 |
|------------|----------|----------|
| Jersey RPI | 2.9 | 3.8 |
| UK CPIH | 2.9 | 4.8 |

Over the twelve months to December 2021, the annual increase of the Jersey RPI was 3.8% and that of the UK CPIH was 4.8%, hence, the headline rate of inflation in Jersey over the twelve months to December 2021 was 1.0 pp lower than the headline rate of inflation for the UK.

Statistics Jersey

21 January 2022

Notes

- 1. The Retail Prices Index (RPI) is the main measure of inflation in Jersey. It measures the change from quarter to quarter in the price of the goods and services purchased by households on average in Jersey. The spending pattern on which the index is based is revised at intervals, using information from the Jersey Household Spending Survey (HSS). A HSS was conducted in 2014-15, the results of which were published in May 2016; these results have been used to conduct a commodity review and the introduction of new weights for all consumer prices indices in March 2018.
- The RPI is compiled using a large and representative selection of over 500 separate goods and services. The price movements for each of these are measured at a representative range of outlets. Around 2,500 separate price quotations are used each quarter in compiling the index. Prices are measured on or around the 15th of March, June, September and December.
- 3. Full details of the Jersey Retail Prices Index and its movements since 2000 are set out in the <u>Appendix</u>, along with details of the Jersey figures for RPI(X).
- 4. In 2012 a consultation exercise on the UK RPI was conducted by the UK National Statistician. The principal outcomes of this consultation were that the UK RPI did not meet current international standards and that a new index (RPIJ) should be published. From March 2013 to January 2017 the UK Office for National Statistics (ONS) published RPIJ. The annual percentage change in the UK RPI was systematically greater than that of RPIJ; the upward bias was predominantly due to the "formula effect". The Jersey RPI is not susceptible to such an upward bias. Prior to February 2017 the appropriate comparison with the UK was that of the Jersey RPI and the UK RPIJ. However, in February 2017, the UK Office for National Statistics discontinued publication of RPIJ.

A direct estimate of the formula effect was published by the ONS, enabling comparison between the annual rates of change of the Jersey RPI and the UK RPI by adjusting for the formula effect. The ONS ceased publication of this in February 2020.

Thereafter, the annual change in the UK CPIH (the headline measure of inflation in the UK) is used for comparison with the Jersey RPI.

- 5. RPI(Y) excludes mortgage interest payments and indirect taxes. The indirect taxes excluded are Parish rates and all taxes and duties that directly affect retail prices: impôts (on tobacco, alcohol, and motor fuels); the Goods and Services Tax (GST); Air Passenger Duty; and Vehicle Emissions Duty.
- 6. Group and section weights for RPI Pensioners and RPI Low Income are derived from information on expenditure collected by the 2014/15 Household Spending Survey (HSS). Section and item weights therefore differ from those in the Jersey RPI due to the different expenditure patterns for these households compared to all households.
- 7. COVID-19 context: Government policies implemented in response to the COVID-19 pandemic had resulted in travel restrictions to and from Jersey, leading to a reduction in the number of prices collected in the Fares & other travel group. In June 2020, December 2020, and March 2021 a small number of prices in other groups were not available at the time of price collection; any such unavailable prices were imputed using the most current that were available at the time.
- 8. The Jersey RPI for March 2022 is scheduled to be published on 27th April 2022.
- The Jersey Retail Prices Index is compiled by Statistics Jersey; (enquiries to Statistics Jersey: e-mail: <u>statistics@gov.je</u>)
