

Statistics Jersey: www.gov.je/statistics

Context:

Historically, there has been an increase in the number of ASW registrants during the month of September. A key factor in such a specific monthly increase is the requirement for any individual claiming Income Support *whose youngest child will reach either age four, five or twelve during the new academic year* being required to seek work or seek more hours of work. The seasonally adjusted figures within this report take this annual process into account.

Summary

On 30 September 2022

- on a **seasonally adjusted**¹ basis, the total number of people registered as actively seeking work (ASW) was 130² higher than at the end of the previous quarter and 180 lower compared with a year earlier
- the **non-seasonally adjusted** ASW total was 810; this total is 190 higher than at the end of the previous quarter and 180 lower compared with a year earlier
- a greater number of females (490 individuals) than males (320 individuals) were registered as ASW
- the total number of **long-term ASW** (registered for more than twelve months) was 210; this total is 10 lower when compared with the previous quarter and 200 lower compared with a year earlier
- of the 810 people registered as ASW, 270 individuals were engaged in some form of paid employment and classified as **underemployed**; this includes 100 individuals who were classified as long-term ASW

Introduction

The Customer and Local Services department (CLS) compiles data on people registered as Actively Seeking Work (ASW) in Jersey. Statistics Jersey independently analyses this anonymised data and publishes a quarterly report. A historical back series of statistics published can be found on the Jersey [opendata website](#).

It is important to note that unemployed Jersey residents are not required to register as ASW. However, those in receipt of an Income Support claim must be registered as ASW if they are required to be seeking work. Changes to the Income Support criteria, as well as certain administrative changes within CLS, can have an impact on the total numbers registered as ASW (see [Appendix A](#)). On a more historical basis, the introduction of Income Support in 2008 led to the inclusion of a greater number of individuals in the registered as ASW figures.

The numbers presented in this report constitute an informative set of indicators showing the level of individuals registered as ASW in the Island at a given point in time.

For comparability, throughout this report all figures do not include individuals registered as ASW who were also claiming the CRESS³ benefit. The scheme was active from 1 April 2020 to 31 August 2020 and required people to register as ASW in order to receive the benefit. Before and after this period there has been no such scheme for individuals with Registered residential status, who would not usually be required to register as ASW if they are unemployed and only do so optionally.

¹ Seasonal adjustment is a statistical technique, which enables examination of the underlying behaviour in a series of data by removing variations associated with the time of year, e.g. Christmas, academic year. See [Notes](#) for details.

² ASW numbers presented in this report are rounded independently to the nearest 10.

³ The COVID-19 Related Emergency Support Scheme (CRESS) was an emergency scheme to support people with Registered residential status who had been working in Jersey for less than five years and who have lost their full-time employment income because of the Coronavirus (COVID-19) pandemic.

Registered Actively Seeking Work

On 30 September 2022, there were 810 people registered as ASW. Figure 1 shows the total number of people registered as ASW at the end of each month since September 2017 (a table of the monthly data is shown in [Appendix B](#)). The total number registered in September 2022 was 190 higher than at the end of the previous quarter (June 2022) and 180 lower than twelve months earlier (September 2021).

Figure 1 – Total number of individuals registered as ASW, 30 September 2017 – 30 September 2022

The seasonally adjusted series of the total registered as ASW, in which seasonal and calendar effects are removed, is also shown in Figure 1. From this perspective, the total number of people registered as ASW on 30 September 2022 was:

- 130 higher than at the end of the previous quarter, 30 June 2022
- 180 lower than a year earlier, 30 September 2021

When making comparisons over time, it should be noted that changes to Income Support criteria and administrative changes within Customer and Local Services can result in changes in the total number of people being considered as ASW⁴. This is the case for both the seasonally adjusted and non-seasonally adjusted ASW totals.

On 30 September 2022, 91% of individuals registered as ASW (corresponding to 740 people) were receiving Income Support⁵. Compared with September 2017, there has been a rise in the percentage of those registered as ASW who are claiming Income Support (rising from 85% in September 2017 to 91% in September 2022).

Table 1 – Number of registered ASW, receiving and not receiving Income Support, September 2017 – September 2022

	Sept 2017	Sept 2018	Sept 2019	Sept 2020	Sept 2021	Sept 2022
Individuals receiving Income Support	830	840	840	1,430	910	740
Individuals not receiving Income Support	150	140	80	150	80	70
Percentage of ASW receiving Income Support	85%	87%	91%	91%	92%	91%

⁴ See [Appendix A](#) for details.

⁵ The total number of adults receiving Income Support and not working will be greater than this figure, as individuals that are claiming Income Support but exempt from registering as ASW (such as individuals claiming LTIA that are above the current 50% threshold) are not included.

Registered ASW by age and sex

On 30 September 2022, more females (490 individuals) than male (320 individuals) were registered as ASW.

Figure 2 – Age and sex distribution of individuals registered as ASW compared with the proportions in the general population⁶, September 2022

In respect of the breakdown of sex by age group:

- there were more females than males registered in all age groups 25-59 years
- there were more males than females registered in age groups 16-24 and 60-64 years
- the 40-44 age group had the largest difference by sex, with the number of females registered as ASW (60 individuals) being around triple the number of males registered (20 individuals)

Figure 3 shows the numbers registered as ASW by age of individuals in each of the last six months, from April 2022 to September 2022.

Figure 3 – Individuals registered as ASW by age, April 2022 – September 2022

⁶ Age and sex proportions at the 2021 Jersey census.

On 30 September 2022, 16% of people registered as ASW were under 25 years of age (130 individuals); 9% were teenagers, aged 16-19 years (70 individuals).

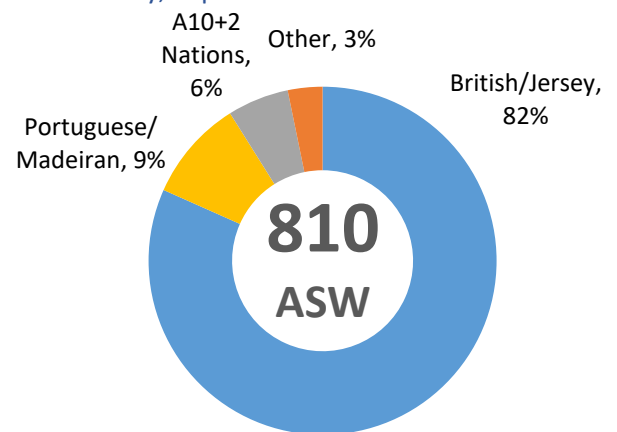

Younger age groups (16-49) saw increases of around 20 or higher in the number of individuals registered compared with the end of the previous quarter. Other age groups were essentially unchanged. The largest quarterly change was seen for the 35-39 group, which saw an increase of around 50.

Registered ASW by nationality

On 30 September 2022:

- there were 660 individuals of British / Jersey nationality⁷ registered as ASW (82% of total); representing an increase of 140 individuals compared with the end of the previous quarter
- there were 80 individuals of Portuguese / Madeiran nationality registered as ASW (9% of total), representing an increase of 30 individuals compared with the end of the previous quarter
- there were 50 individuals from the EU Accession (A10+A2)⁸ nations registered as ASW (6% of total), an increase of 20 individuals compared with the previous quarter

Figure 4 – Individuals registered as ASW by nationality, September 2022

⁷ Nationality recorded by Customer and Local Services, for the purpose of registering as ASW, is self-reported.

⁸ The twelve countries which joined (“gained accession to”) the European Union in May 2004 (Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia) and February 2007 (Bulgaria and Romania).

Registered ASW duration

Of the people registered as ASW on 30 September 2022, around half (48%) had been registered for three months or less; see Figure 5.

Figure 5 – Registered ASW by length of period registered (months), April 2022 – September 2022⁹

The number of new registrations in the third quarter of 2022 (480 people) was 220 higher than that recorded in the previous quarter and was 20 higher than recorded a year earlier (Q3 2021).

Long-term Registered ASW

On 30 September 2022, there were 210 people registered as ASW for more than twelve months, accounting for 26% of total ASW. The latest number of long-term ASW was 10 lower compared with the end of the previous quarter (June 2022) and was 200 lower than a year earlier (September 2021).

Figure 6 – Long-term ASW underemployed and long-term ASW unemployed, September 2017 – September 2022

Of the 210 individuals registered as ASW for more than twelve months, 100 were engaged in some form of paid employment and therefore classified as underemployed¹⁰. Around seven-tenths (68%) of those registered as long-term ASW and engaged in some form of paid employment were female.

⁹ Around 110 of those registered for less than one month were parents being required to seek more work, see [context](#) for more details.

¹⁰ See [ASW registered underemployment](#) – page 7 of this report.

Figure 7 shows the age and sex distribution of the long-term ASW in September 2022.

Figure 7 – Age and sex distribution of individuals registered as long-term ASW compared with the proportions in the general population¹¹, September 2022

Long Term Incapacity Allowance (LTIA)

Long Term Incapacity Allowance (LTIA) is a Social Security contributory benefit for individuals who have long-term ill-health or an injury. Individuals claiming LTIA who are below the 50% threshold (see [Appendix A](#)) are required to register as Actively Seeking Work. On 30 September 2022, around a quarter (23%) of individuals registered as ASW were claiming LTIA, corresponding to 190 individuals.

Of these 190 individuals, 50 were classified as underemployed meaning they were engaged in some form of paid employment; this number was 10 lower when compared with a year earlier (September 2021).

Table 2 – Number of registered ASW claiming LTIA, September 2021 – September 2022

	Sep 21	Oct 21	Nov 21	Dec 21	Jan 22	Feb 22	Mar 22	Apr 22	May 22	Jun 22	Jul 22	Aug 22	Sep 22
Total claiming LTIA	230	220	200	200	190	190	200	200	180	180	190	190	190
Percentage of total ASW	23%	25%	24%	25%	26%	25%	28%	29%	27%	29%	28%	28%	23%
Underemployed and claiming LTIA	60	60	50	50	50	50	50	50	50	50	50	50	50

Industry

Individuals working in some industries of the economy, notably in the Finance sector, are more likely to seek employment through private agencies and not to register as ASW with Customer and Local Services. Such industries will therefore tend to be under-represented in the ASW numbers.

The last industry of employment was recorded for over nine out of ten people (92%) registered as ASW. For those with a recorded last industry of employment, on 30 September 2022:

- 19% were previously employed in ‘Miscellaneous professional and domestic services’
- 19% were previously employed in ‘Retail and wholesale, motor repairs and sales’
- 13% were previously employed in ‘Public Administration’
- 12% were previously employed in ‘Banking, miscellaneous insurance, finance and business’

¹¹ As recorded by the 2021 Jersey Census.

Registered ASW underemployment

Individuals who are working fewer hours than they would like or who would like to change their current working situation are classified as underemployed. The International Labour Organisation (ILO) provides two definitions of underemployment¹²:

- *time-related underemployed*, which is due to insufficient hours of work
- *inadequate employment situations*, which are due to other limitations in the labour market, which limit the capacities and well-being of workers

In Jersey, individuals who are in receipt of Income Support are generally required to work at least 35 hours per week, unless exempt from full-time work. Those who do not meet this requirement must register as Actively Seeking Work. The total ASW figure therefore includes individuals who are working less than the 35 hours per week required under the terms of Income Support.

The number of ASW underemployed also includes:

- individuals who are on the Foundations programme and engaged in paid work of 32 hours per week (there were 20 such individuals in September 2022)
- certain self-employed individuals who are receiving Income Support and are still required to pursue additional employment (there were 50 such individuals in September 2022)

In September 2022, 33% of all people registered as ASW were underemployed; Table 3 shows the numbers of such individuals in each of the last thirteen months.

Table 3 – Number of ASW registered underemployed, September 2021 – September 2022

	Sep 21	Oct 21	Nov 21	Dec 21	Jan 22	Feb 22	Mar 22	Apr 22	May 22	Jun 22	Jul 22	Aug 22	Sep 22
Individuals	360	340	300	290	270	260	250	240	240	220	240	240	270
Percentage of total ASW	36%	39%	37%	36%	36%	35%	35%	34%	36%	35%	35%	35%	33%

Figure 8 shows the age and sex distribution of people registered as ASW underemployed; in September 2022, nearly six-tenths (59%) were aged 40 or over and around three-quarters (75%) were female.

Figure 8 - Age and sex distribution of individuals registered ASW underemployed compared with the proportions in the general population¹³, September 2022

¹² International Labour Organisation: *Resolution concerning the measurement of underemployment and inadequate employment situations*.

¹³ As recorded by the 2021 Jersey Census.

Notes

The number of people registered as ASW includes all people who are registered with the Back to Work team in Customer and Local Services.

When placing the figures contained in this report in a longer-term historical context it should be recognised that there have been significant changes in the criteria relating to registered ASW in Jersey over time. In particular, the introduction of Income Support in 2008 led to greater numbers of individuals who were actively seeking work being included in the registered figures. Other changes to the criteria which are important to note when interpreting changes in the ASW figures, are detailed in [Appendix A](#).

Information about the Back to Work team and the services they provide can be found [here](#).

Seasonal Adjustment

The Jersey employment market exhibits a number of seasonal effects that can affect the total number of people registered as Actively Seeking Work. In order to enable meaningful month-on-month comparison, the ASW totals are seasonally adjusted using the Eurostat Demetra software package.

Seasonal adjustment is based on ongoing estimation of seasonal trends and as such is subject to revision. In order to ensure a reasonably stable series of data for the user, the seasonal model is revised once a year, in January, at which point parts of the historic seasonally adjusted series may be revised. These revisions derive from an expanded set of data and lead to better estimates of the seasonal pattern. Throughout the calendar year the most recent model will be utilised and therefore the monthly figures will not be subject to revision.

All other figures presented in this report are based on the non-seasonally adjusted measures, unless otherwise stated.

Statistics Jersey

Appendix A

Changes in ASW Recording / Income Support Criteria

Whilst there is no legal requirement for unemployed residents of Jersey to register as Actively Seeking Work with Customer and Local Services, there are certain requirements to register for those in receipt of Income Support payments. Changes to these requirements as well as certain administrative changes within Customer and Local Services can result in changes in the total number of people being considered as ASW. The most recent such changes are as follows:

Date of Change	Description	Approximate Impact
October 2017 to December 2017	The threshold for the cumulative Long Term Incapacity Allowance (LTIA) percentage rate was increased from 45% to 50%. Any individuals below this threshold, in receipt of an Income Support claim, are required to register as ASW.	+ 25 registered ASW
May 2016 to September 2016	The threshold for the cumulative Long Term Incapacity Allowance (LTIA) percentage rate was increased from 40% to 45%. Any individuals below this threshold, in receipt of an Income Support claim, are required to register as ASW.	+ 90 registered ASW
September 2015	<p>Change in the Income Support criterion relating to parents with young children of school or nursery age. Prior to 1 September 2015 parents on Income Support, who were responsible for a child, had no job seeking requirements until the child turned 5 years of age, and therefore were not required to be registered as Actively Seeking Work.</p> <p>From 1 September 2015 parents where the youngest child on their Income Support claim is turning 5 years of age in the current academic year are now classified as jobseekers and are required to seek 25 hours of work per week – this resulted in approximately 80 additional individuals registered as ASW.</p> <p>In addition, parents where the youngest child on their Income Support claim is turning 4 years of age in the current academic year are also now classified as jobseekers and are required to seek 15 hours of work per week – this resulted in approximately 140 additional individuals registered as ASW.</p>	<p>+ 220 registered ASW</p> <p>In addition, it is anticipated that this change of criteria will result in an additional seasonal impact on the reported ASW numbers at the beginning of each subsequent school year.</p>
May 2015	Change of classification for certain self-employed individuals who are seeking further employment. This administrative change involved the reclassification of 70 such individuals who are now recorded as ASW.	+ 70 registered ASW
February 2015	The threshold for the cumulative Long Term Incapacity Allowance (LTIA) percentage rate was increased from 35% to 40%. As any individuals below this threshold, in receipt of an Income Support claim, are required to register as ASW, the raising of the LTIA threshold resulted in an additional 90 individuals being registered as ASW at the end of February 2015 compared with the previous month.	+ 90 registered ASW
April 2014	April 2014 – Prior to this point, the end-of-month ASW figures published by the Statistics Unit were based on data compiled by the Social Security Department on (or around) the 15th of the following month. From the April 2014 report onwards the end-of-month figures published are based on data compiled on (or around) the 1st of the following month. Moving the data compilation date forward by two weeks introduced a small upward systematic shift (of approximately 20 individuals) in the number of people classified as ASW at each end-of-month.	+ 20 registered ASW
