

## Jersey General Hospital Formulary - April 2025

**Hospital only** = can only be prescribed within the hospital. NICE guidance should be followed, where available. A maximum of 3 months\* supply will be issued on an outpatient prescription

\*For stable patients attending the ARV and blood-born virus clinics may receive 6 months supply of ARV medications and medications for co morbid conditions such as high cholesterol e.g. Atorvastatin (see ToR attached)

**Specialist initiation required** = medication initiated by the hospital. Prescribing and monitoring may be transferred to the GP in accordance with approved Specialist initiation required guidelines. A maximum of 3 months supply will be issued on an outpatient prescription.

**Blank status** = can be prescribed both in hospital and by GPs. A maximum of 1 month supply will be issued on an outpatient prescription. For non urgent and repeat items complete a 'Request for Non-Urgent Prescription' form and give to the patient to take to their GP who will write a prescription.

### Individual Funding Request (IFR) required or Restricted Use

Items not listed in the hospital formulary should not be prescribed. Requests for new items should be made to the Medicines Optimisation Committee.
