

# NOT A LOAD OF RUBBISH

## HOW MUCH WASTE IS PRODUCED WHERE YOU WORK?

In Jersey, we generate **over 105,000 tonnes** of (non-inert) waste per year.

That's equivalent to **each person producing over ONE TONNE** of rubbish per year.

You need to know what waste your work produces so that you can take steps to reduce how much rubbish you throw away, reuse things that you can and improve your recycling.
