

Lesson 1 - Homework task

## Other countries tax and welfare

- Pick a country you think you might like to live in.
- Research what your income after tax and social security may be like, and what social security support you may receive.

### TASK

You should be able to demonstrate that you have researched the following:

- For the job you'd like to be doing when you're say, 25, how much is an average salary you might earn in this country, and in Jersey?

---

---

---

- What types of tax do people pay in the country they have selected?

---

---

---

---

→ How much of their income do people pay as tax? (Tax rates and allowances.)

---

---

---

→ Where do the taxes go? What do they pay for?

---

---

---

→ What sort of social security, national insurance scheme or similar, does the country have? How much are the rates? (What percentage do employers and employees pay into it?)

---

---

---

---

→ What support would you get there if something happens? For example, if you have an accident or lose your job.

---

---

---

→ How does it compare to Jersey? Which do you think is better?

---

---

---
