

“ Town is where many of us live and most of us visit, so St Helier’s streets and spaces should be attractive and vibrant, a place to spend time in and of which we can be proud. The junction of King Street and New Street is important, not only for retail but also for walking across town, while New Cut is a key connection to Broad Street and on to the Harbour.

This public realm improvement scheme will provide a new surface treatment and enlarge the opening to the Le Sueur obelisk square by relocating the untidy cycle racks. Pedestrian priority over vehicles and cycles will be emphasised, and the bottom end of New Street enhanced with new seating and tree planting.

We appreciate that the construction work will cause some inconvenience, but we hope that you can bear with our teams as this is an investment for the future. ”

ANDY JEHAN, MINISTER FOR INFRASTRUCTURE AND SIMON CROWCROFT, CONSTABLE OF ST HELIER

**Existing** **Proposed**

Pedestrians will have priority over delivery vehicles coming down New Street

### KEY BENEFITS ARE

- ◆ Pedestrians given priority over vehicles on King Street, improving safety and comfort
- ◆ A continuous smooth walking surface ensuring access for all
- ◆ Seating provision for all users, allowing people to linger in the area
- ◆ New street lighting, making a safer and more welcoming space
