Foreword from the Minister for Economic Development

It seems unbelievable that we have now been enduring the difficulties associated with the global financial crisis for 4 years and that during that time the Tourism Industry has both responded and in many areas flourished against the background of extreme economic difficulty. In 2011 business levels have been maintained overall and stimulated by growth from European markets whilst the quality of the Jersey product has continued to improve following significant levels of investment by a broad range of businesses within the sector.

Germany, which is Jersey's fastest growing market, produced an increase of 23% in staying leisure visitors taking the size of the market to over 13k producing an on-Island expenditure of £7.5m This increase corresponded with a significantly enlarged flying programme during the Summer months from key German cities and looks set to continue to expand into the future. In France, Jersey's second fastest growing European source market, 40.5k staying leisure visitors were attracted, achieving a growth of nearly 10% producing an on-Island spend of £10.5m.

Both France and Germany are countries in which the Department has invested over long periods in marketing and where trade links have been developed to support these excellent performances.

Business visitors enjoyed growth on 2010 partly as a result of the early year. Supermarket fitting out accounted for significant numbers of room nights and for the remainder of the year maintained satisfactory levels to show an overall performance which was up on 2010.

The transition to higher quality accommodation is encouraging increased spend among our visitors and overall it is estimated that visitors of all categories spent £242m within the Island, underpinning the value of the sector to our economic well being as well as supporting the social infrastructure. This on Island expenditure will translate into £12m of tax revenue through GST, providing a good return on States investment.

Whilst the States of Jersey has been responding to the Comprehensive Spending Review which has been implemented to cover a 3 year period from 2011 to 2013 with cuts across all departments I have protected the Tourism budget in recognition of the very valuable contribution which the industry makes to our economy. It should also be noted that the sector employs an estimated 6k people and these jobs are vital at this time. I was also able to supplement the Tourism budget for marketing in 2011 with an additional £500k which was diverted from under spends from elsewhere in the Economic Development Department.

Jersey continues to provide many leisure activities and entertainments for visitors and local residents which are much appreciated as they increase the level of enjoyment to enhance the visitors stay and create reasons for them to come in the first place. These all help to supplement the natural attractions of our beautiful Island. Many are provided commercially by the private sector organisations and often through the efforts of many volunteers who give tirelessly of their time to benefit the Island. The International Air Display and the Jersey Battle of Flowers are both excellent examples of the latter and I would like to offer my sincere thanks to all who contribute to the success of these events. Sadly in 2010 poor weather prevented the air display from flying, particularly after all of the hard work had been undertaken and costs incurred.

I would like to take this opportunity of recognising the very valuable contribution to Tourism made by industry members to the Tourism Development Fund, the Jersey Conference Bureau and the Tourism Marketing Panel. It is vital that we continue to benefit from the expertise which is provided to these bodies which enables planning and decisions to be made with input from as broad a range of industry as possible. The Industry in Jersey is diverse and interrelated and no one sector would survive and prosper without the others. It is therefore vital that we continue to work in partnership to build on our many strengths which are enhanced by the quality and beauty of the Island coupled with the warmth of welcome which we consistently offer to our visitors.

I would also like to take the opportunity of recognising the contribution of my two Ministerial colleagues who served with me until the new Government was formed in December 2011, Connetable Len Norman and Senator Paul Routier who join me in thanking all of the departmental staff for their superb efforts throughout the year.

Senator Alan Maclean Minister for Economic Development

2011 Annual Report

Against the background of reducing volumes of UK visitors taking overseas holidays and the ongoing unfavourable exchange rates for Sterling against the Euro Jersey performed well in the UK market.

With a strong advertising campaign led by national television and boosted by an additional £0.5m in early Summer the high season and autumn periods achieved particularly good results.

Length of stay averages were very similar to 2010, and in profiling terms the points of note were increases in the percentage travelling with a tour operator and those travelling by sea. Compared to 2010 the month of most improved occupancy was June, with November and December recording reductions perhaps indicating increasing the trend in seasonality.

Transportation

The arrival figures for 2011 show a healthy increase of over 30k and provide a potential indicator of confidence returning to the travel industry. Whilst these figures are a combination of all movements including local residents, and business visitors as well as leisure visitors they showed improvement for most months of the year by both air and sea. Inter-Island movements were particularly noteworthy with a 20k increase resulting in the highest ever recorded number of passengers.

From the UK air transportation has followed a similar pattern to previous years with some changes to operators on regional services but overall a comprehensive spread of services being maintained. The loss of the direct service to Plymouth following the closure of the airport will reduce capacity to the South West which has traditionally been a good source of business for Jersey.

Despite the loss of the direct Paris service the European network is expanding, resulting in increases form both Germany and Switzerland. Air capacity increased by 28% from Germany with additional support from Air Berlin and Lufthansa.

Passenger numbers from St Malo were affected by the cessation of the passenger ferry Jacques Cartier which ended in 2010 and which brought good volumes of French day excursionists.

The German Market

Out performed all other market segments in terms of volume increases in 2011 which is particularly welcome for the visitor economy as German visitors stay for an average of 5.9 nights and spend an average of £565 during their stay.

The increases were generated by a number of complimentary factors including increased flight capacity by Lufthansa & Air Berlin whose schedules encouraged longer duration stays whilst larger aircraft led to 28% capacity in 2011 compared to 2010

Trend Tours a new tour operator for Jersey provided nearly 1,500 German guests with Flybe in 2011 with flight connections via the UK.

An additional radio campaign in the Frankfurt catchment area generated increased booking volumes for TUI Wolters charter service.

Tui Wolters and Detour, Jersey's main tour operator partners in Germany produced excellent results in 2011 and are anticipating further growth in this market in 2012.

Industry Events

A programme of events, each with a specific interest, was introduced to bring members of the industry together to discuss specific items of interest. The full list undertaken in 2011 is shown below. As these have all been offered to the industry free of charge and at cost to Tourism they represent a significant learning opportunity for which greater numbers of participants might have been expected. The programme will be continued in 2012 as the programme provides a significant benefit for those who attend.

Jersey Travel Survey

After a gap of 4 years, a year long travel survey covering all of Jersey's visitors was commissioned to provide up to date information on visitor volume and expenditure. The study will be undertaken as an exit survey at the Ports of Jersey and will as a minimum provide detail on the following. The results will be available at the end of 2012.

- Determine the passenger composition of each of Jersey's main air and sea transport routes by season and across the year
- Consolidate this information in order to calculate visitor volume
 over a one-year period, broken down into different visitor segments
- · Provide information on resident travel movements on each main route
- Evaluate detailed visitor expenditure broken down by different, specified visitor segments
- · Determine the prices paid by visitors for travel to and from the Island
- Provide basic profiling information for visitor segments (age, party size, country of residence, average stay, how they booked and travelled)

David de Carteret Director of Tourism & Marketing

Marketing – 2011 Annual Report

Advertising Campaign

In order to increase Jersey's visibility and appeal as a holiday destination, Jersey Tourism's marketing communications strategy significantly changed in 2011 to reflect a shift towards TV advertising. This resulted in a major investment in this media channel, with reductions in other media choices, most notably national press advertising.

To support the TV commercial, new footage was filmed and local singer/songwriter, Nerina Pallot, agreed to provide the soundtrack from her single 'butterfly' and the voiceover. The advert also introduced a new positioning statement for Jersey, 'the warmest place in the British isles'.

The gross value of the TV campaign was in excess of £1.2 million and was bought in a declining market as the ongoing global recession continued, achieving great value for money in terms of media exposure. This level of investment into TV resulted in a reduction in press advertising by nearly 78%. The TV campaign commenced on 10 January and with the help of additional funding, continued until mid-July.

This proved to be a successful strategy. Reach estimates for the TV campaign were exceeded in all areas of the country, with an overall coverage of 7.5 million ABC1 55+ adults. 93% of this target audience saw the Jersey ad, on average, 12 times each. Across the broader market, the campaign reached a total of 22 million ABC1 adults, who on average, saw the ad 9 times each.

Advertising tracking research showed that prompted ad awareness increased across all target groups by 3%, with the biggest increase being in the post-family audience which increased by 4%. This research also showed one of the best unbranded recalls over the past 5 years, with 25% of UK adults remembering the TV ad. This research also recorded the highest spontaneous perception of Jersey for 'nice beaches' followed by 'expensive'. References to 'warm weather' and 'sunny' also showed marked increases, both featuring in the campaign.

Although the press campaign was much smaller than in previous years, it still played a key role in supporting TV and some brand press advertising took place in the early part of the year. In addition to this, Jersey Tourism provided subsidised advertising opportunities for the industry. Ten partners took up this opportunity during the year and 121 ads were placed in 8 national titles with partners contributing £32,000.

The campaign was also supported by a year-round e-marketing programme, with 11 emails campaigns, amounting to 835,000 messages, to previous enquirers and visitors, 15 partners participated and contributed £10,400. The most popular and cost effective advertising provided for partners during the year was the special offers pages on Jersey.com. 13 partners booked year-round ads, as well as many more ad-hoc offers throughout the season.

The overall campaign was complemented by dedicated brochure response advertising, joint promotions and marketing with transport providers and tour operators, search engine optimisation and online advertising, social media and key exhibitions.

JerseyPass

JerseyPass continued to expand during its third year of operation, this scheme having been designed to support Jersey's attractions in one comprehensive marketing scheme. The scheme supported 16 attractions in 2011 and created nearly 27,000 visits.

- Total Passes Sold: 4,595
- Total Number of Visits: 26,968
- Total Number of Pass Days: 19,253
- Total Value of Passes Sold: £185,000
- Number of Visits per Day: 1.40

Retail pricing of the cards was maintained at the same level as 2010 in order to drive footfall into attractions and achieved a 3% increase in revenue over the year.

Jersey Link

Jersey Tourism operates an online accommodation booking system primarily for staying leisure visitors. The system has an agent interface via the Visitor Centre for customers wishing to enquire and book by telephone or in person. This central reservations system (CRS) is branded as 'JerseyLink' and had been in place since 1994 allowing contracted accommodation proprietors (approximately 87% of Jersey's establishments) to access the system via a secure web based administration system to login and sell their accommodation; using Jersey Tourism as an intermediary.

The software driving the system was updated in 2011. The previous system had served the industry well for many years and was a proven application, particularly in the manner in which it interfaced with www.jersey.com, but in light of changes to business operations on the internet, the technology needed to be replaced to reflect new business practice.

The new operating system also provided a solution to the corporate requirement to meet PCI Compliance standards, whilst search engine visibility was improved and the usability of the system was also improved to meet customers expectations. The new software also provided greater control to proprietors whilst reducing the administrative burden on Jersey Tourism in managing the system. The provider of the system, NVG, is a UK based firm specialising in software solutions for the Tourism industry and since going live in October 2011 has help as significantly increase online presence and drive traffic and sales into Jersey.com.

Public Relations Activity

The public relations team celebrated another successful year of editorial coverage in 2011, with campaigns undertaken primarily in the UK, Ireland, France and Germany. Other international activity was conducted principally with industry partners and VisitBritain, the national agency promoting incoming tourism to Britain.

A key element of the PR campaign is the facilitation of media to the island. In 2011 the team facilitated visits covering 125 print media, 16 TV & 5 radio productions and 23 on line. Other international media visits included those from Holland, Belgium, Austria, Switzerland, China and the USA.

UK

The focus was to continue to communicate the sense of vitality about Jersey as an island, deliver a clearer sense of "brand Jersey" by finding some unpredictable ways of delivering the well-known, and add some more unexpected and less predictable layers of communications.

Activity was conducted nationally and regionally, with Tourism industry partners, in conjunction with the main Jersey Tourism advertising campaign.

Amongst the outstanding highlights ITV1 Jersey featured in a 'Country Wise' episode in June on ITV, where Paul Heiney, historian Bettany Hughes, horticulturist Rachel de Thame and chef Mike Robinson explored the island and praised it for its local produce and scenery.

The weather campaign challenging Jersey the right to the claim "warmest place in the British Isles" continued to generate high levels of exposure and the innovative Inaugural Mymemory.com World Beach Art Championships achieved extensive international exposure that is due to yield further benefit in 2012 with programmes scheduled for broadcast on BBC Coast in Spring

Summary of exposure

- 725 articles generated
- Advertising equivalent value £7,132,294
- 563,311,201 opportunities to see
- Cost per thousand opportunities to see £0.30 a reduction of 9 pence
- 65% of all UK adults were reached by the coverage. The audience most reached was one of our key target audiences, empty nesters, those whose children have left home.

On average UK adult and target audience members were exposed to Jersey Tourism UK coverage 12 times;

- 44% with a core message
- 59% with a brand message
- 74% with a call to action

What was said:

- "The rosettes, alongside two Michelin-starred restaurants have now confirmed the Island's image as what it calls a 'culinary powerhouse' and has the most AA awards by head of population." Travel Daily
- "Just a 45 minute flight away from London, I'd found a small and perfectly-formed paradise." Sunday Daily Star

Key stories

- EasyJet, the UK's biggest airline in terms of passenger numbers, classifies Jersey airport as category B, which translates as 'slightly out of the ordinary'.
- EasyJet is to operate flights from Glasgow to Jersey during the summer three times a week.
- Tourism officials from the Isles of Scilly lodge a complaint about Jersey Tourism's claim that it is the warmest place in the British Isles.
- The Channel Island Way guidebook is launched, showcasing the best routes for walkers who are island hopping; 48 of the walks apply to Jersey and enjoy frequent public transport access.
- The first ever Worldwide Beach Art Championships are held in Jersey.
- EasyJet launches a new route from London Southend to Jersey in May 2012.

Key findings

An average of 60 items per month were generated for Jersey Tourism. April was the most prolific month for coverage, generating 97 articles. Coverage was driven by a complaint lodged by tourism officials for the Isle of Scilly against Jersey's claim that they are the 'warmest place in the British Isles'. The story accounted for a quarter of pieces with some of the items also counting towards strongly unfavourable coverage for the month.

The volume of event coverage in 2011 exceeded the total from 2010 by 49 items.

Q2 was the most prolific quarter for coverage, outperforming the target, with items driven by the Liberation Day event and several strongly favourable reviews of Jersey: "During my stay I feasted on the best seafood I have ever tasted, including a delicious scallop risotto at Castle Green gastro pub in St Martin. I ate my meal while enjoying the glorious panoramic views of the Royal Bay of Grouville on my first night and was already planning to return to Jersey" (Eastern Daily Press).

The proportion of articles featuring a brand message in 2011 (59%) was well in excess of the yearly target (40%).

In line with the previous year, three quarters of coverage delivered at least one message, significantly exceeding the industry average for the leisure sector at 56% (source: Metrica Numbers).

'Sunshine Culture' was the most prolific brand message, appearing in 32% of coverage, while 'Perfect for Outdoor Folks' achieved the highest number of deliveries; both messages were driven by the Walking Festivals and featured mentions of 'short breaks' in 40% of items.

Half of coverage during the year featured a mention of a holiday type, the most prolific being 'short breaks' appearing in 38% of articles. 97% of items to include a holiday type also featured an impact measure.

'Family holiday' featured prominently over the summer months, peaking in July, with 18 mentions. Travel Weekly reports on the growing appeal of family holidays in Jersey, outlining its attractions and noting that the Island is also starting to appeal to younger people: "I went on a family trip [...] in May and was blown away by Jersey – it's a hidden gem on our doorstep" (Gail Herring).

One third of print articles featured photography, enhancing the quality of coverage for Jersey and the impact on the reader. 66% of print articles featuring an image were strongly favourable, 34 percentage points higher than the average for the year.

Three articles addressed the August Jersey murders. The potentially unfavourable impact of these pieces was minimised by quotations from local policemen who emphasised the rarity of such events and reaffirmed that the Island is "one of the safest places in the Western world" (The Times and The Times Online).

50% of 'Time Out/Indulgence' items were strongly favourable, while over a quarter of articles featured an event or festival: "The Battle of Flowers engenders a terrific sense of community throughout the parishes who compete to make the most artistically inspired float, bedecked in flowers cultivated on the Island" (Real Travel).

Strongly favourable 'Explore (Outdoors)' coverage included a feature in The Sun, noting that: "Jersey is an adrenaline-charged destination for the young, fit and fearless".

90% of articles containing an event also delivered at least one message, the most prolific being 'Thriving Creative Scene'.

2011 in Focus

The Liberation Festival achieved several favourable pieces, with the Guernsey Weekly Press noting that: "It's a great event for Channel Island Tourism too. Last year the festival attracted national and international coverage from music critics who were bowled over by both the quality of the acts and the beauty of the islands. The Liberation Music Festival is now a significant date in the cultural calendar of the British Isles".

October was the most prolific month in terms of event coverage, three quarter of items relating to the first edition of the World Beach Art Championships.

The Walking Festivals achieved coverage throughout the year, peaking in May and September, when the 'Walking Weeks' take place. Mentioned amongst the best walking festivals in the UK, hikers can choose between "woodland wanders, seaside strolls and foodie trails", with up to 55 guided tours.

October achieved a high proportion of event coverage (second most prolific month with 26 mentions), driven by the World Beach Art Championships, the first edition of which took place in Jersey.

Impact measures

74% of coverage featured at least one 'call to action' in 2011, maximising the tangible impact of coverage, and far exceeding the target of 65%. This also represents an 11 percentage point increase from 2010.

38% of coverage with an impact was strongly favourable. This is six percentage points higher than the average for the year, demonstrating the positive effect impact measures can have on coverage.

The proportion of articles to feature the brand URL (11%) was above the yearly target, boosted by recommendations of Jersey Walking Festivals.

Mentions of 'Jersey Tourism partners' peaked in Q2, featuring in over two thirds of coverage.

42% of pieces concerning the Branchage Film Festival featured photography, while 82% included the 'Culture/Heritage' product cluster, boosting its favourability to 78% strongly favourable.

'Time out/indulgence' product cluster coverage to feature a photography was driven by the Liberation Day event and Walking Festivals.

16 items of broadcast were achieved during the year, including pieces on BBC1 (2,878,680 viewers), Channel 4 (863,604 viewers) and ITV (863,604 viewers).

TV Coverage

Jersey received significant TV coverage once again, some highlights include;

- ITV "Country Wise" Paul Heiney, historian Bettany Hughes, horticulturist Rachel de Thame and chef Mike Robinson explored the Island and praised it for its local produce and scenery.
- Channel Four "Time Team" Secrets of Mont Orgueil castle and a WWII anti aircraft battery at the Jersey War Tunnels site were revealed to 2.1 million viewers over two programmes filmed in 2010 covering. It was also broadcast in Australia.
- · BBC One "Antiques Road Show" filmed at Samares Manor first was repeated.
- BBC One "Saturday kitchen" saw Shaun Rankin & Mark Jordan back in action again with their culinary talents.
- ITV "This Morning" Presenter Phil Vickery took to the beach to cook a meal using locally sourced fish and produce.
- BBC Two Digging for Britain filmed archaeologists discovering new finds in the La Cotte cave.

France

The Paris based public relations Agenda agency together with the in-house team achieved exceptional results.

During the year 75 items were generated, totalling a readership of 74 257 948;

- 1 TV programme (TF1)
- 3 radio programmes
- 40 on line articles
- 31 print articles
- National Press 18
- Regional Press 13

Highlights included items covering key product areas and subjects such as leisure cycling, walking, quirky historic accommodation, Grassroots festival, deluxe hotels, Jersey gardens, Summer festivals, Beach Art Championship, day trips, spas, Tennerfest and Fete de Noue.

Amongst the media titles were;

TF1 (1st TV station), Ouest France, Le Parisien, Version Femina, Le Figaro Magazine, Votre Beauté Magazine, tourmagazine.fr, La Manche Libre, Tour Hebdo, L'Echo Touristique, Vertu magazine, La Presse de la Manche, Weva, Grands Reportages, Maximoto, La Vie est Belle Voyages, Hôtel & Lodge, Ouestfrance.fr, Golf Européen, youvox.fr, Tendance Ouest radio, routard.com, Normandie Junior and Agence Bretagne Presse.

Germany

In 2011 the advertising and marketing campaign focused on radio, online activities and working with trade partners. Public relations was the main communication channel for print and TV. Activities ran nation-wide to increase the awareness and visibility of Jersey as a holiday destination for German visitors and regionally in areas served by direct flight connections.

Results

- 1,182 articles were published, a 30% increase year on year.
- Circulation achieved 118 million.
- · Total advertising equivalent value achieved £5.5 million.
- · 300 million opportunities to see were generated.
- · The majority of the articles appeared in newspapers and online.
- · January to June saw the greatest volume of coverage.
- 15% of all publications referred to journalist visits.
- · 34% related to published press releases and feature stories.

All articles were extremely positive about Jersey.

Key Stories

- 39% featured the Motoring Festival.
- 45% reported the Battle of Flowers.
- Others included; Spring Walking Week, the My Memory World Beach Art Championship, the increasing number of German visitors to Jersey and flight connections.

TV & Radio broadcasts

- HR TV 30 min regional TV programme about Jersey broadcast on 29th April in the Rhine-Main area.
- HR TV "Service: Reisen". Repetition of a 30 minute film about the Channel Islands broadcast on 10th May.
- MDR TV 43 minute film about Durrell Wildlife Conservation Trust broadcast on 5th August.
- 1 hour radio interview about Jersey, with Jersey's German PR representative, broadcast via Antenne Dusseldorf, and in all Air Berlin lounges to support nonstop flights with Air Berlin from Dusseldorf to Jersey.
- Journalist Reiner Veit produced a one hour radio feature about Jersey aired on 2nd July on RBB Inforadio, in Berlin and surrounding area.

Social Media

Increased activity with social media;

- Ongoing communication has resulted in the number of friends on the German Jersey Facebook account increasing by 627% from 111 to1019.
- Twitter, by far less popular, was also used to communicate news to 65 followers.
- The leading weekly paper "DIE ZEIT" created an app for iPad and iPhone, with a free download sample using an issue with a major travel article. The article, which was written by Rüdiger Dilloo about Jersey, achieved over 37,000 downloads.

Product Development

The key Product Development function is to create activities and events that drive new business to Jersey, enhance visitors' on Island holiday experience and increase on Island spend.

The primary focus is on developing 'on brand' activity mainly in the shoulder months which is attractive to visitors – both potential visitors and those that have already chosen to visit. The brand promise is that those who visit will be enriched by the 'Jersey' experience.

There are currently five areas of work;

- Longer term product development
- · Developing programmes of activity throughout the year
- · Developing a programme of festivals and events
- · Supporting external event organisers, and;
- · Creating promotional opportunities including PR exposure

Longer Term Product Development

Work continues on developing walking and cycling and 2011 saw the launch of the 'Channel Island Way' a 115 mile walk around five of the Channel Islands – Jersey, Guernsey, Alderney, Sark and Herm which has already delivered extensive pr opportunities including the National Geographic magazine and exposure in numerous walking blogs. This project was the first inter island development project for many years.

At the end of 2011, Jersey was invited to participate in Cycle West an Anglo/French cycling project which is being funded (€8 million) by the EU. The project aims to deliver three cycle itineraries; 'Velodyssey' – a city to city route from Nantes, 'Tour de Manche' – a 700 km/430 mile route across northern France and the south west of the UK (e.g. Roscoff to Plymouth/Cherbourg to Poole) and 'Petit Tour de Manche' – which encourages cyclists to cycle from Saint Malo to Weymouth via Jersey. This project will involve participation in an extensive marketing/social media campaign across Brittany and the South West and Jersey will feature on the French and UK national cycling websites.

Annual Programmes of Activity

Each year programmes of activity are developed based on key Tourism experiences. The aim is to expose a 'hidden' Jersey to visitors so they can experience Island life.

The annual guided walking programme, delivered in conjunction with the Jersey Tour Guides Association delivered over 300 guided walks per annum. The walks expose visitors to Jersey's heritage and culture including the occupation, food trails, heritage sites and access to private homes and gardens.

In 2011 Over 40 local farm and craft markets were staged in St Aubin and at the Weighbridge Place throughout the spring and summer. These provided animation, colour and activity and offered the visitor opportunities to purchase locally made goods and produce.

The team managed the Howard Davis Park music programme and 2011 saw over 55 performances of live music, theatre and film for visitors to enjoy. The team also co-ordinated the diary of Open Gardens throughout the year which offers access to stunning private gardens rarely open to the public and Jersey's entry into the Royal Horticultural Society's 'Britain in Bloom' competition and the local competition 'Jersey in Bloom'. In 2011, seven parishes entered the competition. The overall winner of 'Best Parish' was the Parish of St Helier with a Gold Award and the winner of 'Best Coastal Parish' was the Parish of Grouville also with a Gold Award.

Festivals and Events

Jersey Tourism's existing event strategy is to drive business throughout the year through a programme of festival and events linked to key product areas. Events showcase the products that are available year round and celebrate what Jersey has to offer.

The Team organises Liberation Day, the Spring and Autumn Walking Weeks, June in Bloom, Jersey in Bloom, the Black Butter event at the Elms in conjunction with the National Trust for Jersey and La Fete de Noué. These festivals have been developed over the years, primarily in the shoulder months and are aimed at our target audience of 45+ higher spending couples.

New for 2011 was the introduction of a Jersey Food festival. The festival was a week long celebration of the Jersey Royal new potato, seafood and dairy produce, highlights of which included fine dining in Michelin starred restaurants, low water rambles, foraging, food and ale trails, tutored tastings, brewery and dairy tours. The festival involved participation from Genuine Jersey and other local producers, Michelin starred chefs as well as businesses such as Albert Bartlett, Jersey Dairy and the local fishing industry and would not have been possible without the support and commitment from the local Tourism industry.

2011 was an important milestone in the history of Trinity Manor. It commemorated 100 years since the manor was extensively remodelled having been designed by the renowned architect Sir Reginald Blomfield (1856 – 1942) – one of the most successful and prolific of Edwardian architects. Owners Mr and Mrs Paul Bell invited the team to assist them in delivering a traditional 'Country Fair' in July. Highlights of the event included a horse show, produce and craft fair, beer tent with specially brewed Trinity Manor centenary beer, a food village and a programme of music and street theatre alongside more traditional pursuits such as coconut shy.

The walking festivals continued to deliver business to Jersey at very low costs and 1077 visitors took part in the spring event with 914 participants in the autumn event.

Then 2011 programme of events was delivered on time and within budget with large attendances despite bad weather at the International Air Display and La Fete de Noue.

Visitor Services Centre

Visitor & Retail

The visitor centre maintains a high quality free service to visitors seven days per week during the Summer months and in 2011 was open for 339 days.

While the total visitors number to the Island increased by 0.5% during 2011 on 2010 the centre recorded an increase of over 15% of those visitors using the Visitor Service Centre with over 18% of total arrivals to the Island in August of this year.

However, despite a slight increase in the amount of income to the centre the average spend per head reduced marginally to £2.10. These figures can be attributed in some part to the high numbers of young school groups visiting the centre that historically are not big spenders. But these statistics taken in the context of the current economic climate are being viewed positively.

During 2011, more products from the members of Genuine Jersey were secured to display and sell in the centre and these proved very popular especially the Christmas themed goods. The centre also started stocking the Diamond Jubilee and Olympic merchandise as, we understand, the first outlet in Jersey to do so and is currently the only official retailer for Team GB merchandise.

Jersey Pass

This scheme proved beneficial to all those who participated. The visitors, attractions, retailers of the pass and also those who offered special value deals. We saw an overall increase in both sales of the pass and revenue collected as the pass becomes more widely known and recognised with sales in excess of £83k being recorded.

Guestlink System

2011 saw the transfer of the on line accommodation booking system transfer from Chauntry to the Guestlink system. This system is widely used through UK Tourist Information Centres and has the capacity to interface with other booking engines, in effect giving hotels and guest hotels the ability to update their availability across more than one booking system at one time. This also gives the availability to sell by room, by person and can also accommodate hostel type accommodation so we are confident we will see an increase of traffic through our on line booking system during the next season.

Jersey Conference Bureau

The conference and incentive market is one of the most competitive and competition has been intense. The economic climate affecting corporate events and the reduction in UK public sector events had resulted in large price discounting by venues in the UK provinces.

The number of staying delegates increased by just over 1% from 9221 delegates to 9326 delegates.

The number of events was down to 258 compared with 292 the previous year. The number of association delegates rose from 3,816 to 4,012. The number of corporate delegates decreased from 5,405 to 5,314.

There were some notably high profile international conferences held in the Island including the International Whaling Convention, The Red Ensign Conference and The Federation of Small Businesses.

The number of bed nights sold increased marginally to 33,830 from 33,363. Association delegates tend to stay longer however their contribution to the local economy is not usually as large as corporate delegates.

The Jersey Conference Bureau is operated as a Public, Private Partnership with the majority funding being provided by the Economic Development Department.

Further information can be obtained from www.jerseyconferences.com

Association 4012. 19452 bednights Corporate 5314. 14378 bednights

Financial Report

	2011 Actual £000	2010 Actual £000

Market Development		
Public Relations	525	512
Trade Relations	677	668
Consumer and Media Relations	1,001	972
Visitor Services	266	385
Net Revenue Expenditure	£ 6,621	£ 7,162

Note: The above figures include direct salaries and an allocation of Economic Development Department (EDD) overheads.

Key Financial Results

Total revenue expenditure for 2011 was £6,621, a decrease of £541k (-7.5%) compared with 2010

Corporate expenditure decreased by £126k (-21%)

The decrease in Corporate Strategy and Policy expenditure was mainly due to a reduction in route development (71k). In addition, there was a reduction in the grant to Jersey Conference Bureau (£25k).

Communications expenditure decreased by £386k (-9.8%)

The decrease is mainly due to a reduction in brochure costs and in 2010 there was a provision made of $\pounds 265k$

Market Development expenditure decreased by £68k (-2.7%)

The decrease in Market development is partly due to a slight increase in sales in the Visitor Services Centre and a reduction in staff costs

Notes on Volume and Value Calculations

Visitor volume

In order to calculate total visitor volume estimates, a year-long exit survey is commissioned which covers all air and sea routes departing from Jersey. This was first undertaken between 1997 and 1998 and then repeated in 2003, 2005, 2007 and 2009. It is currently being undertaken again throughout 2012.

Due to the fast-changing nature of routes and passenger profiles, it was decided in 2003 to undertake the passenger exit survey every 2 years, with estimates being made in the intervening year based upon the previous year's results.

The most recent passenger exit survey was undertaken throughout 2009 and covered over 108,000 departing passengers (nearly 10% of total departing passengers by air and sea). The survey data provides a passenger breakdown on each route as follows:

- Resident, visitor or returning visitor (i.e. visited somewhere else during their stay in Jersey and therefore double counted in arrivals data)
- Purpose of visit, length of stay and country of residence

The methodology is very similar to that of the International Passenger Survey undertaken in the UK and interview shifts are carefully planned to reflect passenger throughput at the harbours and airport. A larger coverage of passengers is achieved in the Jersey survey, thus making the results more statistically reliable.

2011 visitor volume figures are based upon results from the 2009 exit survey.

Visitor expenditure

Visitor expenditure estimates are based upon the most recent visitor expenditure survey undertaken in 2007 and applying Jersey's RPI figures for the ensuing years.

N.B. The States Statistics Unit are familiar with and supportive of all methodologies used to calculate visitor volume and value.

SUMMARY OF TOP-LINE FIGURES 2007 - 2011

¹ Tax figures are based on "Income Tax Charged to Companies" and does not represent the whole of the tourism sector, or tourism's overall contribution to Jersey's economy. The Hospitality sector is defined by the Comptroller of Income Tax Hotels and Restaurants. Tax revenue from retail, transport and other service industries, together with indirect tax revenue from those servicing tourism related businesses is not included. Tax paid by individuals working within the industry is also not included.

² The Hospitality sector as defined by the Manpower Survey consists of tourism related accommodation, restaurants and bars. The figures are from the Manpower Survey, June 2011 (Statistics Unit). Again the hospitality sector alone does not constitute the full impact of tourism upon employment in Jersey.

 $^{\rm 3}$ Includes hotels, guest houses, self catering, hostels and campsites registered with Jersey Tourism.

Jersey Tourism 2011

This report is designed to give the reader an insight into and understanding of the Tourism Industry in Jersey, focusing on Visitor Volumes, Expenditure and Profile.

This report also covers registered bed stock, accommodation performance, JerseyLink Bookings, Internet Usage and Passenger Arrivals.

More detailed tables and information can be found in the appendices.

1. Tourism Volume and Expenditure Estimates

1.1 Introduction

This section of the Annual Report outlines the volume and value of tourism to Jersey.

Visitor numbers are best estimates based upon passenger arrivals, completed visitor registration cards, declarations from various sources and the results of the Jersey Travel Surveys (see Section 9 – Guide to data sources).

Visitor Expenditure estimates refer to direct visitor spend whilst in Jersey and are based upon reflated results from the 2007 Travel Survey. Expenditure figures do not include passenger landing fees, travel to Jersey or revenue generated into the economy through employment and capital and/or revenue expenditure.

The following summary of 2011 results emphasises the importance and impact of the tourism industry in Jersey.

- 689,700 Visitors.
- 334,400 Visitors staying in paid accommodation for leisure purposes.
- 72% of staying leisure visitors were from the UK representing 79% of total staying leisure visitor bed nights sold.
- Almost 1.8 Million overnight stays (bed nights sold) in paid accommodation (excluding visiting yachts).
- £242 million estimated on-island visitor spend.
- £121 million estimated visitor spend on accommodation.

1.2 Total Visitor estimates

Figure 1 below shows that the number of visitors increased by 1% from 682,700 in 2010 to 689,700 in 2011, following an increase of 0.3% between 2009 and 2010.

Figure 1 Total visitor volume 2007-2011

A full breakdown of total visitor numbers can be found in **Appendix 1** of the 2011 Annual Report at <u>www.jersey.com/marketinginfo</u>.

1.3 Staying Leisure Visitors

Figure 2 below shows how total staying leisure visitor volume increased by 0.5% from 332,600 in 2010 to 334,400 in 2011, following a fall of 1.7% between 2010 and 2009.

Figure 2 Staying leisure visitors 2007-2011

More detailed analysis of the staying leisure visitor market can be found in Section 2 (Profile of Staying Leisure Visitors), later in this report.

1.4 Visitors Staying with Friends and Relatives (VFR)

The number of visitors staying with friends and relatives increased by 2.9% from 98,600 in 2010 to 101,500 in 2011. In addition to this, circ 5% of leisure visitors staying in paid accommodation claim a visit to friends and relatives as their main purpose of visit, with a further 6% claiming this to be a secondary purpose (Staying Leisure Visitor Survey 2008).

Based upon the 2009 Travel Survey it is estimated that 88% of the VFR market travelled to Jersey by air and the breakdown by country of residence was as follows:

Table 1 Visiting friends and relatives (VFR) volumes by market 2011

	<u>Volume</u>	<u>%</u>
UK	81,520	80%
Other CI	4,040	4%
Ireland	2,800	3%
France	2,910	3%
Portugal	1,510	1%
Other	8,690	9%

Those staying with friends and relatives spend slightly longer in Jersey than visitors in paid accommodation, with an average length of stay of 6.1 nights. The VFR market therefore accounted for 619,000 overnights stays (bed nights) in Jersey in 2011.

1.5 Language Students

Visiting language student numbers increased by 9% from 2,950 in 2010 to 3,200 in 2011.

Language students in 2011 are estimated to have stayed in Jersey for an average of 13.8 nights, with the total market accounting for 44,100 nights. The majority of students stay with host families which puts a constraint upon the maximum size the language student market can achieve.

1.6 Business Visitors

The business market is estimated to have increased by 2.4% from 95,900 in 2010 to 98,200 in 2011.

In 2011 the number of staying (one or more nights) business visitors increased by 0.5% to 65,900, with business day visits increasing by 6.5% to 32,300.

Figure 3 Staying business visitors 2007-2011

The increase in staying business visitor volume, coupled with a decrease in average stay accounted for 148,300 bed nights sold, 4% less than in 2010.

Table 2 Staving	business	visitor	volumes	by
market 2011				_

	<u>Volume</u>	<u>%</u>
UK	55,490	84%
Other CI	3,410	5%
France	1630	2%
Ireland	630	1%
Other	4,740	7%

1.7 Visiting Conference Delegates

Residential conference delegate numbers increased by 1% from 9,220 in 2010 to 9,330.

The number of conferences decreased by 34 from 292 in 2010 to 258 in 2011. The number of Corporate delegates was 6,100, while the number of Association delegates was 3,300.

However, the number of bed nights sold increased by 0.5% from 33,700 in 2010 to 33,800.

Further details can be obtained from Hamish Reid at the Jersey Conference Bureau. www.jerseyconferences.co.uk

1.8 Visiting Yachtsman

The number of visiting yachtsmen increased by 1% from 23,200 in 2010 to 23,400 in 2011, staying an average of 2.2 nights, the same as in 2010.

Further details can be obtained from Jersey Harbours. www.jersey-harbours.com

1.9 Leisure Day Trips

Leisure day trip visits increased by 1% from 99,900 in 2010 to 100,400 in 2011.

Figure 4

Breakdown of leisure day trip visitors by market

Source: 2009 Travel Survey

1.10 Visitor Expenditure Estimates

Total on-Island expenditure in 2011 is estimated at £242 million.

In real terms, if the total 2010 expenditure figures are reflated to 2011 values, tourism expenditure in Jersey in 2011 was at the same level as 2010..

Table 2 shows a breakdown of estimated on-Island visitor expenditure by visitor type 2010 vs. 2009.

Table 3 Total	visitor s	pend 2011	vs. 2010

	2010 value of market 000's	2011 value of market 000's	% change
Staying Leisure Visitors	£147,617	£157,533	7%
Visiting friends/relatives	£27,033	£29,113	8%
Language students	£2,678	£2,709	1%
Leisure day visitors	£5,493	£5,932	8%
Visiting yachtsmen	£2,091	£2,273	9%
Business visitors	£27,590	£28,174	2%
Conference delegates	£5,613	£5,685	1%
Other visitors	£10,689	£10,542	-1%
Total visitor spend	£228,804	£241,961	6%

N.B. 2010 figures are not reflated.

Table 3 shows a breakdown of estimated on-Island visitor expenditure <u>per visitor</u> by visitor type 2011 vs. 2010.

Table 4 Spend	per Visitor	<u>2011 vs. 2010</u>

	2010 spend per visitor	2011 spend per visitor	% change
Staying Leisure Visitors	£444	£471	6%
Visiting friends/relatives	£274	£287	5%
Language students	£908	£847	-7%
Leisure day visitors	£55	£59	7%
Visiting yachtsmen	£90	£97	8%
Business visitors	£288	£287	0%
Conference delegates	£609	£610	0%
Other visitors	£525	£548	4%
Average spend per visitor	£335	£351	5%

N.B. Figures have been rounded. N.B. 2010 figures are not reflated.

Breakdown of on-Island visitor spend 2011

The 2007 Travel Survey asked respondents how much they had spent on various aspects of their visit. This makes it possible to break down estimated visitor expenditure into the following categories:

Figure 5 Breakdown of on-Island visitor expenditure 2011

Source: 2007 Visitor Expenditure Survey

The above shows that half of visitor expenditure is on the accommodation element of a stay in Jersey, although this percentage is reduced by visitors who do not stay in paid accommodation (VFR, day trips etc.). 22% of visitor expenditure is spent in restaurants, pubs and cafés, 7% on on-Island transport, and 18% on miscellaneous items which are mainly retail.

Visitor expenditure estimates are based upon the most recent visitor expenditure survey undertaken in 2007, but reflated to 2011 using Jersey's RPI.

1.11 Tax Revenue

The following figures show estimates of the tax contribution of the hospitality sector for the years 1999 to 2007.

Table 5. Tax revenues from companies

1999	£5.9 million
2000	£5.2 million
2001	£4.9 million
2002	£5.0 million
2003	£5.0 million
2004	£5.9 million
2005	£5.9 million
2006	£5.3 million
2007	£5.5 million

In 2007, tax revenues from companies in the hospitality sector (strictly "Hotels, restaurants and bars") was £5.5 million which represented 2.3% of total income tax from companies. By far the largest contribution to tax comes from the finance sector.

Tax figures are accrued one year in arrears and do not represent the whole of the tourism sector, or tourism's overall contribution to Jersey's economy.

The Hospitality sector is defined by the Comptroller of Income Tax as all "Hotels, restaurants and bars". Tax revenue from retail, transport and other service industries, together with indirect tax revenue from those servicing tourism related businesses is not included.

Tax revenue figures for previous years have not been reflated for direct comparison with 2007.

No data has been provided subsequent to 2007.

2. Profile of Staying Leisure Visitors

The following tables show **staying leisure visitor** trends, with the data derived from those visitors staying in registered accommodation that filled in visitor registration cards and stated that their main purpose of visit was "holiday" or "sport".

2.1 Visitors by Month

As volumes are measured based on the day of arrival, some months are affected by changes in the number of weekends falling within the month in a particular year.

Figure 6 shows that 2011 started slowly, followed by a strong performance in April and June. Summer visitor numbers were similar to 2010, and the year ended strongly from September onward.

Figure 6 Staying leisure visitor arrivals by month 2010 and 2011.

Source: Visitor registration cards

Different markets have different seasonal visit patterns. The French market shows higher peaks in April, May and June, and the markets reliant upon summer charter services show a relatively smaller season from June to September.

2.2 Party Composition

The table below shows a breakdown of adults and children under 16 by source market.

Table 6 Staying leisure visitors - 2011 party composition.

	Adults (over 16)	Children (under 16)	Total Visitors
UK	223,980	15,500	239,480
Ireland	3,700	300	4,000
Other CI	17,580	1,520	19,090
France	36,080	4,510	40,580
Germany	12,700	560	13,260
Benelux	4490	320	4,810
Other	12,410	790	13,200
Total	310,930	23,490	334,410

In 2011, children accounted for 7% of total staying leisure visitors, a slightly larger percentage than in 2010.

2.3 Average Length of Stay

Like the majority of destinations, Jersey has experienced a general trend towards shorter stay breaks and multiple holiday taking.

For a more detailed breakdown of lengths of stay by market please refer to **Appendix 6**

The following graph illustrates the overall trend from 2007 to 2011.

Source: Visitor registration cards

2.4 Region of Residence

2.4.1 UK

UK postcodes have been data inputted from completed visitor registration cards. From the postcode it has been possible to continuously measure changes in the regionality of UK visitors.

Figure 8 Volumes of staying leisure visitors from the UK by ISBA region in 2011

There have been some significant changes in the regional distribution of visitors by ISBA region between 2007 and 2011. These changes are partly reflective of the changes to capacity on certain routes and of some new routes being introduced, as well as discontinued routes.

Table 7 and Figure 9 opposite show the changes in volumes of visitors by ISBA region between 2011 and 2010.

Table 7 Visitor volume changes 2011 vs. 2010

Southern	210
Border	170
Northern Ireland	-80
North Scotland	-140
Northeast	-180
Central Scotland	-240
Southwest	-280
East England	-940
Yorkshire	-1,470
Midlands	-1,550
London	-1,690
Lancashire	-1,700
Wales & West	-2,280

Figure 9 Visitor volume changes 2011 vs. 2010

Compared to the UK's population distribution, Jersey had highest penetration in 2011 in the Southern and Southwest regions, followed by the Midlands, East England and Wales & West regions.

In 2011, 49% of Jersey's visitors came from the London, Midlands, and Southern regions.

For more detailed analysis of the ISBA region profiles, please refer to the **Appendix 3**.

2.4.2 France

The first two digits of French postcodes from returned visitor registration cards have also been captured so that a continuous monitor of visitors from French Départements has been possible. Départements are grouped into French regions.

Table 8 and Figure 10 show the distribution of French staying leisure visitors between 2010 and 2011.

	2010	2011	Change 11/10	Change 11/10
Brittany	13,800	15,160	10%	1,360
Greater Paris	6,140	7,140	16%	1,000
Normandy	5,690	5,610	-1%	-80
Loire Valley	6,090	6,600	8%	510
South East	1,200	1,340	12%	140
South West	920	1,110	21%	190
Other	3,070	3,600	17%	530
Total	36,910	40,560	10%	3,670

Table 8 French visitors by region 2011 vs. 2010

Figure 10 French visitors by region 2011 vs. 2010

For more detailed analysis of the French regional profiles, please refer to the **Appendix 4**.

2.5 MOSAIC Profile of UK Staying Leisure Visitors

MOSAIC profiling is a system based upon UK postcodes to classify the types of UK visitor to Jersey. The groups were completely revised in 2011, and these new groups have been used.

Table 9 shows the geo-demographic profile of visitors to Jersey in 2011. The higher the index figure (this is the proportion of Jersey visitors compared to the UK population for each Mosaic Group), the more likely Jersey is to attract visitors from that particular Mosaic group.

Table 9 Mosaic groups of	f UK visitors	2011
--------------------------	---------------	------

MOSAIC Group	% UK Households	Jersey Visitors	Index 2011
Alpha Territory	3.5%	7.0%	2.0
Professional Rewards	8.2%	17.8%	2.2
Rural Solitude	4.4%	6.9%	1.6
Small Town Diversity	8.8%	11.3%	1.3
Active Retirement	4.4%	5.4%	1.2
Suburban Mindsets	11.2%	13.4%	1.2
Careers and Kids	5.8%	7.8%	1.3
New Homemakers	5.9%	3.4%	0.6
Ex-Council Community	8.7%	5.0%	0.6
Claimant Cultures	5.2%	1.4%	0.3
Upper Floor Living	5.2%	1.3%	0.3
Elderly Needs	6.0%	2.7%	0.5
Industrial Heritage	7.4%	7.2%	1.0
Terrace Melting Pot	7.0%	2.8%	0.4
Liberal Opinions	8.5%	6.6%	0.8

For more detailed analysis and definitions of the Mosaic profiles please refer to **Appendix 5**.

2.6 Additional Visitor Profiling

The most notable points from the tables in the appendices are that:

- The average length of stay remained constant at 4.3 between 2010 and 2011. The average stay for UK visitors increased from 4.7 nights in 2010 to 4.8 in 2011, but the increase in volume of short stay French visitors brought down the overall average stay.
- The percentage of visitors booking their holiday through a tour operator was 55% in 2011; representing an increase from 49% in 2010, with 52% in 2009.
- The percentage of first time visitors in 2011 decreased from 49% to 47%. This figure had been consistent over the previous 4 years.
- In 2011 there was a decrease in the proportion of visitors booking at short notice, contrary to recent trends. 34% of visitors booked less than one month before arrival compared to 36% in 2010.
- Between 2007 and 2010 the percentage of staying leisure visitors travelling by air to Jersey consistently hovered around the 72-73% mark. However, in 2011 67% of staying leisure visitors travelled to Jersey by air. Again, this overall figure has been brought down by an increase in French visitors, 94% of who travelled by sea in 2011.
- There had been a gradual increase in the average age or age profile of staying leisure visitors in previous years. This trend reversed in 2003 with the overall average adult age dropping to 52 years and, since 2003 the average adult age has remained at 53 to 54 years. It is also noteworthy that UK visitors are generally older than most European visitors.

For more detailed analysis of visitor profiles by market, please refer to **Appendices 6**, **7 and 8**.

3. Registered Bed Stock

In recent years, Jersey's registered tourist bed stock has undergone some major changes. Total bed space capacity reached a peak of over 27,000 in the mid 1970's, with guest houses accounting for over a third of this total. A total capacity of over 27,000 bed spaces was maintained until the late 1980's.

The increasingly competitive climate in the tourism market and on-Island pressures for housing led to a sharp decline in registered tourist establishments and bed spaces throughout the 1990's.

However, in recent years the decline has slowed, and this year the registered number of bed spaces has increased slightly.

Figure 11 Registered establishments and bed spaces 2007-2011

In 2011, Jersey had 143 registered establishments, representing almost 12,000 tourist bed spaces. Hotels accounted for 77% of the total bed stock in 2011.

Compared to 2010, the number of bed spaces increased for guest houses, camping and youth hostels. Despite a fall in self-catering spaces, there was an overall increase in registered tourist bed spaces.

Figures 12 and 13 demonstrate that the largest fall in bed spaces has occurred in the self-catering sector and that the largest fall in establishment numbers has been in the hotel sector. This has inevitably resulted in an increase in the average number of bed spaces per establishment from 82 in 2007 to 84 in 2011.

Figure 12 Distribution of bed spaces 2007-2011

Figure 13 Distribution of establi

Distribution of establishments 2007-2011

More detailed data with regard to registered bed stock and establishments can be found in **Appendix 9**.

4. Accommodation Performance Indicators

This section shows the performance in terms of bed and room nights sold, and occupancy levels achieved, in the accommodation sector.

Bed and room nights available are a measure of the number of registered bed spaces and rooms multiplied by the number of days an establishment is effectively trading for "tourism" purposes. A number of establishments are effectively trading as residential lodging houses for part of the year and are therefore excluded from the figures during those periods. Bed space and room occupancy is a measure of bed spaces and rooms occupied versus bed spaces and rooms available.

4.1 Bed Occupancy

By taking into account Jersey's total beds available (open), and comparing the estimated numbers of staying visitors and their respective lengths of stay, shows the following estimates for total bed space occupancy 2011 vs. 2010.

Figure 14 Bed space occupancy 2011 vs.2010

In 2011, total bed space occupancy averaged 54%, compared to 53% in 2010. Bed nights sold in all accommodation increased by 2.3% to 1,767,700 and total bed night availability increased by 0.6% to 3,284,100.

4.1.1 Monthly Occupancy

Figure 15 illustrates the seasonality of tourism in terms of registered beds, the number of beds that are available (open) for tourism purposes and number of bed nights sold across the year.

Figure 15 Bed spaces

Total registered beds Bed nights available Bed nights sold

4.2 Room Occupancy

Since 2001 Jersey Tourism has also measured room occupancy. Many operators prefer to use room occupancy data as opposed to bed occupancy data and many like to use both. Jersey Tourism will continue to provide both room and bed data in its Annual Report as well as in its monthly reports.

By taking into account Jersey's total room capacity, and comparing the estimated numbers of staying visitors and their respective lengths of stay, the following shows estimates for total room occupancy 2011 vs. 2010.

Figure 16 Room space occupancy 2011 vs. 2010

In 2011 total room occupancy averaged 62%; a slight rise from 61% in 2010. Rooms sold in all accommodation increased by 2.9% to 928,300 while total rooms available increased by 0.3% to 1,489,000.

For more detailed data with regard to **bed and room space** occupancy please refer to **Appendices 10 and 11**.

4.3 Room vs. Bed Occupancy

Figure 17 shows how room occupancy is much higher in most months outside the main summer season. This illustrates the importance of business and conference tourism, where the majority of overnight stays are based on single rooms or single-occupied rooms; and represents a higher proportion of room sales compared to staying leisure visitors.

Figure 17 Bed and room occupancy 2011

Bed-space Occupancy

Room-space Occupancy

5.1 JerseyLink Bookings

JerseyLink is a central accommodation reservations system set up by Jersey Tourism to enable industry partners to sell any spare room capacity they might have. Circ. 85% of Jersey's registered bed stock is connected to the system.

Table 10 Jersey Link bookings 2	2011 vs. 2010
---------------------------------	---------------

	2010	2011	11 vs. 10
Number of bookings	4,100	3,900	-4%
Number of bed nights	27,300	27,200	0%
Revenue	£1,049,300	£1,099,200	5%

The above table shows a 4% decrease in bookings, resulting in a marginal decrease in bed nights sold through the system. Revenue in 2011 increased by 5% to £1,099,200 compared to 2010, producing an average per person per night rate of £40.49, an increase on 2010 of £2.02 (+5%).

JerseyLink bookings accounted for 1.54% of total bed nights sold in 2011, compared to 1.58% in 2010.

NB: In October 2011, the software powering the JerseyLink system was replaced. Following an extensive tender process, the legacy software provided by Chauntry Corporation was replaced with a web based solution provided by NVG. The accommodation sector received training to aid the transition.

<u>Figure 18</u> JerseyLink Bookings Revenue 2007 – 2011

More detailed data can be found in **Appendices 12** and 13.

6. Internet Usage

Staying Leisure Visitor Surveys over the past decade have shown a dramatic rise in the number of staying leisure visitors to Jersey who have internet access and use it for holiday information and bookings.

Significant increases in access and use for holiday information have been recorded in all countries over many years. It is notable that there has been a greater level of growth in access and use for holiday information by European than by UK visitors (Source: Staying Leisure Visitor Surveys). However, Jersey's main markets of the UK, France and Germany all have very high levels of internet penetration, with each country having in excess of 80% of their population using the internet.

6.1 www.jersey.com

Jersey.com has been in existence as the official Jersey Tourism website since March 1999, and the current version of the site was launched in April 2008. Site content is published in English, French and German.

The website offers a number of tools including Accommodation Reservations, Festival & Event search, Flight search, Weather information, Brochure Request facility, Restaurant listings, Attractions, Activities and a wealth of content about what Jersey has to offer visitors and to enable holiday planning.

In 2011, there were over 2 million Visits to the site, compared to 1.4 million in 2010, and 1.42 Unique Visitors. 52% of site traffic in 2011 came from the UK, followed by 14% from France, and the Accommodation Search facility was the most visited area of the website.

Source: Google Analytics

6.2 Website Usage

Table 11 Website Visits, 2009 - 2011

	<u>2009</u>	<u>2010</u>	<u>2011</u>
Visits	1,287,719	1,451,874	2,025,739
Unique Visitors	875,479	990,660	1,424,113

Visits to Jersey.com by Market, 2009 - 2011

	<u>2009</u>	<u>2010</u>	<u>2011</u>
UK	749,613	765,879	1,061,659
France	138,293	195,678	286,356
Germany	64,548	65,137	88,846

Source: Google Analytics

2011 saw 132,965 visits to Jersey.com by users of mobile devices, representing a 322% increase on 2010. The most popular devices being used were Apple's iPad and iPhone. This trend is expected to continue apace in 2012 and beyond.

7. Employment in the Hospitality Sector

The figures within this section are provided by the States Statistics Unit quarterly Manpower Survey, in which almost all businesses in Jersey report the number of staff employed in their undertaking. For a number of reasons it is not possible to accurately determine the total number of jobs in Jersey that are dependent upon the tourism industry, but employment in hotels, restaurants and bars will give a broad approximation to the employment directly generated by tourism.

Manpower Returns

Figure 19 below shows the number of employees in the hospitality sector between 2007 and 2011. There was a small decrease in 2008 and further decreases in June 2009 and 2010. However, June 2011 saw a slight increase of 110 total staff.

<u>Figure 19 Total staff employed in the hospitality</u> sector 2007 – 2011

Source: States Statistics Unit

The difference between the number of staff employed in June 2011 and December 2010, some 1,590, would indicate the seasonal nature of tourism employment. The equivalent figure in 2010 was 1,530. Measured against staff employed in all sectors, the percentage attributable to the hospitality sector in the June reports has fallen from 13% in 2007 to 12% in 2008, and has remained at 12% in every June report since then. There has been a steadying in the numbers of staff employed since numbers began to fall in the 1990's.

Figure 20 below shows the trends in full-time and parttime employment since 2007. In 2011, both full-time and part-time employment were at a very similar level to 2010.

In 2007, full-time employees accounted for 83% of all those employed in hotels, restaurants and bars, compared to 78% in 2011.

Source: States Statistics Unit

For more detailed information please visit The Statistics Unit's website at <u>www.gov.je/statistics</u>

8. Passenger Arrivals

In 2011, passenger arrivals through Jersey's airport increased by 15,300 (2.1%) and passengers through Jersey harbour terminals increased by 15,200 (4.0%).

Figure 21 details a breakdown of arrivals by air and sea against the total for each year.

Figure 22 shows arrivals by month during 2011. The pattern of higher arrivals during the summer months reflects the seasonality of the "tourist" season.

<u>Fiqure 22</u> Total air & sea arrivals by month for 2011

Total Sea Arrivals
 Total Air Arrivals

As in recent years, 2011 again saw some significant changes in arrivals patterns.

5 regions showed increases in passenger arrivals. The highest increase was in Greater London (+17,300), mainly due to an increase of 7% in passenger numbers on the Gatwick route. There was a decrease of 2,000 on the routes from Wales and the West, as well as a decrease of 1,800 from the East. The loss of the Plymouth route affected the Southwest figures (1,000 down on 2010).

Figure 23 illustrates the impact of operators in 2011 vs. 2010 by region.

Figure 23 Changes in UK air arrivals by region 2010 vs. 2009

For more detailed arrivals data please refer to *Appendices 15 to 18.*

9. Guide to Data Sources and Notes

Figures

Where it is felt to be appropriate, figures within the text and tables have been rounded. This may mean that some totals and percentages may not totally agree or, in the case of percentages, add up to 100%.

Seasons

Where seasons are referred to, the following is applied: Spring = April, May and June Summer = July and August Autumn = September and October Winter = November, December, January, February and March

Passenger arrivals

Detailed monthly passenger arrivals figures by route are provided by Jersey Airport and by Jersey Harbours. Passenger arrivals figures include returning Jersey residents, returning visitors (who may have taken a day trip or other trip away from Jersey during their stay and are therefore counted twice) and arriving visitors. The tables, graphs and figures have been produced by Jersey Tourism.

Visitor volume, value and profiles

The sources used in estimating visitor volume are declared beneath the relevant tables in the appendices.

Visitor Registration Scheme

The basis of staying leisure and business visitors is the Visitor Registration database. All guests who stay in registered accommodation in Jersey are required by law to complete details of their stay on a standard Visitor Registration Card. These cards are returned to Jersey Tourism at regular intervals and the details are data inputted. Despite the legal requirement to declare all guests, the results are still affected by the non-return or late return of some cards and the partial or non-completion of cards by some visitors. Over the years the true extent of visitors not declared on visitor registration cards has been determined by the 1997/98, 2003, 2005, 2007 and 2009 Jersey Travel Surveys, and multipliers have been applied accordingly to the database results to compensate for this in the staying visitor estimates.

The Jersey Travel Surveys

Realising the limitations of the Visitor Registration Scheme in determining total visitor volume, as well as changing trends in the profile of visitors, Jersey Tourism commissioned a year-long exit survey in 2009 to measure visitor volume in order to update data gathered from the most recent previous survey undertaken in 2007. Similar in methodology to the UK International Passenger Survey and many other exit surveys carried out internationally, throughout 2009, over 50,000 departing passengers, representing 108,000 (9.8%) of total departing passengers, were asked whether they were a resident or visitor to Jersey, whether they were departing at the end of their stay, their purpose of visit and country of residence. The results were calibrated against total passenger numbers on individual routes and consolidated to determine total visitor volumes.

In 2007, a smaller sample of 18,620 departing visitors, with adequate sub-sample sizes to measure individual markets, were asked detailed questions about their expenditure whilst in Jersey. Results from this survey determined the on-island expenditure figures for 2007. Changes in visitor profile, such as length of stay, and Jersey's RPI figures have been used to update some elements of expenditure estimates as accurately as possible.

Prior to these exit surveys, Jersey Tourism had no accurate way of measuring total visitor volume and concentrated rather on the staying leisure market, estimates of which came from returned Visitor Registration Cards. Visitor expenditure estimates were previously derived from a 4-yearly postal survey of staying leisure visitors, with other markets being excluded. As the methodology for the measurement of visitor volume and visitor expenditure has completely changed, Jersey does not, unfortunately, have historical data that can be readily compared prior to 1997.
Staying Leisure Visitor Surveys 2006 and 2008

Several references are made to the Staying Leisure Visitor Surveys within the report. A sample of 6,000 visiting parties who stayed in registered accommodation for leisure purposes throughout 2006 was sent an eight-page, self-completion questionnaire. An excellent response rate of 55% (returned questionnaires) was achieved, with adequate subsamples for Jersey's main generating markets. The 2008 Survey only covered visitors from the UK.

The data provides a rich source of additional information on Jersey's main source leisure markets and results for specific questions within the survey are available upon request. A summary report of the main findings is available on Jersey Tourism's website www.jersey.com/marketinginfo.

Employment figures

As mentioned within the report, employment figures are provided by the States of Jersey Statistics Unit. The figures come from the twice yearly Manpower Survey. The tables, graphs and interpretation from the figures have been produced by Jersey Tourism.

Registered bed stock

All tourism establishments that take five or more guests for reward are required to register with Jersey Tourism. Figures for establishments, rooms and bed spaces are therefore provided by the Jersey Tourism Inspectorate. Due to the continuously changing numbers of registered properties and rooms, the figures within this report may not be equivalent to previously released figures as they depend upon the exact date that they were recorded.

2006 heralded a change in the system used for grading registered establishments. Although the Economic Development Department remains responsible for the Registration standards, grading is no longer mandatory. Establishments can choose to be graded or remain as registered only. Jersey Tourism only publishes the grades achieved under the harmonised schemes operated by either the AA or VisitBritain (Jersey Quality Assured).

Accommodation occupancy, bed/room nights available and bed/room nights sold

Bed and room nights available take into account registered bed spaces and rooms, and opening and closing dates for each establishment. Bed and room nights sold are a measure of the number of persons multiplied by their length of stay. By comparing bed and room nights sold against bed and room nights available it is possible to determine bed and room space occupancy levels.

VFR estimates refer to those staying with friends and relatives, and not those who stay in paid accommodation. The estimates are based upon the 2007 and 2009 Travel Surveys. Staying leisure visitors are based upon returns of visitor registration cards and the 2007 and 2009 Travel Surveys and refer to those staying in paid accommodation.

³ Language student numbers are based upon declarations from language schools.

⁺ Business visitor estimates are based upon returns of visitor registration cards and the 2007 and 2009 Travel Surveys.

⁵ Conference figures are supplied by the Jersey Conference Bureau. ³ Visiting yacht figures are supplied by the Jersey Harbours.

⁷ Leisure day trips are estimated from the results of the 2007 and 2009 Travel Surveys.

³ Other' may refer to business or leisure visits (e.g. specific events, deliveries, visiting bands, weddings, funerals, educational trips etc.). The 2009 Travel Survey had a tighter definition of "Other" than previous surveys, with many respondents being reclassified as leisure or business visitors.

MOSAIC is a geodemographic profiling system based upon UK postcodes.

This table shows the geo-demographic profile of visitors to Jersey between 2008 and 2011. The higher the index figure (this is the proportion of Jersey visitors compared to the UK population for each Mosaic Group), the more likely Jersey is to attract visitors from a particular Mosaic group.

Figures are based upon detailed reports provided by the Harbour Office and Jersey Airport. N.B. Figures are for all passenger arrivals and include returning residents, day trippers and business visitors. Monthly totals are effected by the number of weekends that fall in a particular month. Summer = July and August, Spring = April to June, Autumn = September and October, Winter = January to March and November to December
