

## Temporary Authorisation for Cuprokylt

### Pesticides (Jersey) Law 1991

Product name:	Cuprokylt
Active ingredient:	87.8% copper oxychloride (50% elemental copper)
Product authorisation holder:	Industrias Quimicas Del Valles, S.A. (Registered Company no. 30226)
Marketing company:	Certis Belchim B.V.

This temporary authorisation ends: 31 December 2026

If the authorisation of the above product is withdrawn or amended before the end date above, this temporary authorisation will end on the same date as the authorisation for the product.

Extent of authorisation: Jersey

---

Signed by: Deputy J. Renouf, Minister for the Environment    Date of issue: XXXXXXXXXX

### EXPLANATORY NOTES

1. This is a temporary authorisation for Jersey for the sale, dispersal, storage and use of Cuprokylt (copper oxychloride) for the period 29 January 2024 to 31 December 2026.
2. Neither the efficacy nor the phytotoxicity of the product for which this authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.

### ADVISORY INFORMATION

This temporary authorisation relates to the use of 'Cuprokylt' as a fungicide for the control of late blight caused by *Phytophthora infestans* on tomatoes and potatoes. Applications to be made via a conventional hydraulic sprayer, air assisted hydraulic sprayer or knapsack sprayer in a water volume of 1100 – 1300 litres of water / ha for potatoes and 1000 litres of water / ha for tomatoes.

### CONDITIONS OF AUTHORISATION FOR USE

The conditions below are obligatory. They must be complied with when the authorisation occurs. Failure to comply with the following conditions may result in other enforcement action, including prosecution. For the purposes of this authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or

requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply.**

**Use:**

Field of use:	<b>ONLY AS A FUNGICIDE</b>			
User:	Professional			
Crops/situations:	Individual dose (kg product / ha):	Maximum total dose:	Number of treatments (per crop):	Harvest interval:
Potatoes	1.5 - 2	-	3 - 6 (apply every 10 – 14 days)	-
Tomatoes	3	-	-	-

**Maximum Residue Levels (MRLs) for potatoes and tomatoes: 5 mg/Kg**

Operator Protection:

- (1) Spray equipment must only be used where the operator's normal position is within a closed cab on a tractor or self-propelled sprayer when making broadcast air-assisted applications.
- (2) Other engineering control of operator exposure must also be used where reasonably practicable in addition to the following personal protective equipment:
  - (a) Operators must wear suitable protective gloves and suitable respiratory protective equipment when handling the product.
  - (b) Operators must wear suitable protective gloves when handling contaminated surfaces or applying by hand-held equipment.
  - (c) Workers must wear suitable protective gloves when handling treated crops or contaminated surfaces.
- (3) However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

**Other specific restrictions:**

This product must only be applied in accordance with the terms of this authorisation, the product label and/or leaflet.
