

# Registered Unemployment February 2011

Statistics Unit: [www.gov.je/statistics](http://www.gov.je/statistics)

## Introduction

Data on people registered as unemployed and actively seeking work in Jersey is compiled and administered by the Social Security Department. The Statistics Unit independently analyses this anonymised data and publishes a monthly report.

When interpreting the numbers presented in this report, it should be kept in mind that there is no legal requirement for all unemployed residents of Jersey to register as actively seeking work (ASW) with the Social Security Department. The numbers shown, therefore, constitute an informative set of indicators of the level and characteristics of unemployment in the Island at the specified point in time.

*Furthermore, when placing the figures contained in this report in a historical context, it should be recognised that there have been significant changes in the criteria relating to registered unemployment in Jersey in recent years. In particular, the introduction of Income Support in 2008 has led to a much higher proportion of individuals actively seeking work being included in the registered unemployment figures.*

The internationally comparable unemployment rate (as defined by the International Labour Organisation, ILO) is measured on an annual basis by the Jersey Annual Social Survey. In the summer of 2010 the ILO unemployment rate for Jersey was measured to be 3.0%. This rate corresponds to 1,700 people being unemployed at that point in time.

The numbers of people registered as unemployed and actively seeking work include people who are on the Advance to Work, Advance Plus<sup>1</sup> and Workwise schemes<sup>2</sup>.

## Summary

On 28<sup>th</sup> February 2011:

- **the total number<sup>3</sup> of people registered as unemployed and actively seeking work (ASW) in Jersey was 1,470;**
- **the latest monthly ASW total is:**
  - 80 higher than that of a month earlier, January 2011;
  - 150 higher than that of a year earlier, February 2010;
- **long-term unemployment** (registered for more than 52 weeks) has increased by 60 over the last twelve months, from 110 in February 2010 to 170 in February 2011;
- **320 teenagers aged 16-19 years** were registered as ASW, a similar number as in the previous month; 140 teenagers were on the Advance to Work Scheme<sup>1</sup>;

---

<sup>1</sup> The Advance to Work scheme provides 16 to 19 year olds who have left school or college with a relevant work placement and training. Advance Plus provides over 19 year olds with a relevant work placement and training.

<sup>2</sup> Workwise comprises of a team of advisors in the Social Security Department who help people with special employment needs, or having particular employment barriers, to prepare for and seek suitable work. From October 2010, a system enabling more complete counting of individuals on Workwise placements has been implemented.

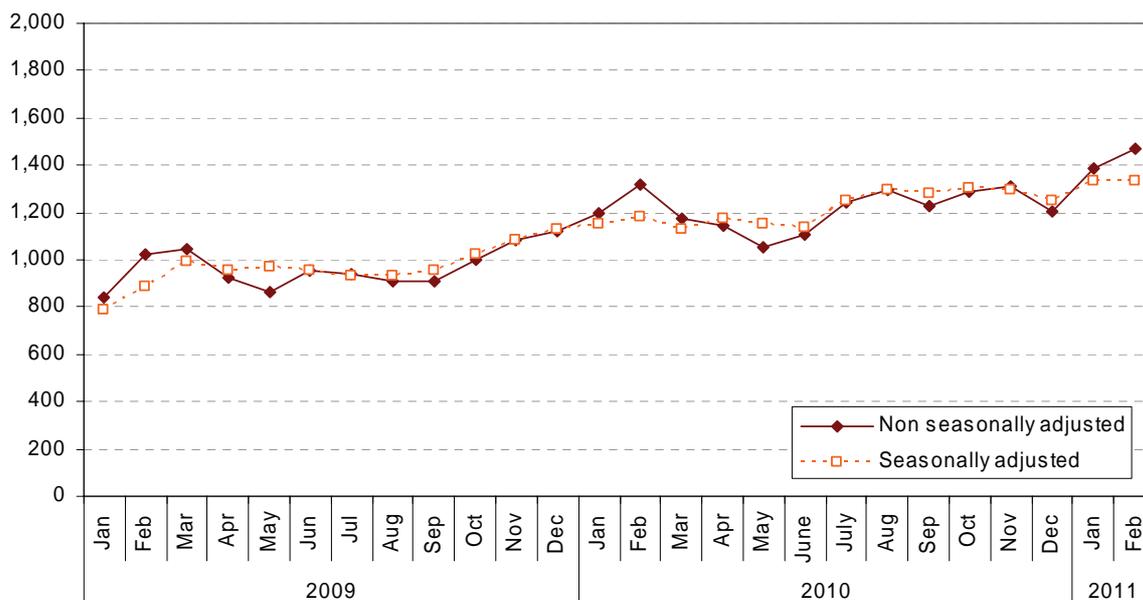

<sup>3</sup> Numbers presented in this report are rounded to the nearest 10.

## Registered Unemployed people Actively Seeking Work

On 28<sup>th</sup> February 2011, 1,470 people were registered with the Social Security Department as unemployed and actively seeking work (ASW). Two-thirds (67%) of people registered as ASW on this date (980 individuals) were receiving Income Support<sup>4</sup>.

Figure 1 shows the total number of people registered as ASW at the end of each month since January 2009 (monthly data are also shown in Annex Table A1). The total number registered in February 2011 was 80 higher than in January 2011 and 150 higher than a year earlier, in February 2010.

**Figure 1– Total number of individuals registered as ASW, Jan 2009 – Feb 2011**

The seasonally adjusted series of the total registered as ASW, in which seasonal and calendar effects are removed, is also shown on Figure 1. From this perspective, the total number of people registered as ASW in Jersey in February 2011 was at the same level as in January 2011.

As is also apparent from Figure 1, the seasonally adjusted ASW total has increased over the last two years, and the figures for the first two months of 2011 were some 50 higher than the monthly average recorded over the latter six months of 2010.

## Registered ASW by age

On 28<sup>th</sup> February 2011, almost two-fifths (38%) of all people registered as ASW in Jersey were under the age of 25, with more than a fifth (22%) of the total being teenagers aged 16-19 years.

Figure 2 shows the numbers registered as ASW by age of individuals for the last four months, from November 2010 to February 2011; most age categories saw a small increase in the numbers registered between January 2011 and February 2011.

<sup>4</sup> The total number of adults receiving Income Support without work will be greater than this figure, which represents the number registered on 28th February 2011 as ASW.

**Figure 2 – Individuals registered as ASW by age, Nov 2010 – Feb 2011**

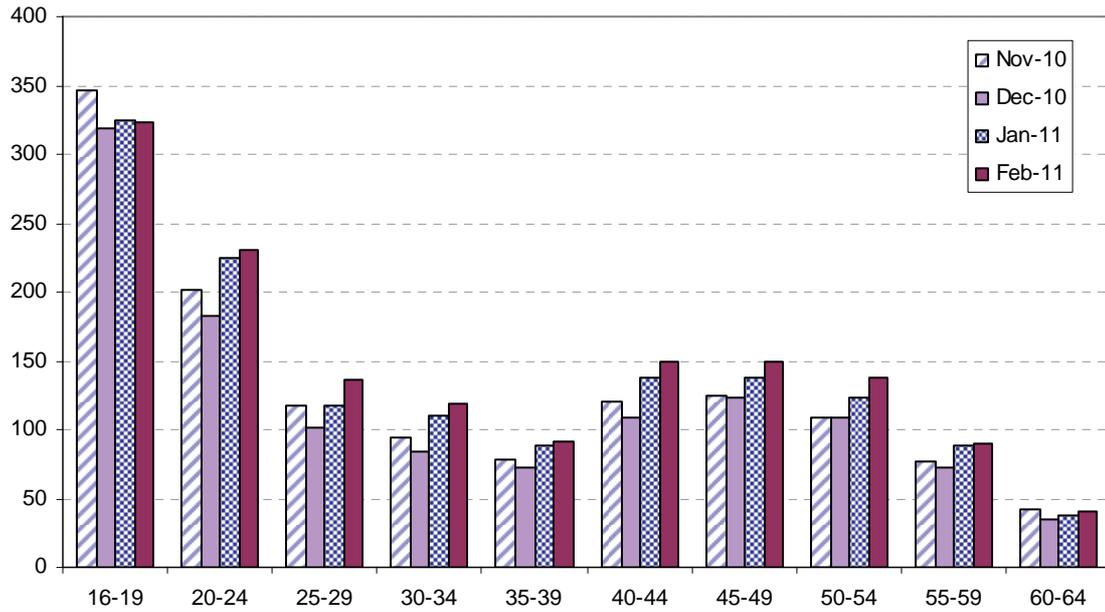

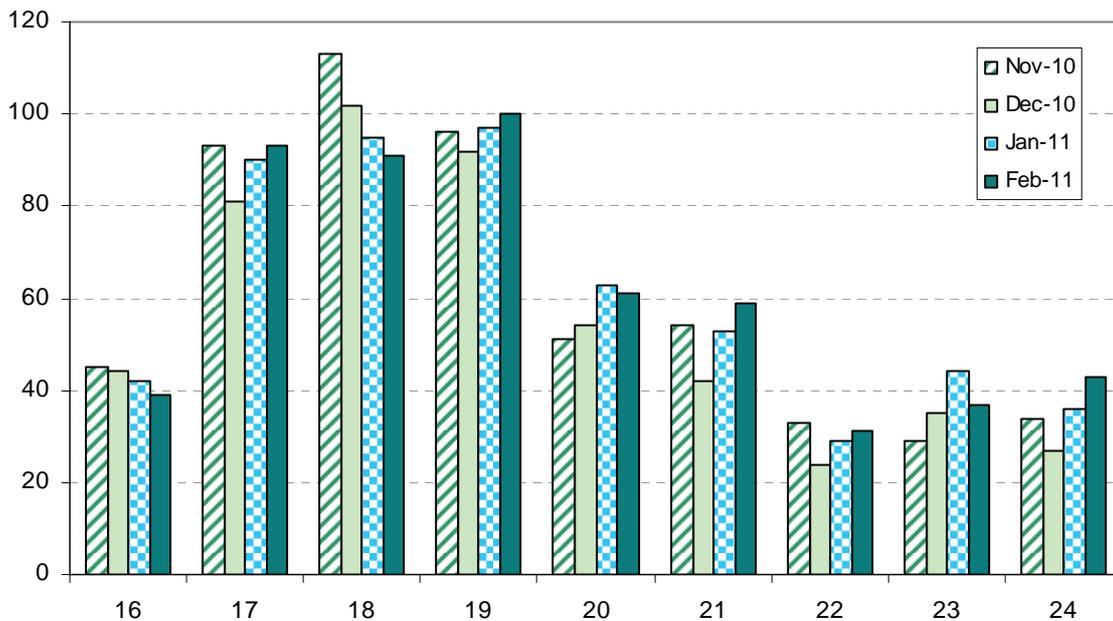

Figure 3 shows the age distribution for people under 25 years of age who were registered as ASW in the latest four months, from November 2010 to February 2011. The greatest numbers of people registered as ASW at the end of February 2011 were for ages 17-19 years.

Of the 320 teenagers who were registered as ASW at the end of February 2011, 140 were on the Advance to Work scheme.

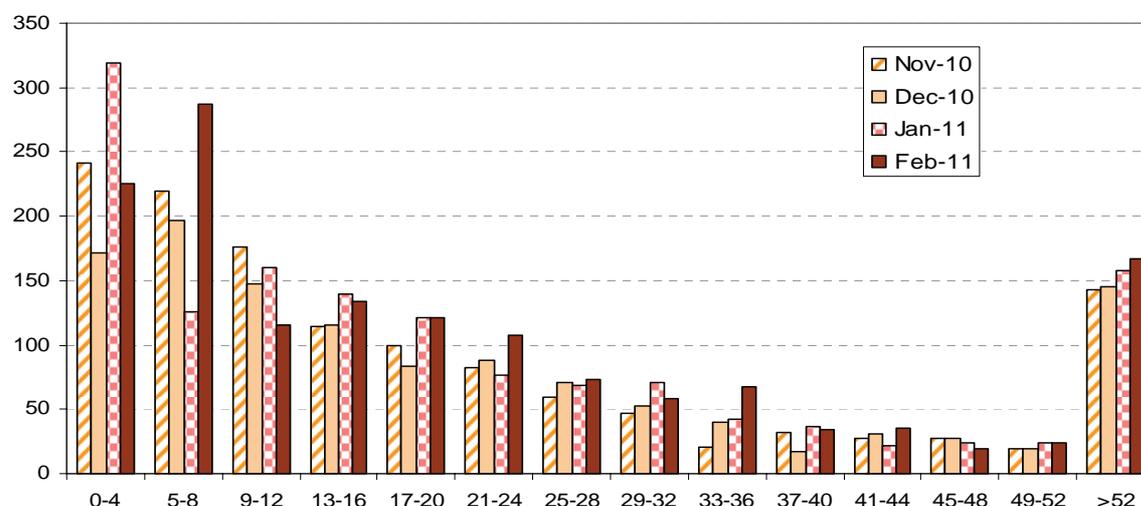

**Figure 3 – Individuals under the age of 25 registered as ASW, Nov 2010 – Feb 2011**

## Duration as ASW

More than two-fifths (43%) of all people registered as ASW on 28<sup>th</sup> February 2011 had been registered for fewer than 13 weeks (approximately 3 months). Almost 12% of the total (170 individuals) had been registered as ASW for more than a year - see Figure 4.

**Figure 4 – Registered ASW by length of period registered (weeks), Nov 2010 - Feb 2011**

230 people had registered as ASW in the latest four week period. This number is 90 fewer than the corresponding number for the four weeks up to 31<sup>st</sup> January 2011.

The number of people in long-term unemployment (defined as being registered as unemployed and ASW for more than 52 weeks) has increased by 60 over the last twelve months, from 110 in February 2010 to 170 in February 2011.

## Occupation and Industry

Individuals working in some occupations and industries of the economy, notably in the Finance sector, often seek employment through private agencies instead of registering with the Social Security Department. Such occupations and industries will, therefore, be under-represented in the ASW numbers. Nevertheless, the change over time for all recorded occupations and industries will be informative.

The last industry of employment was recorded for almost 90% of all those registered as ASW in February 2011:

- more than a third of the latest monthly increase was from 'Banking, Miscellaneous Insurance, Finance and Business';
- almost a quarter of the latest monthly increase was from people whose last employment was in the category 'Wholesale and Retail, Motor repairs and sales';
- 'Construction and allied trades, Mining and quarrying' and 'Public Administration, including States Trading committees' each accounted for 15% of the latest monthly increase.

From an occupation<sup>5</sup> perspective:

- 'Elementary Occupations' and 'Administrative and Secretarial Occupations' each accounted for almost a third of the latest monthly increase;
- a fifth of the increase was from 'Sales and Customer Service Occupations'.

*Statistics Unit  
25<sup>th</sup> March 2011*

<sup>5</sup> Standard Occupational Classification SOC2000.

## Notes

### Standard Occupational Classification (SOC 2000):

Example occupations within each category:

#### **Managers and Senior Officials**

managers and senior offices in public and private sectors.

#### **Professional**

science professionals, civil engineers, pharmacists, veterinarians, teachers, lawyers, judges, chartered accountants, architects, social workers, librarians, clergy.

#### **Associate Professional and Technical**

science technicians, engineering technicians, nurses, dental technicians, physiotherapists, youth workers, police officers (sergeant and below), artists, actors, graphic designers, journalists, sport coaches, air traffic controllers.

#### **Administrative and Secretarial**

office clerks, secretaries, personal assistants, receptionists, book-keepers, telephonists.

#### **Skilled Trades**

farmers, gardeners, fishermen, mechanics, electricians, telecommunication engineer, computer engineer, bricklayers, plumbers, carpenters, plasterers, tailors, printers, butchers, bakers, chefs.

#### **Personal Service**

nursing auxiliaries and assistants, care assistants, home carers, animal care, leisure and travel assistants, travel agents, hairdressers, nursery nurses, childminders, education assistants, housekeepers.
