John

I appreciate your advice, especially on issuing clarity on the Plume area

For 30 years the States of Jersey have stuck their heads in the sand and waited for the problem to go away. Like the 'benefits' of PFOA's, it won't!

We cannot continue to say on one hand 'don't drink it' and on the other hand say 'there is nothing wrong with it'

This is measured, been through all appropriate channels, and is the least those residents deserve

John I hope you will be supportive?

R

Rowland Huelin

Deputy of St Peters

Subject: Re: PFOS

Thank you , only one issue - the release gives no information about the "Plume Area" - to which eligibility for testing is to be limited so will generate many enquiries - surely there should be a plan.

Second question - is the plume area limited to that which was known at the time of the incident where measures were taken for alternative water supplies for householders effected or updated with the latest information (Pont Marquet streams)

Hello Minister and all,

No action required – just for your awareness really, in case any questions come up.

Public Health, the Chief Minister and Deputy Huelin are currently reviewing the attached draft press release, which they intend to issue tomorrow. [REDACTED] is also reviewing.

[REDACTED], I'll ensure I send you the final version once it's released to media.

Just so it's on your radars.

Thanks

Hi John,

My understanding of the plan is that Public Health will receive the requests and those who are referred by GP's will cross checked against the general area of the historic plume by myself and [REDACTED]. I don't think Public Health expect lots of enquiries given the pre-requisite of a GP referral as part of the eligibility criteria, but we shall see. I don't know the answer to your second question, but would suggest that it would be proactive to test those that may fall in an area that potentially may be defined as a secondary plume once the hydrogeological survey is complete, and I will be advising Public Health accordingly on any I am asked to comment upon.

Kind regards,

[REDACTED]

John

I've spoken to a lot of people in the area, and most know about this

I believe taking ownership will reduce peoples fear. Ignoring it creates suspicion

I agree, and all these points have been made. All GPs are to be briefed. It is not even known what a "safe" level is.

The only trial ongoing at present to remove the chemical involves giving blood every 12 weeks or plasma every 6 weeks and discarding it. The theory is that the body will produce clean blood, so dieting whatever levels there are.

Regards

Subject: Re: PFOS blood tests.

I think it may cause anxiety , especially for those living outside the original zone who have boreholes . It will put pressure on the GP's = i hope we have warned them . It will reopen wounds by those effected . There is no treatment known it seems

God afternoon.

[REDACTED]

[REDACTED] It is not, at present, being offered to those outside the (somewhat nebulous) plume area. Anyone in or near will be accepted if they meet other criteria.

Regards

Dear Chief Minister,

Please see attached the final:

- * PFOS press notice
- * Information for GPs
- * Information for residents which will be supplied by the GPs

Deputy Huelin would like to hold a meeting tomorrow night with residents. Could you please review at your soonest convenience so we're in a position to issue to media tomorrow under embargo?

[REDACTED]@gov.je>, are you able to please share with [REDACTED], if you haven't already, to ensure he's also happy with the final communications? Deputy Huelin would like to ensure he's seen everything before it's issued publicly and before he sets a meeting with residents.

We also just need the date for: Residents that have been accepted for referral will require a blood test form; these should be written and left with reception after the referral acknowledgement has been provided.

Many thanks,

[REDACTED]
