Hi [REDACTED]

I found no concerning issues on the three enclosures we visited yesterday, also taking into consideration that the animals are under veterinary supervision, and you are constantly trying to improve the enclosures. The sloths, goats and aardvarks looked relaxed and on good condition.

I would rather you don't volunteer the information about my visit at this stage, I would need to consult with our own press team. But happy to review that if things get more complicated.

Best regards

Susana
