

## Safeguarding of Elizabeth Castle to ensure it is outside the Danger Area.

23m off castle and breakwater, Harbour Approach from the South remains open.  
Shifting the display line West may open up the Harbour Approach but line is still over 2km from Sea Wall.  
This could open up the Castle Breakwater or orientation could be re-aligned.

### Positives:

- Opens the Harbour
- Relatively open approach for all aircraft.
- Should not be an issue for Fast Jets
- Beach Access Possible
- Vessels could be permitted north of Display Area provided a Crowd Line could be enforced.

### Negatives:

- Display flight line so far out the public will not be able to see anything unless on the Castle or breakwater. Also sifts Datum West.
- Heritage property still within the exclusion zone. (Fort)
- Difficult to define the exclusion zone easily. Could be harder to Police.
- Beach access possible but may increase risk.
- Crowd Line difficult to Police, Vessels and Public
- Infrastructure elements?
