3. UAT Defects Log – SMS issues			
The issue regarding SMS messages getting to Jersey mobiles has reopened as did not			
receive the test messages he should have received on his Android when testing last week. This			
issue is still being investigated by PbP and we have not been given an update on when it will be available yet.			
Resolution is critical this week, otherwise this puts the Green Street launch on 30 August at risk.			
4. Green Street Trial – Launch Plan and Materials			
has asked to clarify SMS notification default settings across all channels, as this should			
be included in the Green Street comms if users query why they are being charged an extra 10p or			
20p. From doing the testing on the IOS app, believes the SMS Reminder is set to on but the			
Receipt is off. will forward the clarification from to the team.
