Dear

## 90kV duct installation along St Aubin's Bay Promenade

Following complaints from our Parks and Gardens Section we inspected the condition of the reinstatement of the cable route along the cycle track and grass areas.

We are appalled at the condition that your contractor has left the grass reinstatement along the route. We noticed that the surface of the ground is covered with stones and glass. The surface is also rutted and uneven. Both of these hazards will make it impossible to cut grass safely in the spring. The general condition your contractor has left the landscaping is poor.

We noted freshly cracked concrete and asphalt to the surfaces either side of the reinstatement route and poor quality reinstatement to the kerb edgings. We are currently checking the asphalt surface for compliance with the HAUC specification.

You are therefore requested to instruct your contractor to contact on to undertake snagging and agreed remedial works at no cost to this department.

Until these works are made good to the satisfaction of this department we reserve the right to refuse access to the area to continue works.

Yours sincerely

Manager - Highways and Infrastructure

Subject: St Auburn's Bay JEC route

This morning I walked the JEC 90Kv route from Bel Royal Car Park to Car Park near Tyneville Lane with JEC/Vanne/Pallot to carry out an initial visual inspection. I will list my observations and JEC's actions. JEC confirmed they have took photographs prior to commencing the job which we may view them if needed.

### Landscaping (for

Vannie are on site laying down topsoil for reinstating the grass areas. I have reminded then that after (say) 2 moths weathering, they will be expected to stone pick these areas. I understand JEC/Vannie have placed an order with Parks Dept to carry out the grassing. JEC need to advise Park Dept when.

### Granite and Concrete Promenade area (for

Only two small concrete patches are to be taken up and replaced in asphalt.

The concrete slab reinstatements have been made in asphalt and often of an irregular shape that looks aesthetically poor. I do not suggest these are remove now that the job has been almost finished.

JEC have agreed to grout gaps and new cracks locally to their trench.

Dave, as you are more aware of the general condition of these slabs, please note any new slab movement and advise if JEC proposal needs further thought. JEC need to invite us to walk this site again just before the maintenance period is up. I need to be convinced the concrete slabs will not notably move after a few sea overtopping.

#### Concrete footpath edgings.

Two particular locations were viewed and in my view of poor workmanship. It was agreed to replace these sections.

#### Cycleway / footpath.

I plan to carry out some further inspection and I will advise JEC/Pallot of my checks.

Several local area (eg joints and ponding) were identified for replacement.

One panel of say 2m x 4m is to be jointly paid between JEC and TTSd.

One depression at the Bel Royal car park entrance will be repaired.

The composite construction of sand asphalt overlaid on concrete slabs has existing reflective cracking. Where these cracks and new cracks have notably opened up, the cracks will be mastic sealed. Again we need to re-inspect prior to end of maintenance.

One further opening will be need for cable pulling. Some of the remedials may be done at that time.

I have asked Vanni for clarification as to the completion of the original snagging list. Are these 'new' cracks? Do we need a further site visit?

Subject: Victoria Avenue JEC trench lines

Hi

I carried out a walked inspection with Jeremy of the JEC trench between the start of the future resurfacing (Bel Royal) to the Westbound 'IN' of the car park.

There were 3 depressions at the car park area. (No 1 at the entrance, No 2 in the footway, No 3 on the left hand wheel line westbound c/way of Victoria Ave)

The trench appears fine until you approach the garage. At the garage, the trench shows some settlement.

Now that I have seen the future white lining drawing, I can see that this location will get trafficked (currently this only occurs when the Petrol Tanker is delivering petrol). From the drawings, the existing kerbline moves into the carriageway.

My suggestions would be:-

- (a) to repair the 3 nr patches within the future contract.
- (b) to strength the JEC trench between Ch 10 and Ch 50 across the width of the trench (say) 2m wide....80 sq m Glassgrid

Instead of strengthening the trench by excavation methods, using Glassgrid plastic reinforcement laid below the surface course.

The costs should be back charged to JEC.

I will call on Monday for his thoughts.

Jersey Electricity Company The Powerhouse P O Box 45 Queens Road St Helier JE48NY

Our ref: KA/JG 38/1

Dear

We have decided to write to you to express our concern about the operational performance of your Term Contractor (Vanni Ltd) and the quality of reinstatement.

The condition of the promenade has caused us some concern since Vanni installed the 90 KV cable along the cycle lane, promenade and grassy areas of Victoria Avenue. We wrote to you on 03 January 2008 expressing our concern about the quality of reinstatement. The poor surface has now resulted in a tripping injury to a member of the public. We have paid the claimant and request that you reimburse us accordingly. This will be separately invoiced.

Following further inspections by our office it is apparent that the asphalt surface is not acceptable to this Department and will not be accepted. The undulations in the surface are also indicative that the trench is settling differentially along its length, indicating that there may be an issue associated with sub-standard compaction of trench fill. As you will appreciate, the trench line is adjacent to the sea wall and subject to occasional overtopping and subsequent sea water inundation.

Please advise this Department what action you are going to take to restore the asphalt and concrete pavement promenade to its existing condition.

We also would like to place on record our dissatisfaction with Vanni's performance on the St Aubin's Inner Road JEC pit construction. During the last few days of this project our staff were involved in an excessive amount of site inspection. We were concerned that the road reinstatement including the removal of trench supports would not be undertaken correctly. The centreline of the road had already dropped 35mm local to the construction of the pit causing concern about the make up of the road on the adjacent carriageway.

Mr Thorne spent nine hours over the last few days of the project ensuring that the reinstatement of the trench was adequate. We reserve the right to charge the JEC for this increased attendance. More worrying, the site operatives did not seem to have much of an idea of how to extract the trench sheeting and ensure that the resulting voids were filled. It was left to to offer advice. This is not acceptable. Vanni staff should have been running this project, to a standard set by the JEC.

A further point to note is that on the morning of Tuesday 22 April, which was the day the schools returned, traffic chaos developed around the works. Temporary lights were installed to allow the works to be passed by east and west bound traffic but eastbound traffic was delayed for over 45 minutes travelling into St Helier because the lights were not set for the appropriate traffic flow. This resulted in further visits to site by and our Traffic Engineer,

The above incidents highlight inadequacies in the knowledge of the site operatives that has prompted the question about whether the Vanni operatives have streetworks and HAUC tickets. It also poses questions about the supervisory capability of the JEC in ensuring that works sponsored by them are undertaken to the standards required of a normally professional utility company.

Are you able to guarantee that future works will be to an acceptable standard, with a competent contractor and without the supervision deficiencies identified above?

We think it would be useful to meet with you to discuss these projects and receive reassurances about future project management and would be grateful if you would contact us to set up a meeting.

Yours sincerely

Manager - Highways and Infrastructure

 Subject:
 JEC trench Promenade

I walked the route again with with Vanni's Contracts Supervisor. JEC have agreed to provide me with their site photos.

ozo have agreed to provide the with their site photos.

We discussed the following items but did not make any conclusions:-

- 1) I have indicated that the majority of the trench route is unacceptable. JEC feel many faults are due to adjacent poor surfaces to marry into.
- 2) I identified new settlement areas since we walked the site with JEC 10.1.08. I believe further settlement may occur. 3)HAUC p141Notes for Guidance NG2.5 Structural Integrity. Clause 4 speaks of extended interim guarantee period for large or deep excavations. I believe it is therefore reasonable to not adopt this trench this autumn. I am not prepared to accept the guarantee period start date.

My immediate proposals:-

- 1) Carry out trial holes to check compliance of material used to reinstate the trench.
- 2) Carry out a full surface irregularity survey looking at 4mm failures aswell as 7mm and 10mm, unfortunately this may take time.
- 3) Set up a meeting to discuss "Concrete Reinstatement" Suggest Thursday 3 July 2008 Say 10:00 to 12:00
- 4) Mark up a plan to display areas "unaccepted lengths" "local repairs" "accepted".
- 5) Set up meeting to discuss TBA for "Surface irregularities"
