Your comments

I object to the planned development at Plemont Bay as it will ruin the coast line in a beautiful area of the island. There is too much development in Jersey these days and it is harder and harder to find swaths of land that is like Jersey was before. we need to protect these few areas for the future generations. We talk about sustainable development, well this is a perfect opportunity to turn something back to nature for all to enjoy for generations to come. It would also protect a vital area of coast line with all the rare birds we hardly see any more.

I firmly reject this planning and hope that you will reconsider this application in light of all the negative reasons if these expensive housing were to be built.
